

## IGBT BASED DC SOLID STATE RELAY

- ▶ Latest IGBT technology generation.
- ▶ Ultra low drop out voltage at on-state (low power losses).
- ▶ Built-in protection against overvoltage and fast transients bursts.
- ▶ Built-in protection against overload and shorts-circuits of the load.
- ▶ Built-in over-temperature protection.
- ▶ Pluggable control connector with spring terminals

(\*2) After four Short-circuits and/or overload detection, the relay will be block for safety, this mode is indicated by a flashing chain of leds, in this case the diagnostic output would be closed and the Status output would be open. To cancel this fault, you should reset the product with supply input (pin X4#0 et X4#5).
