

Positronic Provides Complete Capability Mission Statement

Experience

- Founded in 1966
- Involvement in the development of international connector specifications through EIA®, IEC and ISO as well as PICMG®.
- Introduction of new and unique connector products to the electronics industry.
- Patent holder for many unique connector features and manufacturing techniques.
- Vertically integrated manufacturing raw materials to finished connectors.

Technology

- Expertise with solid machined contacts provides a variety of high reliability connectors including high current density power connectors.
- Quality Assurance lab is capable of testing to IEC, EIA, UL, CUL, military and customer-specified requirements.
- In-house design and development of connectors based on market need or individual customer requirements.
- Internal manufacturing capabilities include automatic precision contact machining. injection molding, stamping, plating operations and connector assembly.
- Manufacturing locations in southwest Missouri, U.S.A. (headquarters); Puerto Rico, France, China, Singapore, and India. Total square footage: 407,441.

Support

- Quality Systems: Select locations qualified to ISO 9001, ISO 14001, AS9100, MIL-STD-790 and customer "dock to stock" programs. Applicable products qualified to MIL-DTL-24308, AS39029, DSCC 85039, MIL-DTL-28748, Space D32, GSFC S-311-P-4 and GSFC S-311-P-10.
- Compliance to a variety of international and customer specific environmental requirements.
- Large in-house inventory of finished connectors. Customer specific stocking programs.
- Factory direct technical sales support in major cities worldwide.
- One-on-one customer support from worldwide factory locations.
- World class web site.
- Value-added solutions and willingness to develop custom products with reasonable price and delivery.

CONNECTOR DESCRIPTIONS

COMBINATION D-SUBMINIATURE STANDARD AND HIGH DENSITY

CB series connectors are available in standard density versions, which have fixed size 20 signal contacts and size 8 power, shielded, high voltage and air contacts. High density CB series connectors offer fixed size 22 signal contacts, size 8 contacts or size 16 power contacts. These connectors are available in various performance levels for best cost/performance ratio. Thermocouple contact options are also available.

COMBINATION D-SUBMINIATURE CRIMP CONTACTS STANDARD AND HIGH DENSITY

CBC series connectors offer crimp removable contacts for signal, power, shielded, high voltage and air contacts applications. These connectors are available in standard and high density versions. Thermocouple contact options are also available.

COMBINATION CONTACT DUAL PORT CONNECTORS

CBDP series. Offers seventeen different combinations of power and signal contact stacked assemblies. Size 20 signal contacts and size 8 power contacts.

INPUT POWER CONNECTORS (MicroTCA) - QB SERIES

QB series. Positronic was privileged to have participated in the development of the MicroTCA specification. Positronic is proud to announce the release of connectors for use in MicroTCA modules for power input. QB series offers board mount connectors for power modules, and cable connectors for bringing power to modules. QB series meet requirements of the MicroTCA Specification for 48V and 24V systems.

COMBO-D CONNECTOR SAVERS - ACBDP and ACBMP SERIES

ACBDP and ACBMP series. Combo-D connector savers with size 20 and size 8 contacts. Available for all standard Combo-D variants in shell sizes 1 through 6.

Combo-D series connectors permit mixed contact combinations of power, shielded, air, high voltage and signal contacts within the same connector body. Twenty-two connector variants are offered in six standard shell sizes.

Three performance levels of Combo-D series connectors are offered: professional, industrial and military. CBD series connectors are quality connectors recommended for use in sheltered, non-corrosive indoor and outdoor environments having normal ventilation, but without temperature or humidity controls. Signal contacts are offered with open entry professional level or PosiBand closed entry industrial level signal contacts. CBD series connectors meet performance requirements of IEC 60807-2, Performance Level One or Two. CBM series connectors are military quality connectors recommended for use in sheltered, mildly corrosive environments having a wide range of temperature, pressure and humidity changes. CBM series connectors will meet the applicable performance requirements of DSCC 85039.

Combo-D series connectors utilize precision machined signal contacts. Connector variants are available with contact terminations for solder and straight and right angle (90°) printed board mount terminations featuring a choice of inch or metric printed board footprints.

Power, shielded and high voltage contacts are removable, having solder and straight and right angle (90°) printed board mount terminations. Power and shielded contacts are available with crimp terminations. Air contact options are also available, see page 80 for details.

For low level shielding requirements, ferrite inductors may be attached to both signal and power contacts of connectors having contact terminations which are straight or right angle (90°) for printed board mounting applications. For additional information contact Technical Sales.

The female power contacts feature the Large Surface Area (L.S.A.) closed entry contact design which provides maximum mating surfaces between male and female contacts and reduced contact resistance during operation.

A wide assortment of printed board mounting hardware, cable support hoods, and locking systems is available from stock.

A blind mating system is available for applications requiring connector coupling in recessed areas or mobile power coupling systems.

Straight and right angle (90°) PCB mount thermocouple contacts are available, please contact Technical Sales for details.

TECHNICAL CHARACTERISTICS

MATERIALS AND FINISHES:

Insulator: Glass filled polyester per ASTM D 5927

UL 94V-0, blue color, and composite.

Contacts: Precision machined copper alloy.

Contact Plating:

SIGNAL: Gold flash over nickel plate and gold 0.000050

[1.27µ] over nickel plate. Other finishes available upon request, see page 81.

POWER: Gold flash over nickel. Other finishes available

upon request, see page 81.

SHIELDED: For contact platings, see page 68.

HIGH VOLTAGE: For contact platings, see page 68.

Shells: Steel with tin plate; zinc plate with chromate

seal; stainless steel passivated. Other materials and finishes available upon request.

Mounting Spacers
And Brackets:

Nylon; polyester; copper alloy or steel with zinc plate and chromate seal or tin plate;

plate and chromate seal or tin plate; phosphor bronze with tin plate; stainless

steel, passivated.

Push-On Fasteners: Phosphor bronze and beryllium copper with

tin plate.

Jackscrew Systems: Brass or steel with zinc plate and chromate

seal or clear zinc plate or tin plate; stainless

steel, passivated.

Hoods: Composite and plastic, UL 94V-0; brass

or steel with zinc plate and chromate seal. Aluminum; aluminum with electroless nickel plate. For aluminum hoods, zinc content is

1% maximum. Die cast zinc.

Non-magnetic versions are available, contact Technical Sales.

MECHANICAL CHARACTERISTICS:

Signal Contacts, Size 20 contacts, male - 0.040 inch Fixed: [1.02mm] diameter. CBD series has open

CBC series connectors offer professional, industrial and military performance levels. Connectors are designed for use in sheltered, mildly corrosive environments having a wide range of temperature, pressure and humidity changes. CBC series connectors offer mixed crimp-removable contact combinations of power, shielded, air, high voltage, signal, and thermocouple contacts within the same connector body. to size 8 removable contacts power, shielded, air and high voltage section, pages 68-80 for technical characteristics. Sixteen connector variants are offered in six standard shell sizes.

A wide assortment of cable support hoods and locking systems is available from stock.

CBC series connectors also offer a Blind Mating connector system for applications requiring connector couplings in recessed areas or for mobile power coupling systems.

CBC series connectors utilize precision machined contacts and they meet the applicable performance and dimensional requirements of IEC 60807-3, Performance Levels One and Two, DSCC 85039 and MIL-DTL-24308.

Connectors Designed To Customer Specifications

Positronic Combo-D connectors can be modified to customers specifications.

Examples: select loading of contacts for cost savings or to gain creepage and clearance distances; longer PCB terminations; customer specified hardware; sealing for water resistance.

TECHNICAL CHARACTERISTICS

MATERIALS AND FINISHES:

Insulator: Glass filled polyester per ASTM D 5927, UL

94V-0, blue color.

Contacts: Precision machined copper alloy.

SIGNAL: Gold flash over nickel plate and gold 0.000050 [1.27µ] over nickel plate.

Other finishes available upon request, see page 81.

POWER: Gold flash over nickel. Other finishes

available upon request, see page 81.

SHIELDED: For contact platings, see page 68.

HIGH VOLTAGE: For contact platings, see page 68.

Shells: Steel with tin plate; zinc plate with

chromate seal; stainless steel passivated. Other materials and finishes available upon

request.

Mounting Spacers: Nylon; copper alloy or steel with zinc plate

and chromate seal or tin plate; phosphor bronze with tin plate; stainless steel,

passivated.

Jackscrew Systems: Brass or steel with zinc plate and chromate

seal or clear zinc plate or tin plate; stainless

steel, passivated.

Hoods: Composite and plastic UL94V-0; brass or

steel with zinc plate and chromate seal. Aluminum; aluminum with electroless nickel plate. For aluminum hoods, zinc content is 1% maximum. Die cast zinc.

Non-magnetic versions are available, contact Technical Sales.

termination dimensions, page 78.

High Voltage Contacts: Straight and right angle (90°) terminations –

0.041 inch [1.04mm] min. hole diameter.

Shells: Male shells may be dimpled for EMI/ESD

ground paths.

Polarization: Trapezoidally shaped shells and polarized

jackscrews.

Locking Systems: Jackscrews and vibration locking systems.

Mechanical Operations: 500 operations for open entry contact,

1000 operations for PosiBand closed entry contact with 0.000050 [1.27 μ] gold plating.

Per IEC 60512-5.

Positronic's Combo-D connectors are a popular choice for a wide variety of applications. Many options make the Combo-D a versatile connector choice.

CBDD high density series connectors are quality connectors recommended for use in sheltered, non-corrosive indoor and outdoor environments having normal ventilation, but without temperature or humidity controls.

CBDD series connectors offer mixed contact combinations of power, signal, and thermocouple contacts within the same connector body.

CBDD series connectors utilize precision machined contacts offering high reliability. Connector variants are available with straight and right angle (90°) printed board mount terminations, including compliant press-fit. For cable connectors see CBCD section, page 39.

Female power contacts feature the Large Surface Area (L.S.A.)

closed entry contact design, which provides maximum mating surfaces between male and female contacts and reduced contact resistance during operation.

Fixed signal contacts are available with open entry female contacts, professional level or PosiBand closed entry female contacts, industrial level. Military contact plating is optional.

A wide assortment of printed board mounting hardware, cable support hoods, and locking systems is available from stock.

A blind mating system is available for applications requiring connector coupling in recessed areas or mobile power coupling systems.

Straight and right angle PCB mount thermocouple contacts are available, please contact Technical Sales for details.

CBDD series connectors utilize precision machined contacts and meet applicable performance and dimensional requirements of IEC 60807-7, MIL-DTL-24308 and AS39029.

TECHNICAL CHARACTERISTICS

MATERIALS AND FINISHES:

Insulator: Glass filled polyester per ASTM D 5927

UL 94V-0, blue color.

Contacts: Precision machined copper alloy.

Contact Plating:

SIGNAL: Gold flash over nickel plate. Other finishes available upon request, see page 81.

POWER: Gold flash over nickel. Other finishes available

upon request, see page 81.

SHIELDED: For contact platings, see page 68.

HIGH VOLTAGE: For contact platings, see page 68.

Shells: Steel with tin plate; zinc plate with chromate seal; stainless steel passivated. Other materials

and finishes available upon request.

Mounting Spacers
And Brackets:
Nylon; polyester; copper alloy or steel with zinc plate and chromate seal or tin plate; phosphor

bronze with tin plate; stainless steel, passivated. **Push-On Fasteners:** Phosphor bronze and beryllium copper with tin

plate.

Jackscrew Systems: Brass or steel with zinc plate and chromate seal

or clear zinc plate or tin plate; stainless steel,

passivated.

Hoods: Composite and plastic, UL 94V-0; brass

or steel with zinc plate and chromate seal Aluminum; aluminum with electroless nickel plate. For aluminum hoods, zinc content is

1% maximum. Die cast zinc.

Non-magnetic versions are available, contact Technical Sales.

Connectors Designed To Customer Specifications

Positronic Combo-D connectors can be modified to customers specifications.

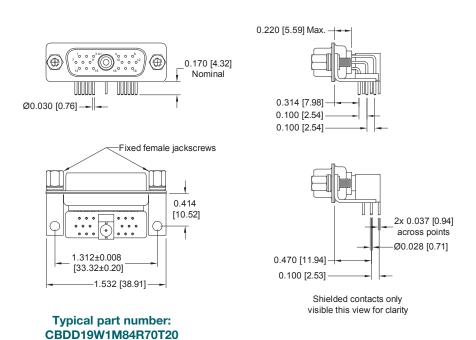

Examples: select loading of contacts for cost savings or to gain creepage and clearance distances; longer PCB terminations; customer specified hardware; sealing for water resistance.

CBCD high density series connectors are quality connectors designed for use in sheltered, mildly corrosive environments having a wide range of temperature, pressure and humidity changes. CBCD series connectors offer mixed crimp-removable contact combinations of power, signal, and thermocouple contacts within the same connector body.

A wide assortment of cable support hoods and locking systems is available from stock.

CBCD series connectors also offer a blind mating connector system for applications requiring connector couplings in recessed areas or for mobile power coupling systems.

CBCD series connectors utilize precision machined contacts and meet applicable performance and dimensional requirements of IEC 60807-7, MIL-DTL-24308 and AS39029.

TECHNICAL CHARACTERISTICS

MATERIALS AND FINISHES:

Insulator: Glass filled polyester per ASTM D 5927

UL 94V-0, blue color.

Contacts: Precision machined copper alloy.

Contact Plating:

SIGNAL: Gold flash over nickel plate and gold 0.000050

[1.27µ] over nickel plate. Other finishes available

upon request, see page 81.

POWER: Gold flash over nickel. Other finishes available

upon request, see page 81.

SHIELDED: For contact platings, see page 68. For contact platings, see page 68.

Shells: Steel with tin plate; zinc plate with chromate

seal; stainless steel passivated. Other materials and finishes available upon request.

Mounting Spacers: Copper alloy or steel with zinc plate and

chromate seal or tin plate; stainless steel,

passivated.

Jackscrew Systems: Brass or steel with zinc plate and chromate

seal or clear zinc plate or tin plate; stainless

steel, passivated.

Hoods: Composite and plastic, UL 94V-0; brass

or steel with zinc plate and chromate seal. Aluminum; aluminum with electroless nickel plate. For aluminum hoods, zinc content is

1% maximum. Die cast zinc.

Non-magnetic versions are available, contact Technical Sales.

UL Recognized File #E49351

CSA Recognized File #LR54219

Telecommunication UL File #14095

The Combo-Dual Port connector series offers several combinations of power and signal contacts within the same connector assembly. Seventeen different combinations of power and signal contact stacked assemblies are available within four standard shell sizes. The connector assembly can be partially populated with either signal or power contacts installed in the connector bodies to customer selected contact positions. The stacked connectors may be spaced apart to two dimensional spacings.

On special order, the right angle (90°) printed board mount contacts may be replaced with size 8 power,

shielded or high voltage contacts having crimp or solder cup terminations. Signal contacts remain in dual port configuration.

Mounting angle brackets can be ordered riveted to the connector by specifying R2, R6, R7 and R8 options. Locking systems are available utilizing 4-40 threaded jackscrew systems, polarized or non-polarized, or with a quick-release vibration lock system for rear panel mounted connectors.

Combo-Dual Port series connectors comply with the dimensional requirements of IEC 60807-2 and DSCC 85039.

Positronic Industries is known throughout the PCI Industrial Computer Manufactures Group (PICMG) community as a value supplier of AdvancedTCA Zone 1 and Compact PCI power connectors, as well as a wide variety of other power distribution interconnects.

Positronic has been privileged to participate in PICMG specification work, including MicroTCA. Positronic is a proud supplier of power input connectors for use in MicroTCA power modules.

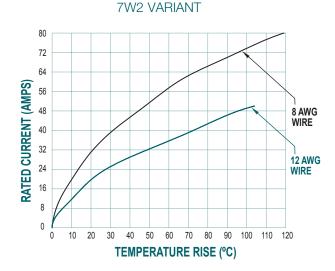

QB series offers board mount connectors for power modules, and cable connectors for bringing power to modules. QB series meet requirements of the MicroTCA Specification for 48V, 24V and 12V systems.

To learn more about PICMG or to get specifications, visit www.picmg.org.

MTCA power module shown above is compliments of Actel Corp. (www.actel.com) and Signal Stream Technologies, LLC. (www.signalstreamtechnologies.com).

ACBDP and ACBMP series connectors are suitable for use in any applications requiring high performance characteristic. The normal density ACBDP and ACBMP series are available in standard Combo-D connector variants.

ACBDP and ACBMP series connectors utilize precision machined contacts for strength and durability. The ACBDP female contact features a rugged "Open Entry" design or PosiBand "Closed Entry" design for even higher reliability. ACBMP connectors features PosiBand "Closed Entry" contacts and military contact plating.

ACBDP and ACBMP series connectors can be mated to a connector which would normally experience high numbers of mating cycles. The ACBDP/ACBMP connector can be easily replaced, "Saving" a connector which is not easily replaced.

These connectors can also be used as a "gender changer". Connector Savers are also available in standard and high density D-subminiature versions, please consult our Professional, Industrial and Military Performance D-subminiature Connectors catalog for more information.

Positronic Industries is **known** around the world **for offering** our customers **flexibility** when choosing connectors.

In addition to allowing **customers** to **create** part numbers for **particular applications**, Positronic offers a **wide variety** of features and accessories within our products.

Positronic is also **eager** to modify existing products **to meet unique customer requirements.** If you do not find what you need with this catalog, please **contact us** for assistance.

SEQUENTIAL MATING CONTACTS

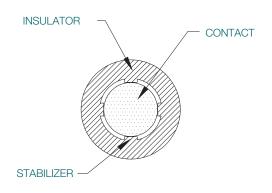

Note: A third level can be accomplished with signal contacts where applicable.

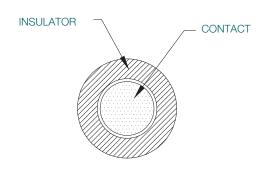

Three levels of sequential mating are possible:

- First mate accomplished by a size 12 power contact. Male contact diameter is 0.094 inch.
- Second mate accomplished by a size 8 power contact. Male contact diameter is 0.142 inch.
- Third mate accomplished by size 20 signal contacts, as applicable.

MINIMIZES FLOAT IN SIZE 8 CONTACT POSITIONS

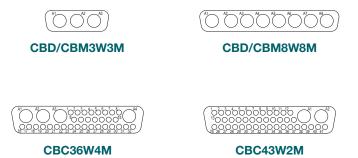

WITH STABILIZER

WITHOUT STABILIZER

CBD size 8 male contacts are removed toward the rear after utilizing front release tooling. Space must be provided between the contact and the connector molding so the tooling can slide over the mating portion of the contact. This fact allows the contact to float.

In some applications this float creates problems in alignment during mating. Many male contact CBD variants offer an integral stabilizing feature to minimize problems created by float in size 8 contacts. An alternate tool is used to remove the contact if necessary. Tool number is 4311-0-1-0.

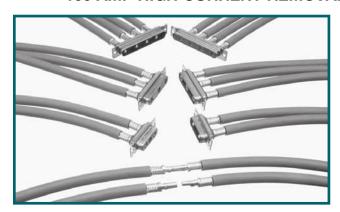

The stabilization feature is currently available for the following male contact variants:

What makes Positronic's PosiBand® contact interface significant?

- Higher reliability in harsh environments and repeated mating cycles.
- PosiBand crimp contacts do not need to be annealed. Split tine D-subminiature contacts are commonly annealed at the crimp barrel, with the possibility of reliability problems at the contact interface if the annealing is performed incorrectly.
- ✔ Electrical and mechanical function of the contact interface are separated since the PosiBand contact is a two-piece design. Contact normal force is provided by the "Posiband spring member", which allows higher mechanical reliability. The

electrical continuity path is supported through the base contact, which allows a greater number of electrical paths on a "micro" level when compared to split tine contact design.

Higher reliability at prices comparable to the "split tine" design.

PosiBand is protected by US Patent 7,115,002.

CONTACT REELS FOR AUTOMATIC PNEUMATIC CRIMP TOOLS

Contacts may be supplied in plastic carriers, packaged in reels holding 2,000 contacts for use with the automatic pneumatic crimp tools, catalog part number 9550-0-0-0 and 9550-1-0-0; packaged in reels holding 1,000 contacts for use with the automatic pneumatic crimp tools, catalog part number 9550-0-2-0. The same type carrier is used for both male and female contacts.

All male and female crimp contacts can be ordered in reels by adding letter "R" after the contact part number, such as MC8022DR for a male contact and FC112N4R for female contact.

*1 All male and female crimp contacts can be ordered on reels in quantities of 1,000 and 2,000 by adding letter "R" after the contact part number, see page 82 for more information.

*1 All male and female crimp contacts can be ordered on reels in quantities of 1,000 and 2,000 by adding letter "R" after the contact part number, see page 82 for more information.

SUGGESTED PRINTED BOARD HOLE SIZES FOR COMPLIANT PRESS-FIT CONNECTORS

Traditionally, tin-lead has been a popular plating for printed circuit board (PCB) holes. However, many PCB hole platings must now be RoHS Compliant. Positronic is pleased to offer PCB HOLE SIZE FOR RoHS PCB plating as shown below.

COMPLIANT PRESS-FIT USER INFORMATION

When properly used, Positronic Industries Bi-Spring Power or Omega Signal Press-Fit terminations provide reliable service even under severe conditions.

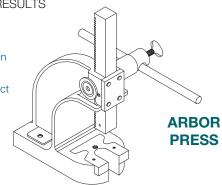

Connectors utilizing this leading technology press-fit contact are easy to install:

- 1. Inexpensive installation tooling is available from Positronic, to choose the proper installation tool refer to page 86 for part number ordering information.
- 2. Insert the connector into the P.C. board or backplane and seat connector fully.
- 3. Secure the connector to the P.C. board or backplane using two self-tapping screws. The screws should be 4-40 threads supplied by customer.

rcellence Positronic HIGH RELIABILITY Products amet

OWER

FEATURES:

- High current density Energy saving low contact resistance • Hot swap capability AC/DC operation in a single connector
- Signal contacts for hardware management • Blind mating • Sequential mating Large surface area contact mating system
- Wide variety of accessories Customer-specified contact arrangements
- Modular tooling which produces a single piece connector insert

Contact Sizes: **Current Ratings:** Terminations:

0, 8, 12, 16, 20, 22 and 24 To 200 amperes per contact

Crimp and fixed cable connector, straight solder, right angle (90°) solder, straight compliant press-in and right angle (90°) compliant

Multiple variants in a variety of package sizes PICMG 2.11, PICMG 3.0, VITA 41, DSCC, GSFC S-311-P-4, Configurations: Compliance:

GSFC S-311-P-10

BMINIAT

Contact Sizes: **Current Ratings:** Terminations:

8, 16, 20 and 22 To 100 amperes

Configurations:

Qualifications:

 Four performance levels available for best cost/performance ratio: professional, industrial, military and space-flight quality Options include high voltage, coax,

FEATURES:

- thermocouple and air coupling contacts; environmentally sealed and dual port connector packages including mixed density
- Broad selection of accessories
- Size 20 and 22 contacts suitable for use in carrying power
- IP65, IP67

Crimp, wire solder, straight solder, right angle (90°) solder, straight compliant press-in and right angle (90°) compliant press-in Multiple variants in both standard and high densities, seven connector

MIL-DTL-24308, GSFC S-311-P-4, GSFC S-311-P-10,

FEATURES:

- Two performance levels available: industrial quality and military quality
- A wide variety of accessories
- Broad selection of contact arrangement
- Connector coding device (keying) options

Contact Sizes: Current Ratings: Terminations:

Configurations:

Qualifications:

16, 20 and 22

To 13 amperes nominal

Crimp, wire solder, straight solder, right angle (90°) solder, and straight compliant press-in Multiple variants in both standard and high densities,

MIL-DTL-28748, AS39029, CCITT V.35

IRCULA

FEATURES:

- Non-corrodible / lightweight composite construction
- EMI/RFI shielded versions
- Thermocouple contacts
- Environmentally sealed versions
- Rear insertion/ front release of removable contacts
- Two level sequential mating
- Overmolding available on full assemblies

FEATURES: • Intended for use as an electrical

feedthrough in high vacuum applications

Helium leakage rate at ambient temperature: < 5x10⁻⁹ mbar.l/s under

Signal, power, coax and high voltage

Connectors can be mounted on flange

assembly per customer specification

a vacuum 1.5x10⁻² mbar

versions available

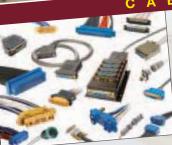

Contact Sizes:

Current Ratings: Terminations: Configurations:

12, 16, 20 and 22 To 25 amperes nominal

Crimp, wire solder, straight solder, and right angle (90°) solder Multiple variants in four package sizes

Environmental protection to IP67 Qualifications:

FEATURES:

- Shorten the supply chain and reduce additional costs and delays by "cablizing" your Positronic connector selection
- Overmolding available
- Shielded and environmentally sealed versions available
- Power cables and access boxes which meet the SAE J2496 specification
- Design assemblies in accordance with customer specifications.
- Prepare wire harness connector configuration and performance specifications.
- Design each system in accordance with applicable customer, domestic,
- and international standards. Define and conduct performance and verification testing.

Contact Sizes: **Current Ratings:** Terminations:

Configurations:

Compliance:

8, 12, 16, 20 and 22

To 40 amperes nominal

Feedthrough is standard; flying leads and board mount available See D-subminiature and circular configurations above
