

User's Guide

TAS6424MS-Q1 EVM

ABSTRACT

This manual describes the operations of the TAS6424MSQ1EVM. The TAS6424MSQ1EVM is a stand-alone EVM. The PurePath™ Control Console 3 GUI (PPC3) is used to initialize and operate the EVM. The main topics of this document are:

- Hardware implementation and descriptions
- Software implementation and descriptions
- TAS6424MS EVM operations (hardware and software)

Required equipment and accessories:

1. TAS6424MS EVM
2. USB A male to micro B male cable
3. 1-4 resistive loads or speaker loads
4. 2-6 pair of wires stripped both ends
5. 2-mm slotted screwdriver
6. Optical audio source (optional)
7. Optical SPDIF cable (optional)
8. Desktop or laptop PC with Microsoft® Windows® 7 operating system

2 Hardware Overview

2.1 TAS6424MS Evaluation Module Description

The TAS6424MS-Q1 EVM is a stand-alone EVM. It has single power supply input, USB control via PurePath Control Console 3 (PPC3) and two digital (I2S) audio input options. See the EVM block diagram in [Figure 2-1](#).

Figure 2-1. TAS6424MS-Q1 EVM

The block diagram shows the TAS6424MS EVM signal flow.

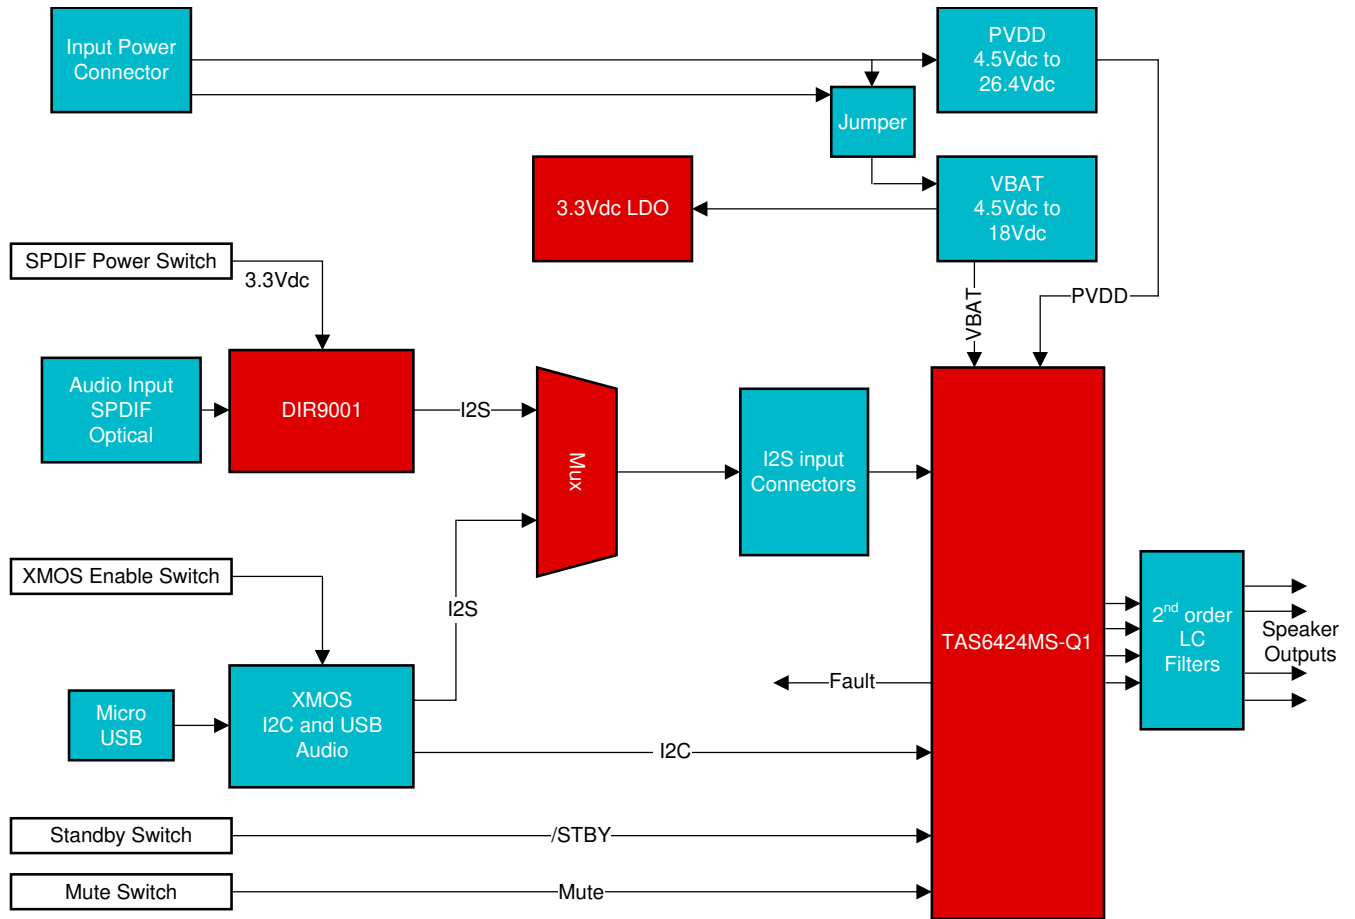

Figure 2-2. EVM Block Diagram

3 Software Overview

3.1 PurePath™ Console 3 (PPC3) Access and Description

The PPC3 is a server-based tool. Access can be requested on <http://www.ti.com/tool/PUREPATHCONSOLE>.

Once approval is given, go to www.ti.com/mysecuresoftware to download the software. After login, the user will see this web page with a similar list of software products available for download.

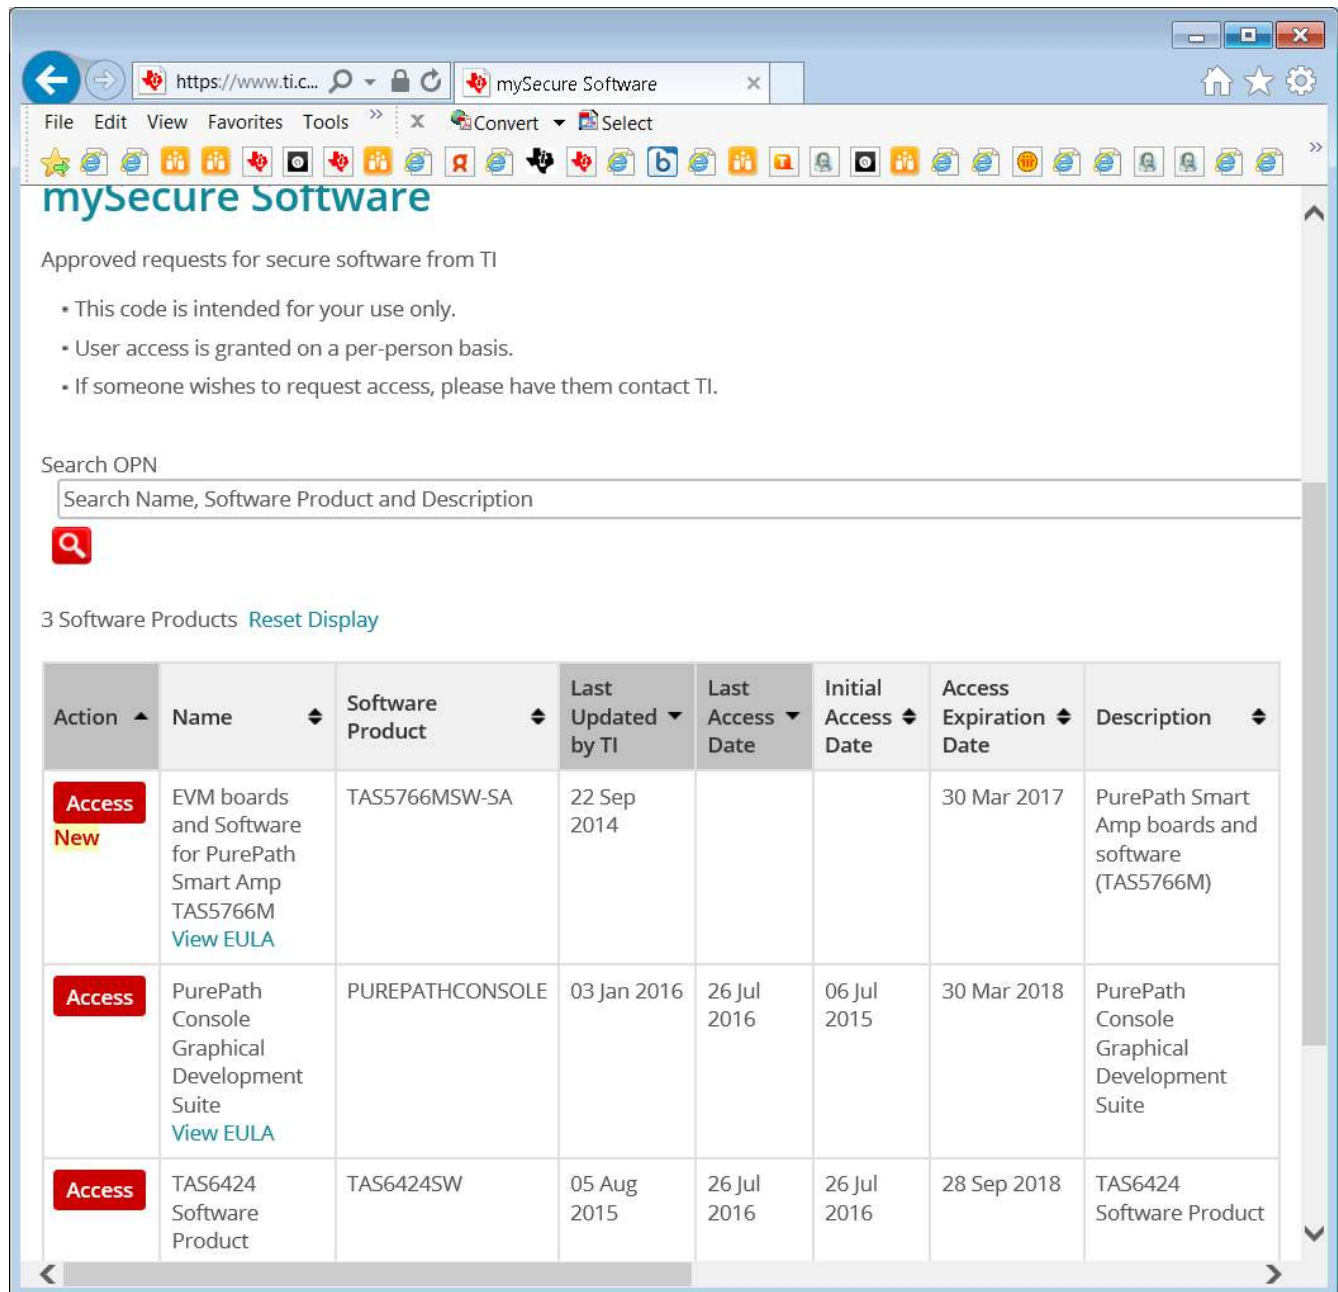

Figure 3-1. PPC3 Download Window

Run the installation program. Also download the PPC3 User Manual ([SLOU408](#)) for further instructions. The following window is displayed when first running PPC3.

Figure 3-2. PPC3 Window

When the window in [Figure 3-2](#) is displayed, click on “sign in” to see TAS6424 EVM application. All of the apps shown below may not be displayed for the user.

Click on TAS6424 App box to download TAS6424 application. Installation window will pop up, then click “Install”. TAS6424 EVM box will appear in “Installed EVM Apps” section, see [Figure 3-3](#). Click on TAS6424 box to launch TAS6424 App.

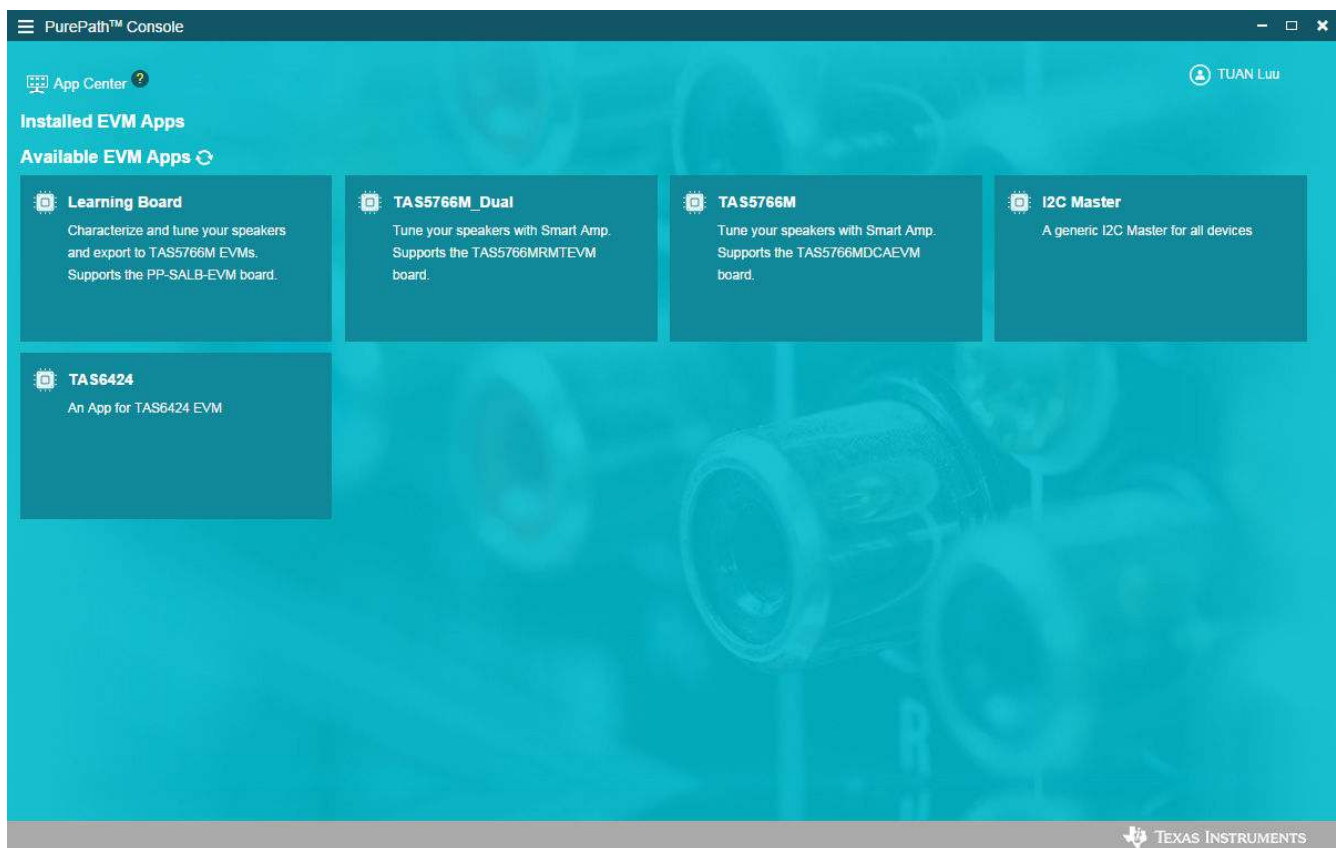

Figure 3-3. Available Apps Window

3.2 PurePath™ Console 3 – TAS6424 EVM Home Window

When the TAS6424 EVM PPC3 is launched, the Home Window is shown. If the EVM is powered on and the USB is connected to the PC, the Home Window will display “Connect” box in the bottom right hand corner. If the EVM is not powered on or the USB is not connected, only “TAS6424 EVM – Offline” is displayed.

Figure 3-4 shows the downloading progress of TAS6424MS applications.

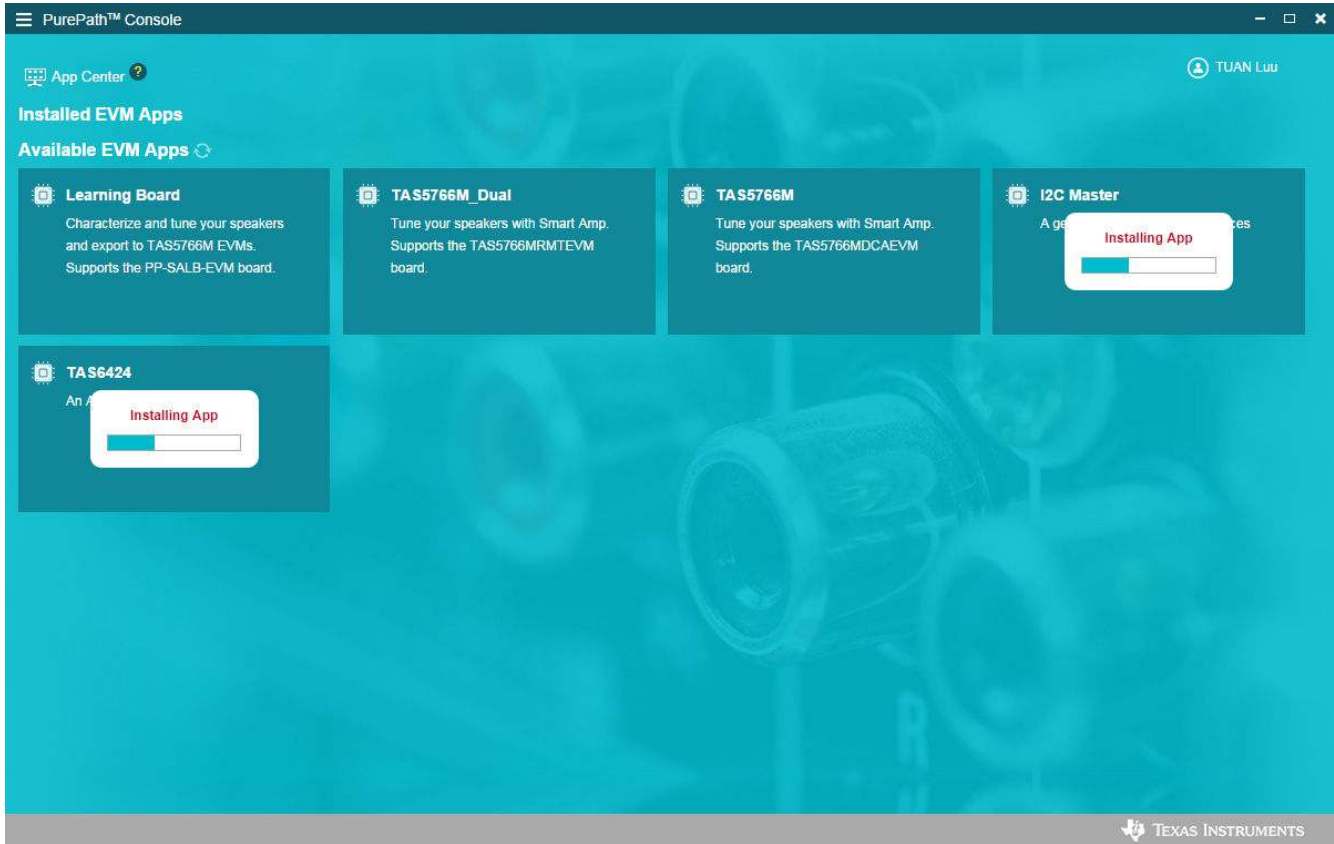

Figure 3-4. PPC3 Window

There are three windows available with the TAS6424 EVM PPC3: Home Window, Register Map Window and Device Monitor and Control Window.

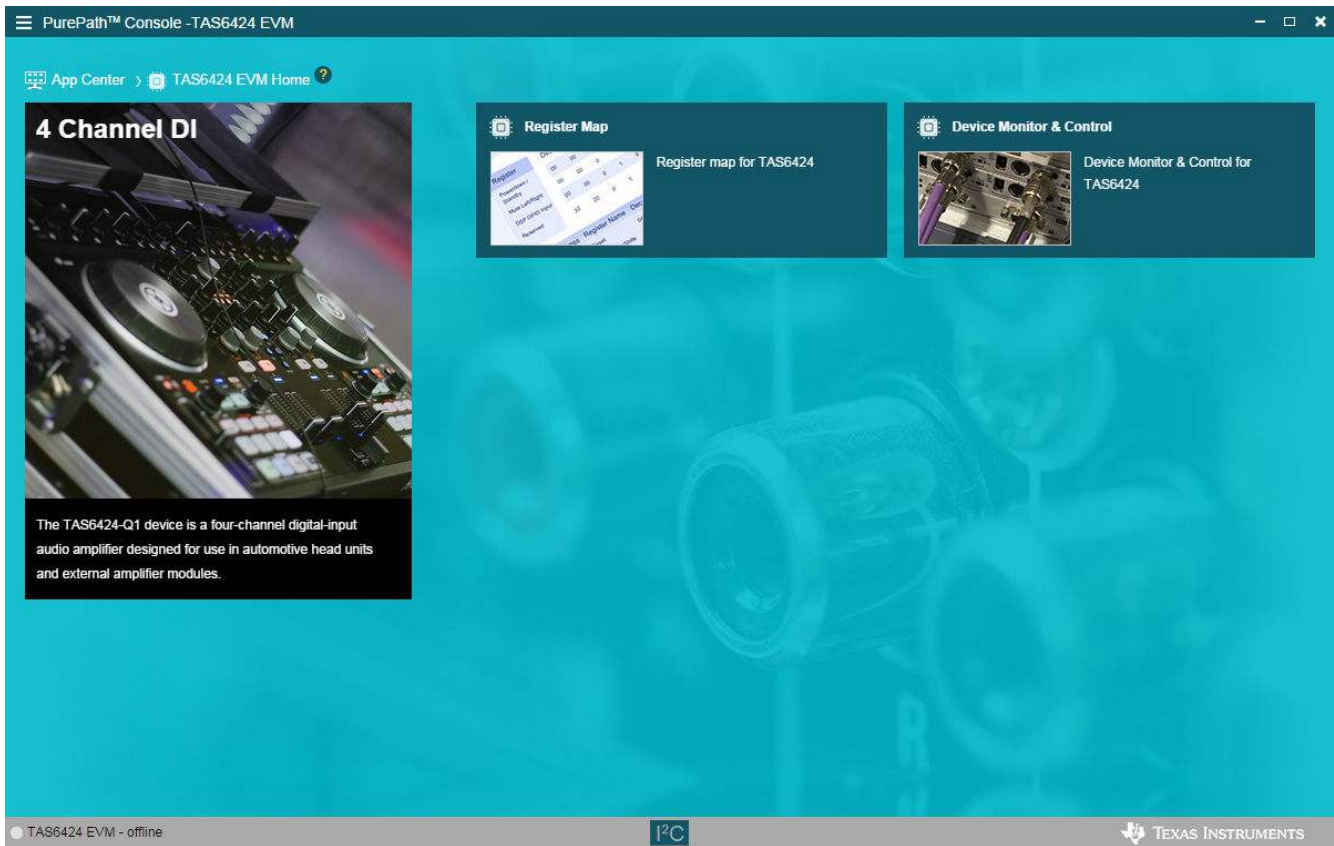

Figure 3-5. TAS6424 EVM Home Window

3.3 PurePath™ Console 3 – TAS6424 EVM Register Map Window

When click on Register Map Box on the Home Window, the Register Map Window is displayed. The Register Map indicates the current setting of all the registers in TAS6424MS.

The screenshot shows the 'Register Map' window in the PurePath™ Console. The window title is 'PurePath™ Console - TAS6424 EVM'. The breadcrumb navigation is 'App Center > TAS6424 EVM Home > Register Map'. There is a 'Read All Registers' button in the top right of the register list.

DC LDG Report LO	0x0E	0x00	0	0	0	0	0	0	0	0

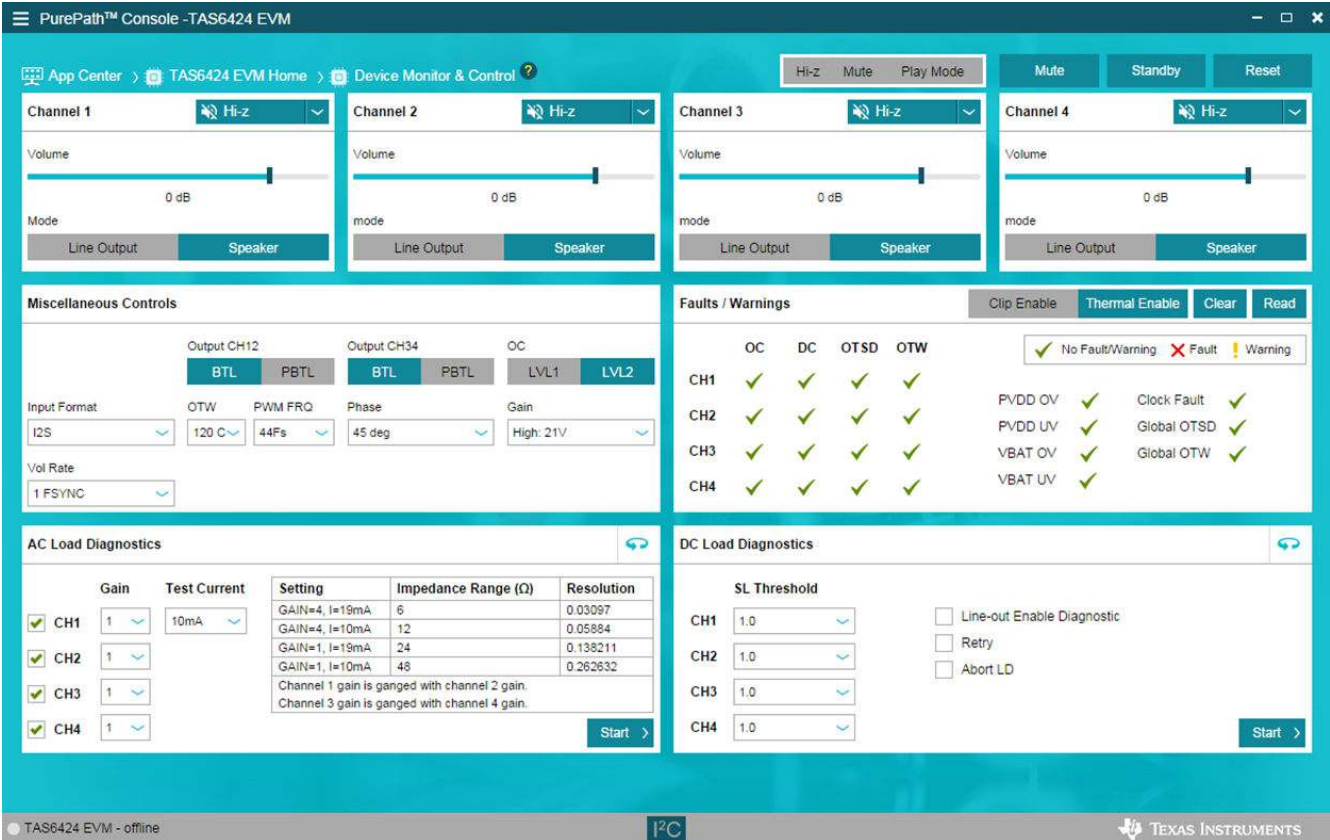

The 'Fields' panel on the right is currently empty, with a 'Description' header.

At the bottom of the window, there is a status bar showing 'TAS6424 EVM - offline', a temperature indicator '12°C', and the Texas Instruments logo.

Figure 3-6. TAS6424 EVM Register Map Window

3.4 PurePath™ Console 3 – TAS6424 EVM Monitor and Control Window

When click on Device Monitor and Control Box on the Home Window, the Device Monitor and Control Window is displayed.

3.5 TAS6424MS EVM Start Up

This section describes the TAS6424MS start-up procedure. Have the equipment and accessories listed on the first page of this document available.

3.5.1 TAS6424MS EVM Setup

Hardware and software connections:

- Desk top or laptop PC running Windows 7. Open PPC3 GUI.
- Connect 14.4 VDC PSU to TAS6424MS EVM
- Connect speakers or resistive loads to TAS6424MS EVM
- Connect USB micro cable from PC to the EVM
- Set the switches (SPDIF, STANDBY, MUTE) to up positions
- Turn on the PSU
- Audio source: This can be a DVD player with optical SPDIF cable or Windows Media Player from PC
- At this point, 3.3 V LED, USB-LOCK LED and SPDIF-LOCK LED (if optical SPDIF is used) are on.
- If the SPDIF LED is not on, the default I2S input is the USB audio source.
- On the PPC3 window, launch TAS6424 EVM application
- The audio can be streamed now to the speakers. Go to the GUI and click on “Device Monitor & Control” box. Click on play button located on the top right of the window.
- The following sections describe in detail the register settings of TAS6424MS.

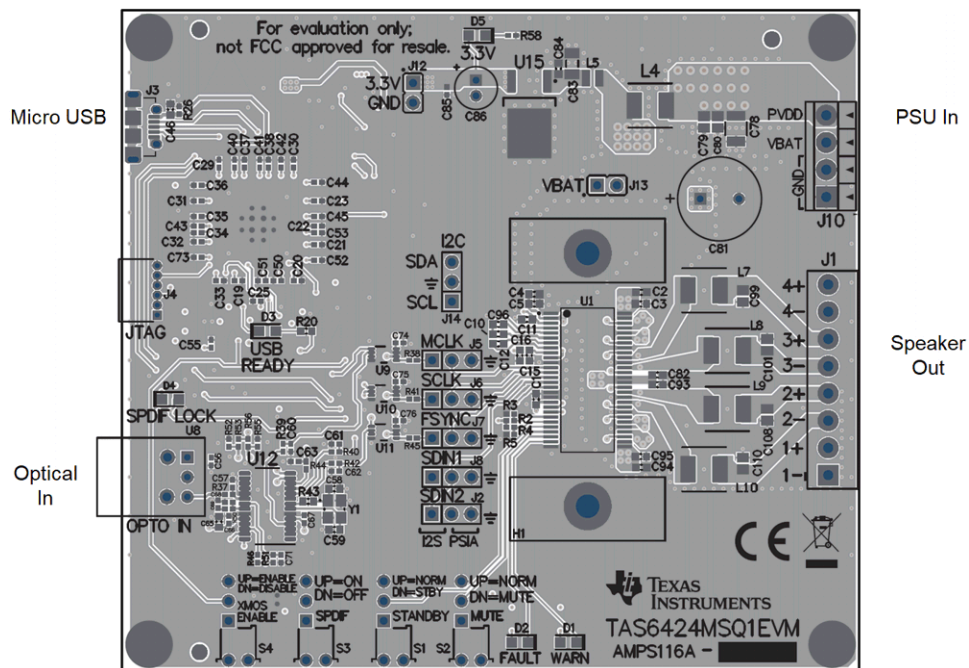

Figure 3-8. TAS6424MS EVM Connection

3.5.2 TAS6424MS Settings on Device Monitor and Control Window

The TAS6424 Register Map window is for reference. Most of the register settings are done on the Device Monitor and Control window

Click on “CONNECT” button on the bottom left corner of the TAS6424 EVM application window, see [Figure 3-9](#). The LED next to the TAS6424 EVM changes from gray to green and the “CONNECT” button changes to “DISCONNECT” button.

Click on the TAS6424 Device Monitor and Control box. The following window is displayed.

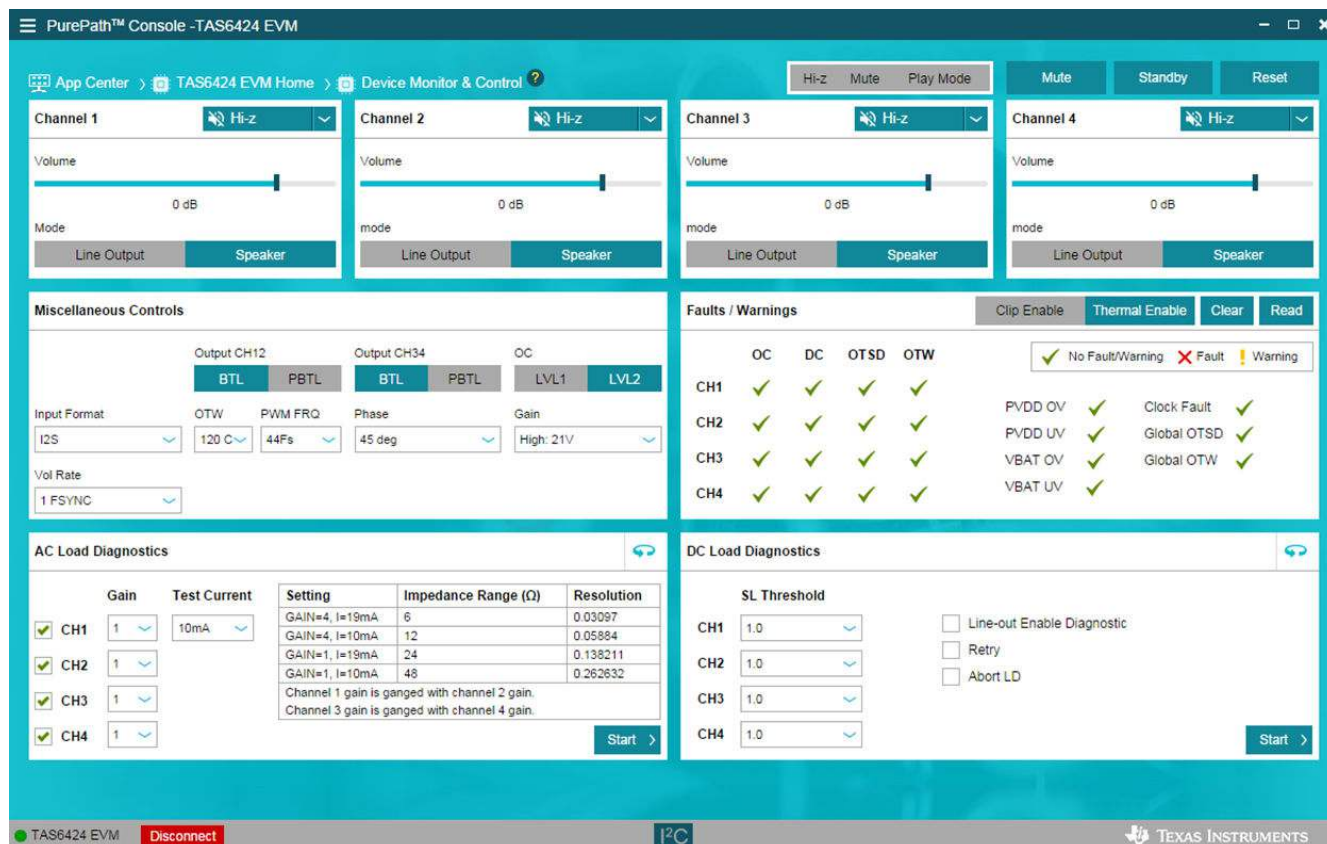

Figure 3-9. Device Monitor and Control Window

This window has 6 major sections: Global Control Section, Channel Control Section, Miscellaneous Control Section, Faults and Warnings Section, AC Load Diagnostics Section and DC Load Diagnostics Section.

3.5.2.1 Global Control Section

The Hi-Z, Mute and Unmute buttons with the gray background controls all 4 channels at the same time. When Hi-Z is selected, all 4 channels are put in Hi-Z. The display for each channel in the channel control section will reflect these buttons selections.

The Mute Pin button is the GPIO pin controlling the mute function of the device.

The Standby button is the GPIO pin controlling the standby function of the device.

The Reset button is software reset. This will put the device back in default settings.

Figure 3-10. Global Control Section

3.5.2.2 Channel Control Section

Each channel has the same setting selections: Hi-Z, Mute, Play, Volume, Line-out mode and Speaker mode.

The drop down menu allows user to select either Hi-Z, Mute or Play state of each channel.

The volume slide controls the digital gain of each channel.

The default setting for each channel is speaker mode. If line-out is used, select Line Output button.

Figure 3-11. Channel Control Section

3.5.2.3 Miscellaneous Control Section

There are miscellaneous settings that are available on the GUI for easy access.

OSR is oversampling bit. For lower idle noise 64X OSR is set as default. For wider bandwidth, 128X OSR can be used. 64X OSR is recommended.

TAS6424MS supports parallel Bridge-Tied Load. Channels 1 and 2 can be one PBTL channel and channels 3 and 4 can be the other. Before setting a set of channels to PBTL mode, connect the (+) terminals as PBTL channel (+) and the (-) terminals as PBTL channel (-). Then connect the speaker (+) to the PBTL channel (+) and connect the speaker (-) to the PBTL channel (-).

The over-current has two levels. The lower level is 1. The default is level 2. When running at lower output current, OC level can be set to level1.

I2S and TDM are automatically detected. Use the pull down menu from "Input Format" box to manually select the audio format. If sampling frequency is greater than 48 kHz, select 96 kHz from the "Input FS" pull down.

Over-temperature warning can be programmable, use the pull down menu to choose the OTW temperature. The default setting is 120°C.

The output switching frequency (FSW) or Pulse Width Modulation frequency (PWM) is set at 2.1 MHz. The pull-down menu on the PWM FRQ box is used to choose a different FSW. LC value should be adjusted when FSW is changed.

The offset phase for each channel is set at 45 degrees. This helps lower the ripple current on the power supply as not all the channels switch at the same time. To choose a different phase offset, use the pull-down menu on the "Phase" box.

There are four gain settings in TAS6424MS: low, normal, high and maximum. The default setting is high. However, the recommended setting is normal for lower noise performance for driving speakers at 14.4 VDC. The gain setting is selectable via the drop down menu in the "Gain" box.

The volume slew rate is measured with sampling frequency. The default setting is 1 period of sampling frequency (FSYNC or FS). This rate is selectable from 1 to 8 sampling periods with the drop down menu under "Vol Rate" box.

Figure 3-12. Miscellaneous Control Section

3.5.2.4 Faults and Warnings Section

The top right buttons on this box serve as controlling and monitoring faults.

Clip enable route the clip detection bit to the warning pin. This is displayed as yellow LED on the EVM.

Thermal enable route the over-temperature warning bit to the warning pin. This is display as the same yellow LED on the EVM.

Clear button clears all the faults and warnings.

Read button manually read the faults and warnings.

Faults / Warnings					Clip Enable	Thermal Enable	Clear	Read

CH4	✓	✓	✓	✓	VBAT UV	✓		

Figure 3-13. Faults and Warnings Section

3.5.2.5 AC Load Diagnostics Section

AC load diagnostics report speaker impedance and phase. The diagnostics can be performed with one or all four channels.

Select the correct output impedance and click start. Follow the pop up instructions to complete the load diagnostics run.

Note

Make sure to set the digital input to 0 dBFS (100% full-scale). If the sine wave is provided from the USB audio, turn the audio media volume and PC sound card volume to maximum.

Click on the “flip” icon located on the top right of the AC load diagnostics box to see the results.

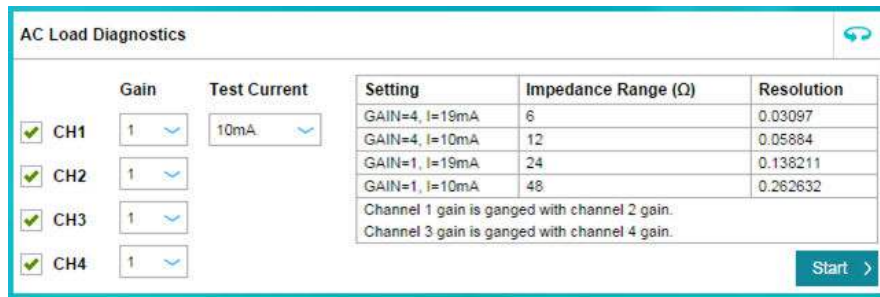

Figure 3-14. AC Load Diagnostics Section

3.5.2.6 DC Load Diagnostics Section

The DC load diagnostics report if a channel is short to power, short to ground, short to load or open.

Select the impedance of the load from 0.5 to 5 Ω. Click start and then click the “flip” on the top right of the box to view results.

If a channel is selected as a line-out, click on “LO ENA LD” to enable line-out load diagnostics.

“Retry” box is used when DC load diagnostics are run more than one time.

DC load diagnostics can be aborted by click on the “Abort LD” box.

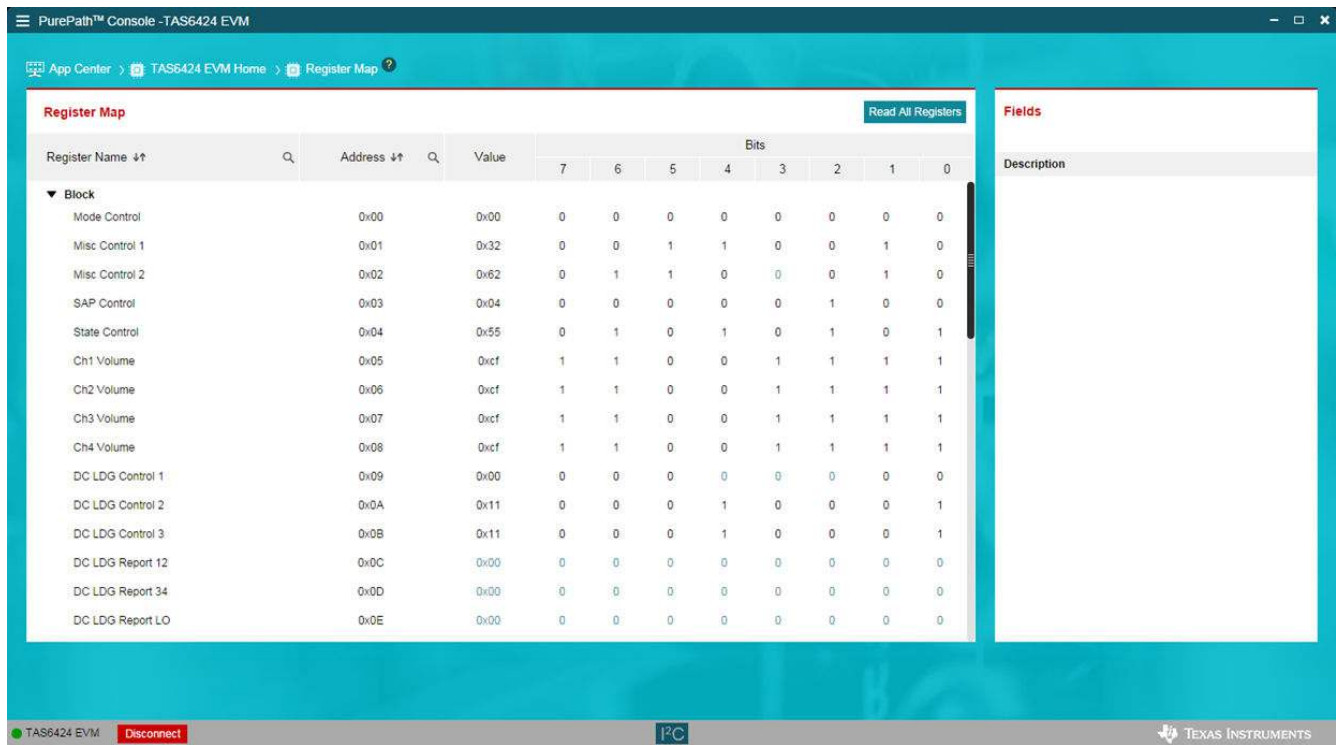

Figure 3-15. DC Load Diagnostics Section

3.5.3 TAS6424MS Settings on Register Map Window

The register map can be sorted either alphabetically or numerically (register number).

Figure 3-16. Register Map Window

Fields

Description

TAS6424 EVM Disconnect PC TEXAS INSTRUMENTS

When a register is selected, the hex value along with the individual bit value is displayed. The name and description for each bit are shown to the right in the "Fields" box.

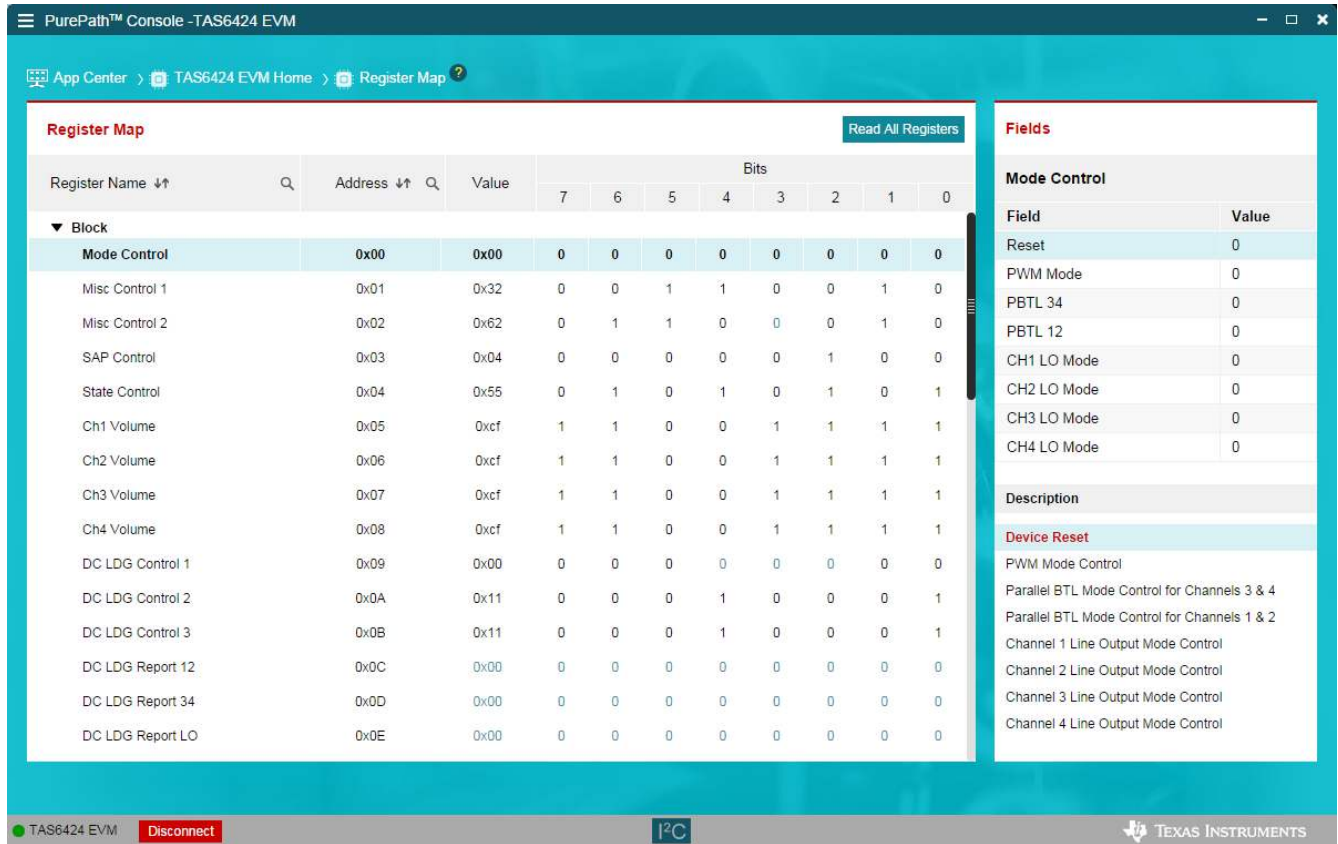

Figure 3-17. Register Map Window - Expanding

Double click on any bit, the bit will change state. This state is executed at the end of the click.

3.5.4 I2C Window

The PPC3 has an I2C monitor and also configuration program options.

When this window is first open, the round button is green. To record I2C commands, click on this button and it will turn red. The recording can be saved for later used by clicking the save icon.

The I2C commands can also be copied to clip board by clicking the icon next to trash bin icon.

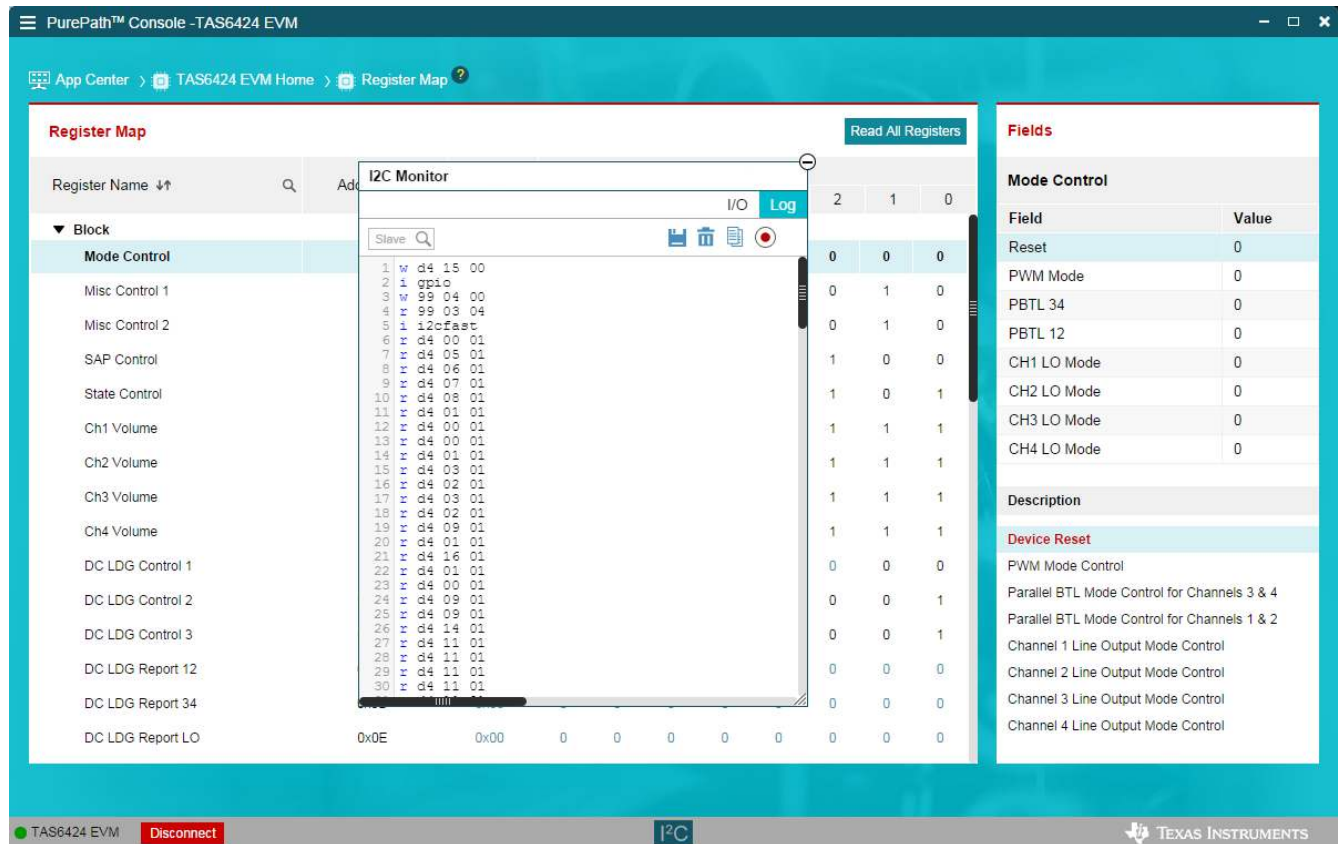

Figure 3-18. I2C Window – I2C Logging

A set of I2C commands can be loaded and executed from this window. On the top right corner, click on “I/O” button to display the above window. Write I2C commands here or open an existing *.cfg file then click “Execute” button on the bottom left corner. The I2C commands are sent to the device when the “Execute” button is pressed.

J10	1		Terminal Block, 3.5mm Pitch, 4x1, TH	14x8.2x6.5 mm	ED555/4DS	On-Shore Technology		
J13	1		Header, 100mil, 2x1, Gold, TH	Sullins 100mil, 1x2, 230 mil above insulator	PBC02SAAN	Sullins Connector Solutions		
L1, L2, L7, L8, L9, L10, L11, L12	8	3.3uH	Inductor, 3.3 uH, 4.5 A, 0.038 ohm, AEC-Q200 Grade 0, SMD	5.45x5.25x3.0mm	VCMT053T-3R3MN5	Cyntec		
L3	1	30 ohm	Ferrite Bead, 30 ohm @ 100 MHz, 6 A, 0805	0805	MPZ2012S300AT000	TDK		

Designator	Quantity	Value	Description	Package Reference	PartNumber	Manufacturer	Alternate PartNumber	Alternate Manufacturer
L4	1	1.5uH	Inductor, 1.5 uH, 5.5 A, 0.017 ohm, AEC-Q200 Grade 0, SMD	5.45x5.25x3 .0mm	VCMT053T-1R5MN5	Cyntec		
L5	1	180 ohm	Ferrite Bead, 180 ohm @ 100 MHz, 3.4 A, 0806	0806	NFZ2MSM181SN10L	MuRata		
L6	1	2.2uH	Inductor, Multilayer, Ferrite, 2.2 uH, 1.3 A, 0.08 ohm, SMD	SMD, Body 2.5x2mm, Height 1.2mm	LQM2HPN2R2MG0L	MuRata		
Q1	1	40 V	Transistor, PNP, 40 V, 0.2 A, SOT-23	SOT-23	MMBT3906-7-F	Diodes Inc.		
R3, R5, R7, R9, R46, R48, R53, R55	8	4.99k	RES, 4.99 k, 1%, 0.063 W, AEC-Q200 Grade 0, 0402	0402	CRCW04024K99FKED	Vishay-Dale

S1, S2, S3, S4	4		Switch, SPDT, On-On, 1 Pos, 0.4A, 28 VDC, TH	5.6x5.4mm	FT1D-4M-Z	Copal Electronics		
SH1, SH2, SH3, SH4, SH5, SH6	6	1x2	Shunt, 100mil, Gold plated, Black	Shunt	SNT-100-BK-G	Samtec	969102-0000-DA	3M
U1	1		45-W, 2-MHz Digital Input 4-Channel Automotive Class-D Audio Amplifier with Load Dump Protection and I 2C Diagnostics	HSSOP56	TAS6424MSQDKQRQ1	Texas Instruments		
U2	1		IC MCU 512KB RAM, 128TQFP	TQFP-128	XEF216-512-TQ128-C20	XMOS semiconductor		
U3	1		OSC, 24 MHz, 2.25 - 3.63 V, SMD	2x1.6mm	ASTMLPA-24.000MHZ-EJ-E-T	Abracon Corporation		
U4	1		Dual-Bit Dual-Supply Bus Transceiver, DQE0008A, LARGE T&R	DQE0008A	SN74AVC2T244DQER	Texas Instruments		
U5	1		Programmable 1-PLL VCXO Clock Synthesizer with 2.5-V or 3.3-V LVCMOS Outputs, PW0014A (TSSOP-14)	PW0014A	CDCE913PWR	Texas Instruments	CDCE913PW	Texas Instruments
U6	1		Single-Channel Ultra-Small Adjustable Supervisory Circuit With Active-High Open-Drain Output, DRY0006A (USON-6)	DRY0006A	TPS3897ADRYR	Texas Instruments		
U7	1		Enhanced Product Dual Buffer/Driver with Open-Drain Output, DCK0006A (SOT-SC70-6)	DSF0006A	SN74LVC2G07DSFR	Texas Instruments		
U8	1		Photolink- Fiber Optic Receiver, TH	13.5x10x9.7 mm	PLR135/T10	Everlight		

Designator	Quantity	Value	Description	Package Reference	PartNumber	Manufacturer	Alternate PartNumber	Alternate Manufacturer
U9, U10, U11, U13	4		Single 2-Line to 1-Line Data Selector/Multiplexer, DCU0008A, LARGE T&R	DCU0008A	SN74LVC2G157DCUR	Texas Instruments	SN74LVC2G157DCUT	Texas Instruments
U12	1		Automotive Catalog 96-kHz 24-Bit Digital Audio Interface Receiver, 50 ps Jitter, 3.3V, -40 to 85 degC, 28-Pin TSSOP (PW), Green (RoHS & no Sb/Br)	PW0028A	DIR9001IPWQ1	Texas Instruments		
U14	1		5.5V, 4A, 16mΩ Automotive Load Switch With Adjustable Rise Time and Optional Quick Output Discharge, DSG0008B (WSON-8)	DSG0008B	TPS22965TDSGRQ1	Texas Instruments	TPS22965TDSGTQ1	Texas Instruments
U15	1		Single Output Automotive LDO, 500 mA, Fixed 3.3 V Output, 3.8 to 26 V Input, 3-pin PFM (KVU), -40 to 125 degC, Green (RoHS & no Sb/Br)	KVU0003A	TL760M33QKVURQ1	Texas Instruments		
U16	1		Single Output LDO, 400mA, Adj. (1.2 to 5.5V), Cap free, Low Noise, Reverse Current Protection, DBV0005A (SOT-23-5)	DBV0005A	TPS73618DBVR	Texas Instruments		
U17	1		1-A High Efficiency Step-Down Converter in SOT23-5 Package, DBV0005A, DBV0005A (SOT-5)	DBV0005A	TLV62568DBVR	Texas Instruments	TLV62568DBVT	Texas Instruments
Y1	1		Crystal, 12.288 MHz, 18pF, SMD	Crystal, 2.5x1x3.2mm	ABM8G-12.288MHZ-18-D2Y-T	Abracon Corporation		
J12	0		Header, 100mil, 2x1, Gold, TH	Sullins 100mil, 1x2, 230 mil above insulator	PBC02SAAN	Sullins Connector Solutions		
R2, R4, R52, R56	0	4.99k	RES, 4.99 k, 1%, 0.063 W, AEC-Q200 Grade 0, 0402	0402	CRCW04024K99FKED	Vishay-Dale		

5 Revision History

NOTE: Page numbers for previous revisions may differ from page numbers in the current version.

DATE	REVISION	NOTES
October 2020	*	Initial Release

IMPORTANT NOTICE AND DISCLAIMER

TI PROVIDES TECHNICAL AND RELIABILITY DATA (INCLUDING DATA SHEETS), DESIGN RESOURCES (INCLUDING REFERENCE DESIGNS), APPLICATION OR OTHER DESIGN ADVICE, WEB TOOLS, SAFETY INFORMATION, AND OTHER RESOURCES "AS IS" AND WITH ALL FAULTS, AND DISCLAIMS ALL WARRANTIES, EXPRESS AND IMPLIED, INCLUDING WITHOUT LIMITATION ANY IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT OF THIRD PARTY INTELLECTUAL PROPERTY RIGHTS.

These resources are intended for skilled developers designing with TI products. You are solely responsible for (1) selecting the appropriate TI products for your application, (2) designing, validating and testing your application, and (3) ensuring your application meets applicable standards, and any other safety, security, regulatory or other requirements.

These resources are subject to change without notice. TI grants you permission to use these resources only for development of an application that uses the TI products described in the resource. Other reproduction and display of these resources is prohibited. No license is granted to any other TI intellectual property right or to any third party intellectual property right. TI disclaims responsibility for, and you will fully indemnify TI and its representatives against, any claims, damages, costs, losses, and liabilities arising out of your use of these resources.

TI's products are provided subject to [TI's Terms of Sale](#) or other applicable terms available either on ti.com or provided in conjunction with such TI products. TI's provision of these resources does not expand or otherwise alter TI's applicable warranties or warranty disclaimers for TI products.

TI objects to and rejects any additional or different terms you may have proposed.
