Description

The STEVAL-CCA048V1 demonstration board is based on the STA333ML Sound Terminal[®] digital amplifier. It provides full digital audio streaming to the speakers and offers cost effectiveness, low power dissipation, sound enrichment and DDX[®] power output stage.

To evaluate the STA333ML, the STEVAL-CCA048V1 does not require a microcontroller, and it accepts the universal I²S format. However, the board may be connected to APWlink (STEVAL-CCA035V1) as I²S interface.
