

**MATERIAL**

Glass-fibre reinforced polyamide based (PA) technopolymer, black colour, matte finish.

**STANDARD EXECUTIONS**

- **SC.GXX2:** three couples of dimples on the bottom of the housing (to drill according to the type of indicator) and two supplied M4x14 countersunk head screws.
- **SC.GXX5:** two holes for supplied M4x14 countersunk head screws.

**APPLICATIONS**

SC-XX indicator housings are suitable with gravity indicators on any handwheel or other control devices.

**MATERIAL**

Polyester based (PBT) technopolymer.

**COLOUR**

Light grey, matte finish.

**MOUNTING**

Push-fit. The cover can be removed by using a screwdriver in the proper cavity.

**APPLICATIONS**

CP-XX covers are suitable for closing the indicator housing when the indicator is not required.
