

PART NO:

DELTA MODEL:

BFB1012H-R00

INSULATION STRENGTH	10 MEG OHM MIN. AT 500 VDC (BETWEEN FRAME AND (+) TERMINAL)
DIELECTRIC STRENGTH	5 mA MAX. AT 500 VAC 60 Hz ONE MINUTE, (BETWEEN FRAME AND (+) TERMINAL)
EXTERNAL COVER	OPEN TYPE
LIFE EXPECTANCE	50,000 HOURS CONTINUOUS OPERATION AT 40 °C WITH 15 ~ 65 %RH.
ROTATION	CLOCKWISE VIEW FROM NAME PLATE SIDE
OVER CURRENT SHUT DOWN	THE CURRENT WILL SHUT DOWN WHEN LOCKING ROTOR
INSULATION TYPE	UL: CLASS A
LEAD WIRE	UL 1007 -F- AWG #24 BLACK WIRE NEGATIVE(-) RED WIRE POSITIVE(+) BLUE WIRE LOCK SIGNAL(-R00)

- NOTES: 1. ALL READINGS ARE MEASURED AFTER STABLY WARMING UP THROUGH 10 MINUTES.  
2. THE VALUES WRITTEN IN PARENS , ( ), ARE LIMITED SPEC.  
3. ACOUSTICAL NOISE MEASURING CONDITION:

NOISE IS MEASURED AT RATED VOLTAGE IN FREE AIR IN ANECHOIC CHAMBER WITH B & K SOUND LEVEL METER WITH MICROPHONE AT A DISTANCE OF ONE METER FROM THE FAN INTAKE.

8. BASIC RELIABILITY REQUIREMENT:

8-1. THERMAL            LOW TEMPERATURE: -40°C  
CYCLING                HIGH TEMPERATURE: +80°C  
                          SOAK TIME: 30 MINUTES  
                          TRANSITION TIME < 5 MINUTES  
                          DUTY CYCLES: 5

8-2. HUMIDITY           TEMPERATURE: +25°C ~ +65°C  
EXPOSURE                HUMIDITY: 90-98% RH @ +65°C  
                                        FOR 4 HOURS/CYCLE  
                          POWER: NON-OPERATING  
                          TEST TIME: 168 HOURS

8-3. VIBRATION         TEMPERATURE: +25°C  
                          ORIENTATION: X, Y, Z  
                          POWER: NON-OPERATING  
                          VIBRATION LEVEL: OVERALL  $g_{RMS}=3.2$

FREQUENCY(Hz)	PSD( $G^2/Hz$ )
10	0.040
20	0.100
40	0.100
800	0.002
1000	0.002

TEST TIME: 2 HOURS ON EACH ORIENTATION

8-4. MECHANICAL        TEMPERATURE: +20°C  
SHOCK                    ORIENTATION: X, Y, Z  
                          POWER: NON-OPERATING  
                          ACCELERATION: 20 G MIN.  
                          PULSE: 11 ms HALF-SINE WAVE  
                          NUMBER OF SHOCKS: 5 SHOCKS  
                                        FOR EACH DIRECTION

8-5. LIFE                TEMPERATURE: MAX , OPERATING TEMPERATURE  
                          POWER: OPERATING  
                          DURATION: 1000 HOURS MIN.

### 11. ROTATION DETECT (RD) SIGNAL:

#### 1. OUTPUT CIRCUIT - OPEN COLLECTOR MODE:

#### CAUTION:

THE LEAD WIRE OF RD SIGNAL CAN NOT TOUCH THE LEAD WIRE OF POSITIVE OR NEGATIVE.

#### 2. SPECIFICATION:

$V_{CE(sat)} = 0.5V$  MAX.

$V_{RD} = 30VDC$  MAX.

$I_c = 5mA$  MAX.

$R \geq V_{RD}/I_c$

#### 3. ROTATION DETECT WAVEFORM:

$T_0 = 350 \pm 105ns$

$T_2 = 3.1 \pm 0.93s$

$T_1 = 1 \pm 0.5s$

$T_3 = 500 \pm 150ms$

## **Descriptions:**

- 1. Delta will not guarantee the performance of the products if the application condition falls outside the parameters set forth in the specification.**
- 2. A written request should be submitted to Delta prior to approval if deviation from this specification is required.**
- 3. Please exercise caution when handling fans. Damage may be caused when pressure is applied to the impeller, if the fans are handled by the lead wires, or if the fans are hard-dropped to the production floor.**
- 4. Except as pertains to some special designs, there is no guarantee that the products will be free from any such safety problems or failures as caused by the introduction of powder, droplets of water or encroachment of insect into the hub.**
- 5. The above-mentioned conditions are representative of some unique examples and viewed as the first point of reference prior to all other information.**
- 6. It is very important to establish the correct polarity before connecting the fan to the power source. Positive (+) and Negative (-). Damage may be caused to the fans if connection is with reverse polarity, as there is no foolproof method to protect against such error.**
- 7. Delta fans are not suitable where any corrosive fluids are introduced to their environment.**
- 8. Please ensure all fans are stored according to the storage temperature limits specified. Do not store fans in a high humidity environment. We highly recommend performance testing is conducted before shipping, if the fans have been stored over 6 months.**
- 9. Not all fans are provided with the Lock Rotor Protection feature. If you impair the rotation of the impeller for the fans that do not have this function, the performance of those fans will lead to failure.**
- 10. Please be cautious when mounting the fan. Incorrect mounting of fans may cause excess resonance, vibration and subsequent noise.**
- 11. It is important to consider safety when testing the fans. A suitable fan guard should be fitted to the fan to guard against any potential for personal injury.**
- 12. Except where specifically stated, all tests are carried out at relative (ambient) temperature and humidity conditions of 25°C, 65%. The test value is only for fan performance itself.**
- 13. Be certain to connect an “over 4.7µF” capacitor to the fan externally when the application calls for using multiple fans in parallel, to avoid any unstable power.**
