

HFBR-1505AFZ/2505AFZ (SMA Tx/Rx for SERCOS)
HFBR-1515BFZ/2515BFZ (ST[®] Tx/Rx for PROFIBUS)
HFBR-1505CFZ/2505CFZ (SMA Tx/Rx for INTERBUS-S)
Full Metal Fiber Optic Transmitters and Receivers
for SERCOS, PROFIBUS and INTERBUS-S Applications

Data Sheet

Description

SERCOS

SERCOS, an acronym for **S**ERial **R**ealtime **C**ommunications **S**ystem, is a standard digital interface for communication in industrial CNC applications. SERCOS is a European (EN 61491) and international standard (IEC 61491). The optical interface allows data rates of 2, 4, 8, and 16 MBd and data transfer between numerical controls and drives via fiber-optic rings, with voltage isolation and noise immunity. The HFBR-1505AFZ and HFBR-2505AFZ products comply with SERCOS specifications for optical characteristics and connector style, and have guaranteed performance up to 10 MBd. (16MBd SERCOS device is also available, please contact Avago for more information.)

PROFIBUS

PROFIBUS, an acronym of **PRO**cess **F**ield **BUS**, is an open fieldbus standard defined for data rates ranging from 9.6 kBd to 12 MBd in selectable steps for wire and optical fiber. PROFIBUS is a German national DIN 19245 standard and a European CENELEC standard EN 50170. The ST[®] connector is the recommended optical port of the PROFIBUS optical fiber version but other connectors are allowed as well. The HFBR-1515BFZ and HFBR-2515BFZ comply fully to the technical guideline using Plastic Optical Fiber up to 6 MBd, and have a guaranteed performance at data rates up to 10 MBd.

INTERBUS-S

INTERBUS-S, a special open Sensor/Actuator Bus, is finding a broad acceptance in the factory automation industry. The HFBR-1505CFZ and HFBR-2505CFZ were specially designed for this application and can be used with 1 mm POF and 200 μ m HCS fiber at the specified data rates of 500 kBd and 2 MBd. The optical transmission guideline is a supplement of the German National DIN E 19258 standard draft. On the European level, prEN 50254 is the draft of the INTERBUS-S fieldbus.

Features

- Meets industrial SERCOS, PROFIBUS, and INTERBUS-S standard
- SMA and ST[®] ports
- 650 nm wavelength technology
- Metal housing and port
- Specified for use with 1 mm plastic optical fiber and 200 μ m hard clad silica
- Auto-insertable and wave solderable
- DC – 10 MBd data rate
- RoHS-compliant

Applications

- Industrial control data links
- Factory automation data links
- Voltage isolation applications
- PLCs
- Motor drives
- Sensor, meter and actuator interfaces

ST[®] is a registered trademark of AT&T.

HCS[®] is a registered trademark of OFS Corporation.

Package Information

All HFBR-X5X5XFZ series transmitters and receivers are housed in a dual-in-line metal package that is high strength. The package is designed for auto-insertion and wave soldering so it is ideal for high volume production applications.

Handling and Design Information

When soldering, it is advisable to leave the protective cap on the unit to keep the optics clean. Good system performance requires clean port optics and cable ferrules to avoid obstructing the optical path. Clean compressed air often is sufficient to remove particles of dirt; methanol on a cotton swab also works well.

Recommended Chemicals for Cleaning/Degreasing HFBR-X5X5XFZ Products

Alcohols: methyl, isopropyl, isobutyl.

Aliphatics: hexane, heptane.

Other: soap solution, naphtha.

Do not use partially halogenated hydrocarbons such as 1,1,1 trichloroethane, ketones such as MEK, acetone, chloroform, ethyl acetate, methylene dichloride, phenol, methylene chloride or N-methylpyrrolidone. Also, Avago does not recommend the use of cleaners that use halogenated hydrocarbons because of their potential environmental harm.

CAUTION: The small junction size inherent in the design of these components increases the components' susceptibility to damage from electrostatic discharge (ESD). It is advised that normal static precautions be taken in handling and assembly of these components to prevent damage and/or degradation which may be induced by ESD.

Specified Link Performance

-40°C to +85°C unless otherwise noted.

Parameter	Symbol	Min.	Max.	Unit	Condition	Reference
Link Distance with HFBR-1505AFZ/2505AFZ or HFBR-1515BFZ/2515BFZ	1	0.1	40	m	POF	Notes 1, 2, 3, 4, 6
		0.1	100	m	HCS [®]	Notes 1, 2, 3, 5, 6
Link Distance with HFBR-1505CFZ/2505CFZ	1	0.1	50	m	POF	Notes 1, 2, 3, 4, 7
		0.1	300	m	HCS [®]	Notes 1, 2, 3, 5, 7
Pulse Width Distortion with HFBR-1505AFZ/2505AFZ or HFBR-1515BFZ/2515BFZ	PWD	-30	+30	ns	25% to 75% duty cycle	Note 1
Pulse Width Distortion with HFBR-1505CFZ/2505CFZ	PWD	-125	+125	ns	arbitrary duty cycle	Note 1

Notes:

1. With recommended Tx and Rx circuits (60 mA nominal drive current).
2. POF HFBR-ExxyyyZ 0.23 dB/m worst case attenuation.
3. HCS Worst Case Attenuation is 10dB/km (0°C to 70°C) and 12dB/km (-40°C to 85°C).
4. Including a 3 dB optical safety margin accounting for link service lifetime.
5. Including a 2 dB optical safety margin accounting for link service lifetime.
6. Signaling rate DC to 10 MBd.
7. Signaling rate DC to 2 MBd.

HFBR-15X5XFZ Transmitters

The HFBR-15X5XFZ transmitter incorporates a 650 nm LED in a metal housing. The high light output power enables the use of both plastic optical fiber (POF) and Hard Clad Silica (HCS®). This transmitter can be operated up to 10 MBd using a simple driver circuit. The HFBR-1505XFZ is compatible with SMA connectors, while the HFBR-1515XFZ mates with ST® connectors.

Fall Time (90% to 10%)	t_f		10		ns	$I_F = 60 \text{ mA}$	

EYE SAFETY: The HFBR-15x5xFZ is a Class 1 LED Product and eye safe when used within the data sheet limits and under normal operating conditions. This includes all reasonably foreseeable single fault conditions per IEC60825-1 and amendments.

Peak Output Power

-40°C to +85°C unless otherwise noted.

Model Number	Symbol	Min.	Max.	Unit	Condition	Reference
HFBR-1505AFZ SERCOS	P_T	-7.5	-3.5	dBm	POF, $I_{F,dc} = 60$ mA	Notes 2, 3, 11
		-18.0	-10		HCS [®] , $I_{F,dc} = 60$ mA	Figure 2
HFBR-1515BFZ PROFIBUS		-7.5	-3.5		POF, $I_{F,dc} = 60$ mA	Notes 2, 3, 11
		-18.0	-8.5		HCS [®] , $I_{F,dc} = 60$ mA	Figure 2
HFBR-1505CFZ INTERBUS-S		-6.2	0.0		POF, $I_{F,dc} = 60$ mA	Notes 3, 8, 9
		-16.9	-8.5		HCS [®] , $I_{F,dc} = 60$ mA	Figure 2

Notes:

1. Typical data at 25°C.
2. Optical power measured at the end of 0.5 meters of 1 mm diameter plastic optical fiber with a large area detector.
3. Minimum and maximum values for P_T over temperature are based on a fixed drive current. The recommended drive circuit has temperature compensation which reduces the variation in P_T over temperature, refer to Figures 4 and 6.
4. Thermal resistance is measured with the transmitter coupled to a connector assembly and fiber, and mounted on a printed circuit board.
5. To further reduce the thermal resistance, the cathode trace should be made as large as is consistent with good RF circuit design.
6. For $I_{F,pk} > 60$ mA, the duty factor must maintain $I_{F,AVG} \leq 60$ mA and pulse width ≤ 1 μ s.
7. 1.6 mm below seating plane.
8. Minimum peak output power at 25°C is -5.3 dBm (POF) and -16.0 dBm (HCS[®]) for 1505CFZ series only.
9. Optical power measured at the end of 1 meter of 1 mm diameter plastic or 200 μ m hard clad silica optical fiber with a large area detector.
10. Pins 1 and 4 are for mounting and retaining purposes, but are electrically connected; pins 5 and 6 are electrically isolated. It is recommended that pins 1, 4, 5, and 6 all be connected to ground to reduce coupling of electrical noise.
11. Output power with 200 μ m hard clad silica optical fiber assumes a typical -10.5 dB difference compared to 1 mm plastic optical fiber.
12. Moisture sensitivity level (MSL) is 3.

Recommended Drive Circuit for HFBR-x505AFZ/x515BFZ

Figure 4. Recommended transmitter and receiver drive circuit ($I_{F, on} = 60 \text{ mA}$ nominal at $T_A = 25^\circ \text{C}$)

HFBR-25x5AFZ/BFZ Receivers

The HFBR-25x5AFZ/BFZ receiver consists of a silicon PIN photodiode and digitizing IC to produce a logic compatible output. The IC includes a unique circuit to correct the pulse width distortion of the first bit after a long idle period. This enables operation from DC to 10 MBd with low PWD for arbitrary data patterns. The receiver output is a “push-pull” stage compatible with TTL and CMOS logic. The HFBR-2505AFZ is compatible with SMA connectors, while the HFBR-2515BFZ mates with ST® connectors.

Output Fall Time	t _f		10	30	ns	C _L = 10 pF	Note 3

Notes:

- Typical data are at 25°C, V_{CC} = 5.0 V.
- 1.6 mm below seating plane.
- In recommended receiver circuit, with an optical signal from the recommended transmitter circuit.
- Pins 1 and 4 are electrically connected to the metal housing and are also used for mounting and retaining purposes. It is required that pin 1 and 4 be connected to ground to maintain metal housing shield effectiveness.
- BER ≤ 10E-9, includes a 10.8 dB margin below the receiver switching threshold level (signal to noise ratio = 12).
- Moisture sensitivity level (MSL) is 3.

Figure 5. Typical POF receiver pulse width distortion vs. optical power at 10 MBd

Figure 7. Typical POF receiver pulse width distortion vs. power supply voltage at mid optical power, (-6 dBm, 10 MBd)

HFBR-2505CFZ Receiver

The HFBR-2505CFZ receiver includes a monolithic DC coupled, digital IC receiver with open collector Schottky output transistor. An internal pullup resistor to V_{CC} is available at pin 5. The optical port is compatible with SMA connectors. The specified signal rate of HFBR-2505CFZ is 2 MBd.
