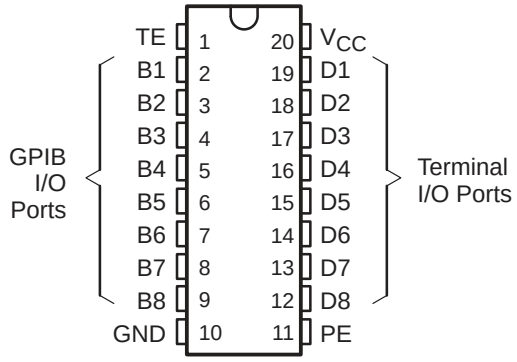
SLLS021E – JUNE 1986 – REVISED MAY 1998

- **8-Channel Bidirectional Transceiver**
- **High-Speed Advanced Low-Power Schottky Circuitry**
- **Low Power Dissipation . . . 46 mW Max per Channel**
- **Fast Propagation Times . . . 20 ns Max**
- **High-Impedance pnp Inputs**
- **Receiver Hysteresis . . . 650 mV Typ**
- **Open-Collector Driver Output Option**
- **No Loading of Bus When Device Is Powered Down (V_{CC} = 0)**
- **Power-Up/Power-Down Protection (Glitch Free)**

DW PACKAGE
(TOP VIEW)



NOT RECOMMENDED FOR NEW DESIGNS

description

The SN75ALS163 octal general-purpose interface bus transceiver is a monolithic, high-speed, advanced low-power Schottky device. It is designed for two-way data communications over single-ended transmission lines. The transceiver features driver outputs that can be operated in either the open-collector or 3-state mode. If talk enable (TE) is high, these outputs have the characteristics of open-collector outputs when pullup enable (PE) is low and of 3-state outputs when PE is high. Taking TE low places the outputs in the high-impedance state. The driver outputs are designed to handle loads of up to 48 mA of sink current. Each receiver features pnp transistor inputs for high input impedance and 400 mV minimum of hysteresis for increased noise immunity.

Output glitches during power up and power down are eliminated by an internal circuit that disables both the bus and receiver outputs. The outputs do not load the bus when V_{CC} = 0.

The SN75ALS163 is characterized for operation from 0°C to 70°C.

Function Tables

EACH DRIVER

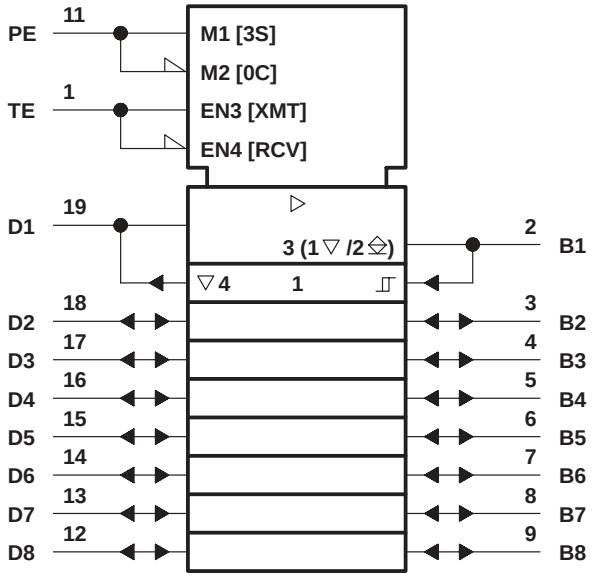
INPUTS			OUTPUT
D	TE	PE	B
H	H	H	H
L	H	X	L
H	X	L	Z
X	L	X	Z

EACH RECEIVER

INPUTS			OUTPUT
B	TE	PE	D
L	L	X	L
H	L	X	H
X	H	X	Z

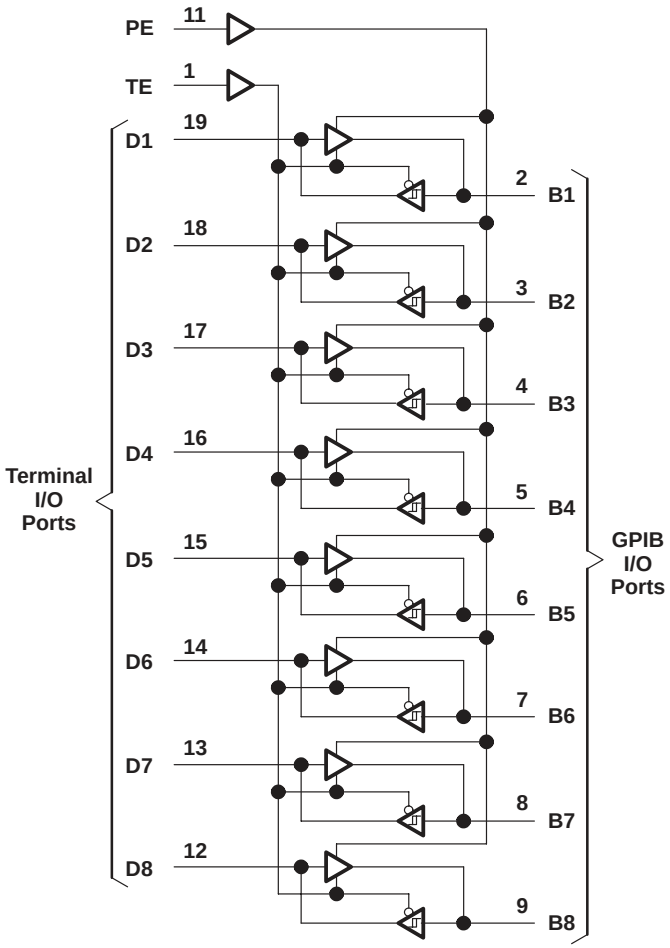
H = high level, L = low level,
X = irrelevant, Z = high-impedance state

logic symbol†

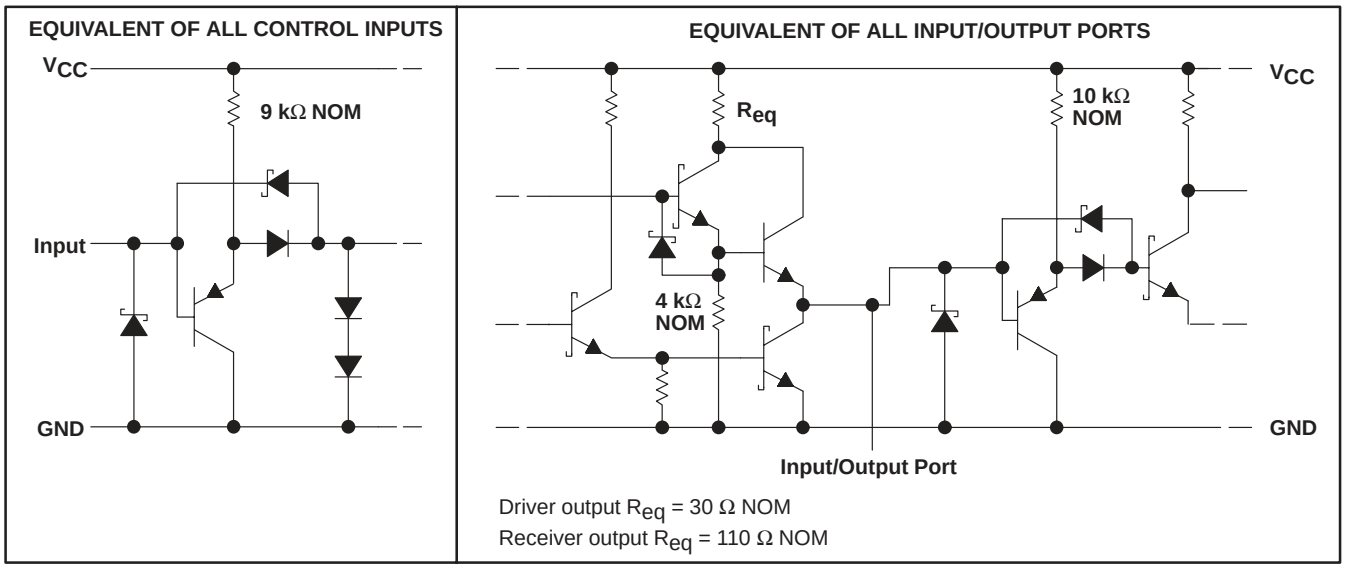


† This symbol is in accordance with ANSI/IEEE Std 91-1984 and IEC Publication 617-12.
▽ Designates 3-state outputs
◈ Designates open-collector outputs

logic diagram (positive logic)



schematics of inputs and outputs



absolute maximum ratings over operating free-air temperature range (unless otherwise noted)†

Supply voltage, V_{CC} (see Note 1) . . . . . 7 V
Input voltage, V_I . . . . . 5.5 V
Low-level driver output current . . . . . 100 mA
Package thermal impedance, θ_{JA} (see Note 2) . . . . . 97°C/W
Storage temperature range, T_{stg} . . . . . – 65°C to 150°C
Lead temperature 1,6 mm (1/16 inch) from the case for 10 seconds . . . . . 260°C

† Stresses beyond those listed under “absolute maximum ratings” may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under “recommended operating conditions” is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

NOTES: 1. All voltage values are with respect to network ground terminal.
2. The package thermal impedance is calculated in accordance with JESD 51.

recommended operating conditions

		MIN	NOM	MAX	UNIT
Supply voltage, V_{CC}		4.75	5	5.25	V
High-level input voltage, V_{IH}		2			V
Low-level input voltage, V_{IL}				0.8	V
High-level output current, I_{OH}	Bus ports with pullups active			– 5.2	mA
	Terminal ports			– 800	µA
Low-level output current, I_{OL}	Bus ports			48	mA
	Terminal ports			16	
Operating free-air temperature, T_A		0		70	°C

electrical characteristics over recommended supply-voltage and operating free-air temperature ranges (unless otherwise noted)

PARAMETER			TEST CONDITIONS		MIN	TYP†	MAX	UNIT
V_{IK}	Input clamp voltage		I_I = –18 mA			– 0.8	–1.5	V
V_{hys}	Hysteresis ($V_{T+} – V_{T–}$)	Bus			0.4	0.65		V
V_{OH}	High-level output voltage	Terminal	I_{OH} = – 800 μA,	TE at 0.8 V	2.7	3.5		V
		Bus	I_{OH} = – 5.2 mA,	PE and TE at 2 V	2.5	3.3		
V_{OL}	Low-level output voltage	Terminal	I_{OL} = 16 mA,	TE at 0.8 V		0.3	0.5	V
		Bus	I_{OL} = 48 mA,	TE at 2 V		0.35	0.5	
I_{OH}	High-level output current (open-collector mode)	Bus	V_O = 5.5 V,	PE at 0.8 V, D and TE at 2 V			100	μA
I_{OZ}	Off-state output current (3-state mode)	Bus	PE at 2 V, TE at 0.8 V	V_O = 2.7 V			20	μA
				V_O = 0.5 V			–100	
I_I	Input current at maximum input voltage	Terminal	V_I = 5.5 V			0.2	100	μA
I_{IH}	High-level input current	Terminal, PE, or TE	V_I = 2.7 V			0.1	20	μA
I_{IL}	Low-level input current		V_I = 0.5 V			–10	–100	μA
I_{OS}	Short-circuit output current	Terminal			– 15	– 35	– 75	mA
		Bus			– 25	– 50	–125	
I_{CC}	Supply current		No load	Terminal outputs low and enabled		42	65	mA
				Bus outputs low and enabled		52	80	
$C_{I/O(bus)}$	Bus-port capacitance		V_{CC} = 0 to 5 V,	$V_{I/O}$ = 0 to 2 V, f = 1 MHz		30		pF

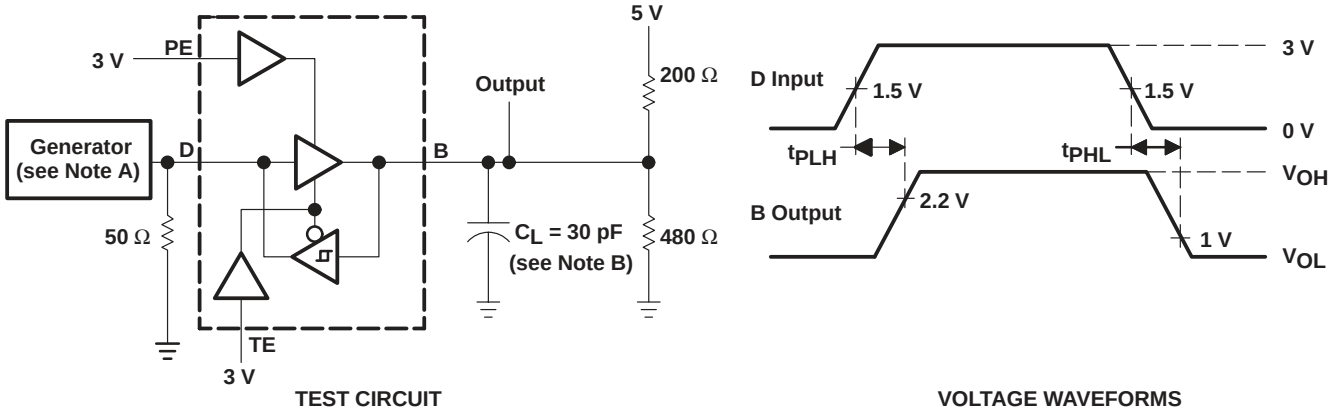
† All typical values are at V_{CC} = 5 V, T_A = 25°C.

switching characteristics over recommended operating free-air temperature range (unless otherwise noted), V_{CC} = 5 V

PARAMETER		FROM (INPUT)	TO (OUTPUT)	TEST CONDITIONS	MIN	TYP†	MAX	UNIT
t_{PLH}	Propagation delay time, low-to-high-level output	Terminal	Bus	C_L = 30 pF, See Figure 1		7	20	ns
t_{PHL}	Propagation delay time, high-to-low-level output					8	20	
t_{PLH}	Propagation delay time, low-to-high-level output	Bus	Terminal	C_L = 30 pF, See Figure 2		7	14	ns
t_{PHL}	Propagation delay time, high-to-low-level output					9	14	
t_{PZH}	Output enable time to high level	TE	Bus	C_L = 15 pF, See Figure 3		19	30	ns
t_{PHZ}	Output disable time from high level					5	12	
t_{PZL}	Output enable time to low level					16	35	
t_{PLZ}	Output disable time from low level					9	20	
t_{PZH}	Output enable time to high level	TE	Terminal	C_L = 15 pF, See Figure 4		13	30	ns
t_{PHZ}	Output disable time from high level					12	20	
t_{PZL}	Output enable time to low level					12	20	
t_{PLZ}	Output disable time from low level					11	20	
t_{en}	Output pull-up enable time	PE	Bus	C_L = 15 pF, See Figure 5		11	22	ns
t_{dis}	Output pull-up disable time					6	12	

† All typical values are at V_{CC} = 5 V, T_A = 25°C.

PARAMETER MEASUREMENT INFORMATION



NOTES: A. The input pulse is supplied by a generator having the following characteristics: PRR ≤ 1 MHz, 50% duty cycle, t_r ≤ 6 ns, t_f ≤ 6 ns, Z_O = 50 Ω.
B. C_L includes probe and jig capacitance.

(1) The marketing status values are defined as follows:
ACTIVE: Product device recommended for new designs.
LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.
NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.
PREVIEW: Device has been announced but is not in production. Samples may or may not be available.
OBSOLETE: TI has discontinued the production of the device.

(2) Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check http://www.ti.com/productcontent for the latest availability information and additional product content details.
TBD: The Pb-Free/Green conversion plan has not been defined.
Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.
Pb-Free (RoHS Exempt): This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.
Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

(3) MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

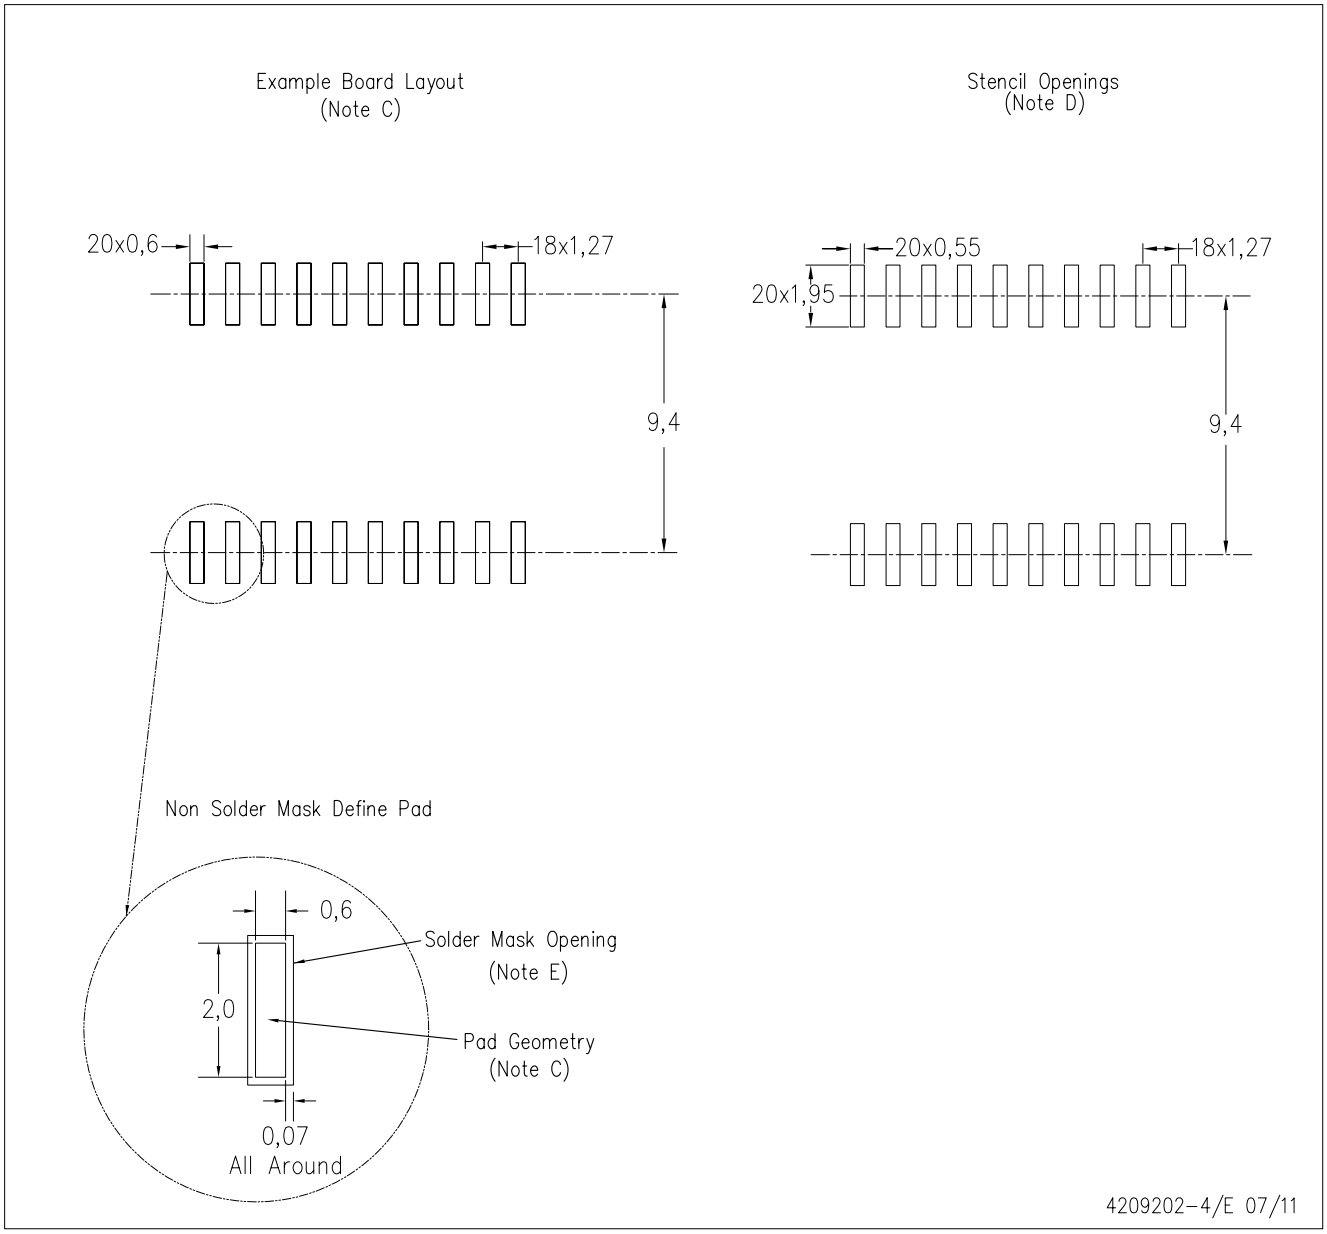
A. All linear dimensions are in inches (millimeters). Dimensioning and tolerancing per ASME Y14.5M–1994.
B. This drawing is subject to change without notice.
C. Body dimensions do not include mold flash or protrusion not to exceed 0.006 (0,15).
D. Falls within JEDEC MS–013 variation AC.

DW (R–PDSO–G20) PLASTIC SMALL OUTLINE



NOTES:
A. All linear dimensions are in millimeters.
B. This drawing is subject to change without notice.
C. Refer to IPC7351 for alternate board design.
D. Laser cutting apertures with trapezoidal walls and also rounding corners will offer better paste release. Customers should contact their board assembly site for stencil design recommendations. Refer to IPC–7525
E. Customers should contact their board fabrication site for solder mask tolerances between and around signal pads.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46C and to discontinue any product or service per JESD48B. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All semiconductor products (also referred to herein as “components”) are sold subject to TI’s terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its components to the specifications applicable at the time of sale, in accordance with the warranty in TI’s terms and conditions of sale of semiconductor products. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by applicable law, testing of all parameters of each component is not necessarily performed.

TI assumes no liability for applications assistance or the design of Buyers’ products. Buyers are responsible for their products and applications using TI components. To minimize the risks associated with Buyers’ products and applications, Buyers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI components or services are used. Information published by TI regarding third-party products or services does not constitute a license to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of significant portions of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI components or services with statements different from or beyond the parameters stated by TI for that component or service voids all express and any implied warranties for the associated TI component or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyer acknowledges and agrees that it is solely responsible for compliance with all legal, regulatory and safety-related requirements concerning its products, and any use of TI components in its applications, notwithstanding any applications-related information or support that may be provided by TI. Buyer represents and agrees that it has all the necessary expertise to create and implement safeguards which anticipate dangerous consequences of failures, monitor failures and their consequences, lessen the likelihood of failures that might cause harm and take appropriate remedial actions. Buyer will fully indemnify TI and its representatives against any damages arising out of the use of any TI components in safety-critical applications.

In some cases, TI components may be promoted specifically to facilitate safety-related applications. With such components, TI’s goal is to help enable customers to design and create their own end-product solutions that meet applicable functional safety standards and requirements. Nonetheless, such components are subject to these terms.

No TI components are authorized for use in FDA Class III (or similar life-critical medical equipment) unless authorized officers of the parties have executed a special agreement specifically governing such use.

Only those TI components which TI has specifically designated as military grade or “enhanced plastic” are designed and intended for use in military/aerospace applications or environments. Buyer acknowledges and agrees that any military or aerospace use of TI components which have ***not*** been so designated is solely at the Buyer's risk, and that Buyer is solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI has specifically designated certain components which meet ISO/TS16949 requirements, mainly for automotive use. Components which have not been so designated are neither designed nor intended for automotive use; and TI will not be responsible for any failure of such components to meet such requirements.
