## About this document

### Scope and purpose

This document provides description and information for the LIN Demoboard with integrated voltage regulator. This Demoboard can be used for all Infineon 8-pin standard LIN transceivers with integrated voltage regulator:

- TLE8457ASJ, TLE8457ALE, TLE8457BSJ, TLE8457BLE, TLE8457CSJ, TLE8457CLE, TLE8457DSJ, TLE8457DLE,

*Note: The following information is given as a hint for the implementation of our devices only and shall not be regarded as a description or warranty of a certain functionality, condition or quality of the device.*

### Intended audience

This document is intended for engineers who develop applications.

**Summary**

**1 Summary**

This document is guideline for the LIN LDO transceiver demoboard in DSO-8 / TSON-8 package from Infineon Technologies AG and provides information for the proper usage of the demoboard.

The demoboard can be used for all standard LIN LDO transceiver on the market, which fulfill the OEM required standard pinout for DSO-8 / TSON-8 package (see [Figure 1](#)).

**Figure 1 Pin-out of Infineon 8-pin LIN LDO transceiver TLE8457x**

**2 General Function**

The demoboard can be used for various test cases and various LIN LDO transceiver. Power supply failures can be simulated as well as different modes of operation. The demoboard should be used to evaluate existing and new LIN LDO transceivers on the market. Advantages, risks and disadvantages of competitor devices versus Infineon devices can be tested and measured.
