### EMC Components

### Chip beads For general signal line Low DC resistance type **MMZ-H** series (for automotive)

### **AEC-Q200** MMZ1005-H type

### FEATURES

- O Noise reduction solution for general signal line.
- This product is a low resistance than the standard "-C" series.
- It's possible to reduce power loss of a circuit.
- Operating temperature range: -55 to +125°C

### APPLICATION

O Various ECUs, powertrains, body controls, and car multimedia (telematics).

### PART NUMBER CONSTRUCTION

MMZ	1005	S	601	Н	Т	D25
Series name	L×W×T dimensions 1.0×0.5x0.5 mm	Material name	Impedance (Ω) at 100MHz	Characteristic type	Packaging style	Internal code

### CHARACTERISTICS SPECIFICATION TABLE

Impedance		DC resistance	Rated current	Part No.
[100MHz]				
<b>(</b> Ω <b>)</b>	Tolerance	<b>(</b> Ω <b>)max</b> .	(mA)max.	
80	±25%	0.10	800	MMZ1005S800HTD25
120	±25%	0.13	700	MMZ1005S121HTD25
240	±25%	0.18	600	MMZ1005S241HTD25
600	±25%	0.34	440	MMZ1005S601HTD25
1000	±25%	0.49	360	MMZ1005S102HTD25

#### Measurement equipment

Measurement item	Product No.	Manufacturer		
Impedance	E4991A+16192A	Keysight Technologies		
DC resistance Type-7556		Yokogawa

## **REMINDERS FOR USING THESE PRODUCTS**

Before using these products, be sure to request the delivery specifications.

# SAFETY REMINDERS

Please pay sufficient attention to the warnings for safe designing when using this products.

### **▲** REMINDERS ○ The storage period is within 12 months. Be sure to follow the storage conditions (temperature: 5 to 40°C, humidity: 10 to 75% RH or less). If the storage period elapses, the soldering of the terminal electrodes may deteriorate. O Do not use or store in locations where there are conditions such as gas corrosion (salt, acid, alkali, etc.). Before soldering, be sure to preheat components. The preheating temperature should be set so that the temperature difference between the solder temperature and chip temperature does not exceed 150°C. O Soldering corrections after mounting should be within the range of the conditions determined in the specifications. If overheated, a short circuit, performance deterioration, or lifespan shortening may occur. O When embedding a printed circuit board where a chip is mounted to a set, be sure that residual stress is not given to the chip due to the overall distortion of the printed circuit board and partial distortion such as at screw tightening portions. ○ Self heating (temperature increase) occurs when the power is turned ON, so the tolerance should be sufficient for the set thermal design. Carefully lay out the coil for the circuit board design of the non-magnetic shield type. A malfunction may occur due to magnetic interference. ○ Use a wrist band to discharge static electricity in your body through the grounding wire. O Do not expose the products to magnets or magnetic fields. O Do not use for a purpose outside of the contents regulated in the delivery specifications. O The products listed on this catalog are intended for use in general electronic equipment (AV equipment, telecommunications equipment, home appliances, amusement equipment, computer equipment, personal equipment, office equipment, measurement equipment, industrial robots) under a normal operation and use condition. The products are not designed or warranted to meet the requirements of the applications listed below, whose performance and/or quality require a more stringent level of safety or reliability, or whose failure, malfunction or trouble could cause serious damage to society, person or property. If you intend to use the products in the applications listed below or if you have special requirements exceeding the range or conditions set forth in the each catalog, please contact us. (1) Aerospace/aviation equipment (8) Public information-processing equipment (2) Transportation equipment (cars, electric trains, ships, etc.) (9) Military equipment (3) Medical equipment (10) Electric heating apparatus, burning equipment (4) Power-generation control equipment (11) Disaster prevention/crime prevention equipment (12) Safety equipment (5) Atomic energy-related equipment (6) Seabed equipment (13) Other applications that are not considered general-purpose (7) Transportation control equipment applications When designing your equipment even for general-purpose applications, you are kindly requested to take into consideration securing protection circuit/device or providing backup circuits in your equipment.

A Please be sure to request delivery specifications that provide further details on the features and specifications of the products for proper and safe use. (4/4) Please note that the contents may change without any prior notice due to reasons such as upgrading.
