Six Arm Soldering Station

SKU:FIT0609

INTRODUCTION

This is a third hand soldering station with six flexible helping arms and an aluminum alloy base, allowing you to finish all kinds of complicated welding work. Aluminum-made base and rubber pad of the product are able to keep the soldering station from sliding around on your bench, which greatly ensures stability. The six adjustable flexible arms can easily hold anything that is going to be soldered. We also set freely-rotating alligator clips on the top of the arms to convenient your operation. The grooves on the base can be used to place your screws and other material. A free USB fan is included in the package.
