

Thermocouple type-J glass braid insulated

PID: MIKROE-2823

Type-J thermocouple with glass braid insulation is used for precise measurement of high temperatures. Thermocouple itself can measure up to 480°C (900°F). It is 2 meters long and ends with a PCC-SMP connector which is compatible with Thermo J click.

Type-J thermocouple with glass braid insulation is used for precise measurement of high temperatures. Thermocouple itself can measure up to 480°C (900°F). It is 2 meters long and ends with a PCC-SMP connector which is compatible with Thermo J click.

Calibration type: J

Insulation: Glass braid

AWG gage: 24

Wire length: 2m

Diameter: 0.51mm

Max service temp: 480°C (900°F)

Max service temp for connector body: 220°C (425°F)

• Ends with PCC-SMP connector which is compatible with Thermo J click.
