

## AM75QB-JZ

¼ brick

The AM75QB-JZ series is a high-performance quarter brick DC/DC converter specifically designed for a variety of railway applications. It features 75W of output power with no requirement for minimum load, a wide input voltage of 43-160VDC, operating temperature up to 105°C and reinforced I/O isolation of 3000VAC.

Additionally, this series features include input under-voltage protection, output over-voltage, short-circuit, over-current and over-temperature protection, remote On/Off control, remote sense compensation and output voltage trim adjustment.

The AM75QB-JZ meets EN50155 railway standards and are widely used in the centralized lighting, air conditioning and related on-board equipment.

## Features

- Operating Temp: -40 °C to +100 °C
- Isolation voltage: 3000VAC
- High efficiency: Up to 91% typ.
- Regulated single output
- Output short circuit, over-current, over-voltage, input under-voltage, over temperature protection
- Standard ¼ brick package
- Design to meet EN50155

- Note:
1. When not using the sense function, connect the +sense to +Vout and -sense to -Vout with the shortest possible traces to avoid interference and minimize the voltage drop.
  2. When using the sense function, connect the sense pins to the load with the shortest possible traces, twisted pair wire or shielded wire and make sure the voltage drop is less than 0.3V.
