## OLED 128x64 0.96" I2C
OLED graphics display with SH1106 or SSD1306 controller

## DESCRIPTION

These displays come with SSD1306 or SH1106 controller, but the actual model is not disclosed. Libraries are available for both controllers, and we recommend a library that works for both controller types.

Most libraries for SSD1306 also support SH1106, a quick search on GitHub will deliver plenty of information.

We do NOT recommend the SSD1306 library from Adafruit since it lacks SH1106 support!

- Shows characters and graphics.
- Arduino library is available.
- 128 x 64 pixel, white/blue
- PCB size: 27 x 28 mm
- Screen size: 22 x 12 mm (0.96 Inches)
- Power consumption: <40mW
- Data interface: I2C serial
- I2C address: 0x3C (typically)
- This Display has no Touch-Function.
