Notes:							
1. R_{JJA} is the sum of the junction-to-case and case-to-ambient thermal resistance where the case thermal reference is defined as the solder mounting surface of the drain pins. R_{WJC} is guaranteed by design while R_{eCA} is determined by the user's board design.

<p>2. Pulse Test: Pulse Width < 300μs, Duty Cycle < 2.0%</p> <p>3. The diode connected between the gate and source serves only as protection against ESD. No gate overvoltage rating is implied.</p>
