

Arcade Joystick

SKU 311110000

Description

This is a 4-way arcade joystick of crystal ball, metal shell and 4 momentary switches. The 4 momentary switches convert your move into a set of 4-way signals so that would send direction commands to your project. Also, it is industrial-standard and heavy-duty designed and will be cool to control your robots or any other machines.

Features

- Original arcade style
- Flurid globular knob
- 4-way action
- Spring return-to-center

Specification

- Dimension : 78*95*39 (pedestal); 35*35*70 (knob)
