

Heavy Duty Sealed Connector Series (HDSCS)

for Industrial & Commercial Vehicles

INDUSTRIAL & COMMERCIAL TRANSPORTATION

Industrial & Commercial Transportation

When every connection counts, TE Connectivity delivers reliable connectivity products designed to withstand harsh environmental conditions for on and off-highway vehicles and recreational transportation. As a world leader in rough and rugged connectivity, you can depend on TE Connectivity to provide innovative solutions for field applications where failure is not an option.

We go to extremes to make every connection count

The Industrial & Commercial Transportation business unit of TE Connectivity is a world leader in connectors and interconnect systems for use in the toughest and harshest environments. From trucks to tractors, from motorcycles to recreational vehicles, we offer products that work just as hard as the vehicles in which they are installed.

Our intelligent yet robust solutions and technologies function reliably in applications with high vibration and extreme temperature characteristics. The new business unit combines the service portfolios of DEUTSCH and TE Connectivity under one roof. The DEUTSCH brand is a global leader in interconnect solutions for use in heavy equipment and harsh industrial environments. TE Connectivity has been among the world leaders in interconnect systems for automotive and system manufacturers for over 50 years We offer you one of the world's most comprehensive connector product portfolios.

Thanks to the breadth of our product range, our global presence and our innovative strength, we are able to develop targeted solutions for the most demanding requirements of a rapidly changing market.

We engineer tough products for your application needs. We know that dependability is a must in the field or at the site. That's why our engineers designed rugged, high vibration resistant connector solutions to meet your application requirements.

Support

We provide options to meet your needs. TE Connectivity offers sales options to service all Industrial & Commercial Transportation customers, including factory direct, LADD Distribution and third party distribution. Contact your local sales representative for more information.

Please note our global contacts on page 57.

Industrial & Commercial Transportation Markets

On-Highway Vehicles

These include trucks (class 6 – 8, and utility), buses (city buses, coaches, school buses) and emergency vehicles.

Off-Highway Vehicles

In this segment, we equip construction vehicles such as front-loaders, dump trucks, excavators and bulldozers. In agriculture vehicles, our products are widely used in tractors and combine harvesters, for example. This segment also includes special vehicles like industrial lifts or material handling vehicles.

Recreational Transportation

From boats (including personal watercraft) to motorcycles, scooters, snowmobiles, ATVs and recreational vehicles, the range of recreational vehicles is broad.

Whatever the application, we have a connector to match.

Industrial & Commercial Transportation

Industrial & Commercial Transportation has the ideal product series for every harsh environment. Our time-tested, high vibration resistant products and technologies provide the right solution for your applications and requirements.

We go to extremes to make every connection count

Interconnection Systems

TE Connectivity's electrical and electronic interconnection products and solutions are used to electrically and mechanically join wires and cables, printed circuit boards, integrated circuit packages and batteries.

Cable Assemblies

TE Connectivity is your partner for vehiclespecific cable assemblies. We offer research and development capabilities, prototypes and samples, as well as manufacturing facilities for special cable assemblies.

Hybrid & Electric Mobility Solutions

Electric mobility is changing the way engineers think about vehicles. The way they're designed and engineered. The way they're fueled. Even the way the fuel is delivered. And we're right there with you helping complete the connections for current and nextgeneration hybrid and electric mobility and the charging infrastructure. TE Connectivity's complete porfolio of connection and protection systems includes battery connectivity systems, connectors, cable assemblies, high-voltage relays and contactors, power distribution units and customer-specific designs.

INDUSTRIAL & COMMERCIAL

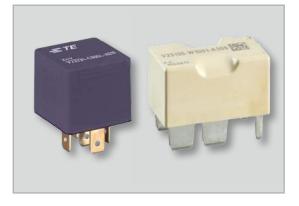

Sensors

TE Connectivity provides contactless and electromechanical sensor products with robust housing technologies, connection systems and temperature-resistant design for use in a variety of industrial and commercial transportation applications.

Relays

TE Connectivity's 24 V relay product line includes a broad range of robust and versatile relays for many diverse applications within trucks, buses, agricultural tractors, construction equipment and other heavy duty commercial vehicles. With increased contact gaps and other key design features, these relays are designed for use in challenging environments where they may regularly encounter extended periods of shock and vibration.

Infotainment

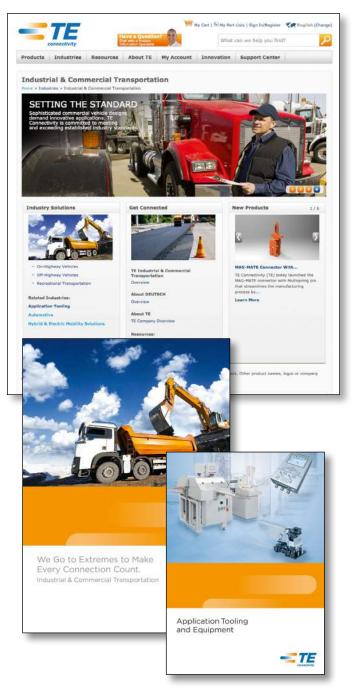

TE Connectivity offers a wide variety of infotainment solutions for consumer port connections, high data rate applications, next-generation harness architecture, board-to-board connections and vehicle-to-vehicle communication.

Industrial & Commercial Transportation

The TE Connectivity Industrial & Commercial Transportation website is an innovative and interactive source for application information, product updates and technical solutions.

Industrial & Commercial Transportation online

Product and Machine Literature

TE Connectivity Industrial & Commercial Transportation offers a variety of product specific catalogs, brochures and high impact flyers to help better serve you!

For more information on literature for TE Connectivity Industrial & Commercial Transportation, please contact your local organization or go to www.te.com/en/industries/industrial-commercial-transportation.html

TE Products www.te.com/en/products/product-landing.html

Product Information Center (PIC)

You can rely on TE Connectivity's PIC Team to provide you support for answers to your general information or technical questions in an efficient and effective manner.

To reach our PIC staff, please contact your local organization or see our Global Contacts page. Please contact us at www.te.com/support-center

Restriction on the Use of Hazardous Substances (RoHS)

Restriction on the use of Hazardous Substances (RoHS)

At TE Connectivity, we're ready to support your RoHS requirements. We've assessed more than 1.5 million end items/components for RoHS compliance, and issued new part numbers where any change was required to eliminate the restricted materials. Part numbers in this catalog are identified as:

RoHS Compliant

Part numbers in this catalog are RoHS Compliant, unless marked otherwise.

These products comply with European Union Directive 2002/95/EC as amended 1 January 2006 that restricts the use of lead, mercury, cadmium, hexavalent chromium, PBB, and PBDE in certain electrical and electronic products sold into the EU as of 1 July 2006.

Note: For purposes of this Catalog, included within the definition of RoHS Compliant are products that are clearly "Out of Scope" of the RoHS Directive such as hand tools and other non-electrical accessories.

Non-RoHS Compliant

These part numbers are identified with a "♦" symbol. These products do not comply with the material restrictions of the European Union Directive 2002/95/EC.

5 of 6 Compliant

A "•" symbol identifies these part numbers. These products do not fully comply with the European Union Directive 2002/95/EC because they contain lead in solderable interfaces (they do not contain any of the other five restricted substances above allowable limits). However, these products may be suitable for use in RoHS applications where there is an application-based exception for lead in solders, such as the server, storage, or networking infrastructure exemption.

Note: Information regarding RoHS compliance is provided based on reasonable inquiry of our suppliers and represents our current actual knowledge based on the information provided by our suppliers. This information is subject to change. For latest compliance status, refer to our website referenced below.

Getting the information you need

Our comprehensive on-line RoHS Customer Support Center provides a forum to answer your questions and support your RoHS needs. A RoHS FAQ (Frequently Asked Questions) is available with links to more detailed information. You can also submit RoHS questions and receive a response within 24 hours during a normal work week. The Support Center also provides:

- Cross-Reference from Non-compliant to Compliant Products
- Ability to browse RoHS Compliant Products in our on-line catalog: <u>http://www.te.com/commerce/alt/RohsAltHome.do</u>
- Downloadable Technical Data Customer Information Presentation
- More detailed information regarding the definitions used above

RoHS Customer Support Center

So whatever your questions when it comes to RoHS, we've got the answers at <u>http://www.te.com/customersupport/rohssupportcenter/</u>

Connector Series (HDSCS) for industrial & commercial vehicles.

Heavy Duty Sealed

The Heavy Duty Sealed Connector Series, so called HDSCS, is targeted for the commercial vehicle industry and off-road applications. This wire-to-wire and wire-todevice connector program was designed to meet the rigorous demands of an industry that requires the highest standards in performance.

The HDSCS program consists of five groups of connectors in different sizes, starting from 2 up to 18 way connectors. In addition, mixed combinations with signal and power lines are available.

This HDSCS program will feature the AMP MCP 1.5K, AMP MCP 2.8 and AMP MCP 6.3/4.8K receptacles and tabs as a contact system.

Technical Features

- High reliability status supported for long term use
- High vibration level supported
- Perfect design to avoid quality problems, reduce manufacturing and service cost
- Integrated secondary locking device delivered in pre-locked position
- Polarization, several keyings
- Clear handling, low mating force with a reliable slide locking mechanism delivered in pre-locked position

Heavy Duty Sealed Connector Series (HDSCS)

Contact Systems

The AMP MCP contact system offers high functionality for application in commercial vehicles.

> The AMP MCP contact system is mainly used in the automotive industry. Each contact consists of a flat receptacle, which mates with a flat tab. Every contact has got a steel spring and a copper alloy body.

The two-piece contact design means that the electrical and mechanical properties are separated. One end of the contact body is crimped to wire and the other end mates with the matching tab. The closed spring has got several functions and also different advantages for the complete contact system.

- Protection of the contact springs
- No over elongation of the contact springs possible under normal circumstances
- No possibility to connect from the rear side
- Protection against mechanical damage
- Good guiding in the cavity
- Secondary locking possible (from 4 directions)
- Assembly into housing fully-automatically

In addition there are usually two lances on the steel to spring. These serve to lock the contact securely in the housing. The main advantages of the body are:

- Several contact points
- Large range of wire sizes (from 0.2mm² at AMP MCP 1.5K up to 6.0 mm² at AMP MCP 6.3/4.8K)
- Base material with very high current capability
- High vibrational load

Tabs and receptacles can be applied in both sealed and unsealed connectors.

AMP MCP contacts can be fast and economically arranged to the lead using TE Connectivity application tooling.

AMP MCP 1.5K Contact System

Sealed Receptacle Contacts

Technical Features

Contact Material: CuNiSi Top Spring: Stainless Steel

Contact Finish: Tin plated, selective silver plated, selective gold plated

Wire Size Range: 0.20–0.35 mm2, 0.5–1.0 mm2, >1.0–1.5 mm2 (FLR Cable)

Current Carrying Capacity: up to 20 Ampere (at 20 °C ambient temperature)

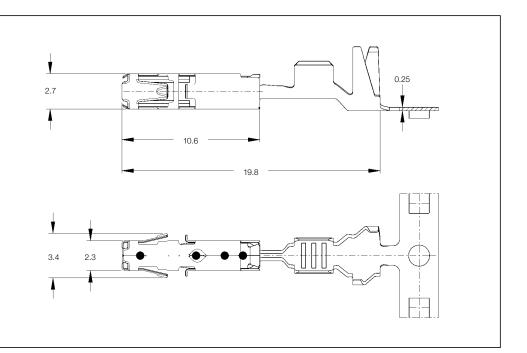

Temperature Range: -40 °C ... +130 °C (tin plated) -40 °C ... +140 °C (silver plated)

-40 °C ... +150 °C (silver plated) -40 °C ... +150 °C (gold plated)

Mating Cycles:•

up to 10 cycles (tin plated) up to 50 cycles (silver plated) up to 100 cycles (gold plated)

 Mating Cycles are depending on various technical influences and must be clarified in each individual case.

Contact Resistance:

New State $\leq 2 m\Omega$ Mating Force: Max. 6 N Unmating Force: Max. 6 N

Dimension of Male Contacts: $1.5^{+0.2}_{-0.1} \times 0.6^{+0.07}_{-0.03} \text{ mm}$

Extraction Tool: Part No. 1-1579007-1

Product Group Drawing: 1241436

Product Specification: 108-18716

Application Specification: 114-18386

Heavy Duty Sealed Connector Series (HDSCS)

AMP MCP Housings and Connectors

Introduction

The AMP MCP housings and connectors combine the features of robust construction and high functional requirements.

> The Heavy Duty Sealed Connector Series (HDSCS) offers receptacle and tab housings with capability for water-proofing and resistance to conditions of extreme vibration.

The system is designed for electronic and electrical applications in motor vehicles, where vibrations and mechanical stress, in the long term, can affect the quality on the contact system.

Technical Features

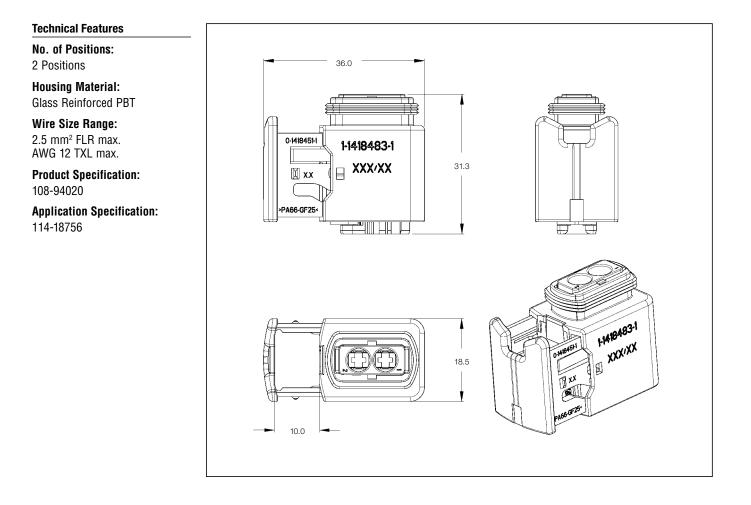

- High reliability status supported for long term use
- High vibration level supported
- Perfect design to avoid quality problems, reduce manufacturing and service cost
- Integrated secondary locking device delivered in pre-locked position
- Wire-to-Wire sealed and unsealed connectors (SWS)

- Wire-to-Board sealed connectors (SWS)
- Polarization, several keyings
- Dust and water protected
- Clear handling, low mating force with a reliable slide locking mechanism
- Mixed configuration with signal and power line connections

Introduction

TE Application Tooling is dedicated to providing high quality equipment options to meet all levels of your connector product specifications.

In addition to a comprehensive tooling and equipment range, TE Application Tooling maintains a global presence and support network in the form of field service engineers and product managers.

Tooling shown in this catalog reflects only a part of our range and is by no means complete.

Equipment is divided into two categories:

■ Generic equipment

We supply sufficient online information referenced by part number enabling you to identify and order what you need without additional assistance.

Specialized Equipment

Our specialists are available to identify the correct solutions for your application.

Finding Equipment Online

Powerful search functions are available to identify appropriate tooling:

• Applicators

www.tooling.te.com/europe/ applicator.asp

Hand Tools

www.tooling.te.com/europe/ handtools.asp

This website is quick and easy to use and is kept up to date with the latest tooling information and developments. Visit TE Application Tooling at

www.tooling.te.com/europe www.tooling.china.com

Find your country contact at www.tooling.te.com/europe/ contact.asp

TE Application Tooling's expert team will be happy to assist you with the right tooling that meets your special demands.

Most TE hand tools have minimum order quantities when purchasing direct from TE. However all hand tools should be available at the quantity you want from your preferred TE approved distributor.

For recommended distributors and to check distributor stock, visit http://tooling.te.com/europe/howtopurchase.asp
