The Jonard Tools RJ45 Regular type Connectors are used by network installers/technicians in order to terminate CAT5 or CAT5e network cables with a pass-through crimper. They are used in households and businesses and are ideal for terminating network cables or even replacing an existing connector. These connectors feature the following:

- 50 µm gold plating on contact surfaces provides greater signal quality than the competition
- Clear housing allows the operator to see the wire pairs easily
- This product comes in a blister of 10 connectors
