

MAGNASPHERE MSS -XXS & -K SERIES INSTALLATION INSTRUCTIONS: Surface Mount Contacts

Required Tools and Components

Provided by Manufacturer (per module set)

- 1 MSS switch module
- 1 MSS magnet module

Provided by Installer

- Hand Tools
- Fasteners
- Circuit Tester

MSS -XXS, -K SERIES

SECURITY

MSS-54SL
MSS-K24
MSS-K24S

MSS-K37S
MSS-88SL

Specifications

Max Current: 0.25 A Resistive

Max Voltage: 30 VDC

Max Power: .25 W Resistive

The Magnasphere MSS-Concealed series is intended to be connected to a UL Listed compatible control panel for US applications and a ULC Listed compatible control panel for Canadian applications.

NOMENCLATURE GUIDE

Surface Mount

* MSS-106S = MSS K37S fastened to a rail-mount bracket (P/N 1271) for use with overhead doors

Installation Plan & Switch Orientation

The MSS -XXS/-K should be mounted close to the latch side of the door for optimal performance; Up to 15" (38cm) from the doorknob/door-latch edge is recommended in order to meet UL 681 requirements: contact shall be installed so door cannot be opened more than 2 inches without causing an alarm. See table for operating gaps. Ensure that the modules are well aligned. Before drilling, a careful layout of the site is recommended in order to achieve module alignment and secure routing of wires. Magnasphere uses rare-earth magnet materials which do not require isolation from steel surfaces. (Spacers may be needed only for alignment.)

Test and wire the switch. Magnasphere contacts have a directional, restricted sense zone for enhanced security. Check that the installation is properly oriented, bringing the magnet to rest within the contact's secure sense zone.

Fasten the switch modules to the frame and door. Test the operation of the installed switch.

Note: some models have multiple wire egresses and multiple mounting hole sets. One pair of fasteners per module is sufficient.

Closed-Loop Contact

Check your alarm panel's documentation for settings

PANEL Common Zone

INSTALLED SIDE VIEWS

Models with "-RS#", "-RP#", or "-RS#P#" suffix have embedded End Of Line resistor/s of # value in kilo-Ohms.
