A Tallysman Accutenna® Antenna TW2406/TW2408 Embedded GPS/GLONASS Antenna

The TW2406 / TW2408 is electronically identical to the TW2405 / TW2407. The TW2406 / TW2408 has a larger PCB with drilled holes for more secure mounting.

The TW2406/TW2408 employs Tallysman's unique *Accutenna* technology covering the GPS L1, GLONASS L1 and SBAS (WAAS, EGNOS & MSAS) frequency bands (1574 to 1606 MHz). It is especially designed for precision industrial, agricultural and military OEM applications. It provides truly circular response over its entire bandwidth thereby producing superior multipath signal rejection.

The TW2406/TW2408 features a dual-feed wideband patch element, with a two stage Low Noise Amplifier, comprised of one input LNA per feed, a mid section SAW to filter the combined output, and a final output gain stage. This configuration provides excellent axial ratio that is constant across the full frequency band. A tight pre-filter is available with part number TW2408 to protect against saturation by high level sub-harmonics and L-Band signals.

The TW2406 /TW2408 comes in a compact circular form factor with a built-in 56 mm diameter ground plane.
