INDUCTORS

⇔TDK

Inductors for high frequency circuits Multilayer ceramic MLG-PPA series

MLG0603PPA type

FEATURES

- O High Q type inductor for high-frequency circuits.
- Compared to the MLG0603P series, has low direct current resistance for compatibility with large currents, optimal for low power consumption.
- O Advanced monolithic structure is formed using a multilayering and sintering process with ceramic and conductive materials for high-frequency.
- Operating temperature range: -55 to +125°C

APPLICATION

Smart phones, tablet terminals, high frequency modules, W-LAN, UWB, tuners and other high frequency circuits for the mobile communication industry

O Application guides: Smart phones/tablets

REMINDERS FOR USING THESE PRODUCTS

Before using these products, be sure to request the delivery specifications.

SAFETY REMINDERS

Please pay sufficient attention to the warnings for safe designing when using this products.

The storage period is less than 12 months. Be sure to follow the storage conditions (temperature: 5 to 40°C, humidity: 10 to 75% RH or less). If the storage period elapses, the soldering of the terminal electrodes may deteriorate.						
Do not use or store in locations where there are conditions such as gas corrosion (salt, acid, alkali, etc.).						
 Before soldering, be sure to preheat components. The preheating temperature should be set so that the temperature does not exceed 150°C. 	e difference between the solder temperature and chip temperature					
 Soldering corrections after mounting should be within the range of If overheated, a short circuit, performance deterioration, or lifespan 	-					
O When embedding a printed circuit board where a chip is mounted the overall distortion of the printed circuit board and partial distortion						
 Self heating (temperature increase) occurs when the power is tur design. 	rned ON, so the tolerance should be sufficient for the set thermal					
 Carefully lay out the coil for the circuit board design of the non-magnetic shield type. A malfunction may occur due to magnetic interference. 						
\bigcirc Use a wrist band to discharge static electricity in your body through	the grounding wire.					
O Do not expose the products to magnets or magnetic fields.						
O Do not use for a purpose outside of the contents regulated in the d	elivery specifications.
