New multi-functional & Economical PLC

- PLC
- HUMAN MACHINE INTERFACES
- ENERGY MANAGEMENT SOLUTIONS
- FA COMPONENTS
- MACHINE VISION SYSTEMS
- UV CURING SYSTEMS

Plenty of I/O points -150 points max.

L40□ / L60□

If the customer can not predict the number of I/O points needed by his machineries and devices in the future, he will feel hesitant and uncomfortable. But, the I/O number of **FP-X0** can reach 150 points max. by using the **FP-X** expansion unit. Therefore, the customer's discomfort and hesitation can be eliminated.

- The maximum number of expansion unit is up to 3 units.

The cable between the units can be bent to realize the side-by-side installation, thus saving the installation space.

- Applications
- PLC
- Software
- Program Transfer
- Others

Further expansion and more functions achieved by using the existing **FP0R** expansion unit easily

L40□ / L60□

The maximum number of **FP0R** expansion unit is up to 3 after all the control units are equipped with adapters. A wider range of application can be achieved by using [transistor output], [analog I/O], [thermocouple input] and [I/O LINK (network)].

Only one **FP0** expansion adapter can be installed on the control unit. In addition, two **FP-X** expansion units can be installed after the adapter is installed.

Besides the supplied expansion cable of 8 cm 3.150 in, 30 cm 11.811 in and 80 cm 31.496 in types are also sold separately. They can be bent or straightened. (The total extension length is within 160 cm 62.992 in.)

Both of them are 90 mm 3.543 in and can be installed in the cabinet.

- FP-e

Super-high processing speed

Super-high speed of 80 ns/step for 0 to 3,000 steps (ST command). 580 ns/step processing speed for 3,001 steps or more (Only for L40□ and L60□).

Pulse output function / High-speed counter function

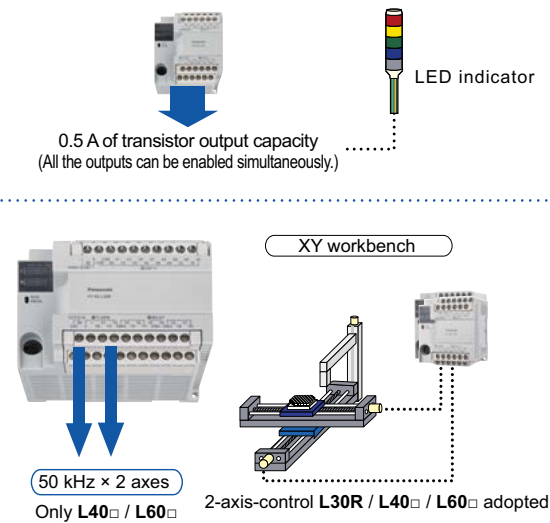

The pulse output function of **FP-X0** (1-axis for L14R and 2-axis for L30R / L40□ / L60□) is built in the body of the control unit. Compared with the previous PLC that must use the advanced or specific positioning units or more than two multi-axis control devices, **FP-X0** only uses one unit basically, thus saving the space and reducing the cost.

Built-in 4-point high-speed counter

4-point for 1-phase or 2-point for 2-phase (X0 to X3)

Body equipped with combined relay and transistor output

Adopting 2-axis linear interpolation L40□ / L60□

2-axis linear interpolation is a kind of function that controls 2 motor axes and makes the robot arm and tool head carry out diagonal line moving simultaneously, which is applied in the stacker's picking & mounting components, the control of XY workbench and the baseplate cutting etc.

PART NUMBER LIST

FP-X0 Control unit

Product name	Power supply	Specifications				Part No.
		Program capacity	Analog input	RS-485 communication		
FP-X0 L14R	100-240 V AC	24 V DC input, 8 points 0.5 A/5 to 24 V DC transistor output, 2 points 2 A relay output, 4 points	2.5 k steps	—	—	AFPX0L14R
FP-X0 L30R	100-240 V AC	24 V DC input, 16 points 0.5 A/5 to 24 V DC transistor output, 4 points 2 A relay output, 10 points	2.5 k steps	—	—	AFPX0L30R
FP-X0 L40R	100-240 V AC	24 V DC input, 24 points 0.5 A/5 to 24 V DC transistor output, 4 points 2 A relay output, 12 points	8 k steps	10 bits, 2 channels	—	AFPX0L40R
FP-X0 L40MR	100-240 V AC	24 V DC input, 24 points 0.5 A/5 to 24 V DC transistor output, 4 points 2 A relay output, 12 points	8 k steps	10 bits, 2 channels	Available	AFPX0L40MR
FP-X0 L60R	100-240 V AC	24 V DC input, 32 points 0.5 A/5 to 24 V DC transistor output, 4 points 2 A relay output, 24 points	8 k steps	10 bits, 2 channels	—	AFPX0L60R
FP-X0 L60MR	100-240 V AC	24 V DC input, 32 points 0.5 A/5 to 24 V DC transistor output, 4 points 2 A relay output, 24 points	8 k steps	10 bits, 2 channels	Available	AFPX0L60MR

Note: 24 V DC input: ± common

Expansion unit

FP-X expansion I/O unit and **FP0R** unit can be used. But **FP0** adapter for **FP-X** expansion are required when **FP0R** expansion units are used.

Software tools (Refer to operation manual for the details.)

Product name	Software classification	Part No.
FPWIN GR Ver. 2.91 over	Japanese version with supplied cable kit	AFPS10122
	English version Full type	AFPS10520
	Korean version	AFPS10920
FPWIN GR7 Ver. 2.14 over	Japanese version	AFPSGR7JP
	Security enhanced type	AFPSGR7JPS
	English version	AFPSGR7EN
FPWIN Pro7	Security enhanced type	AFPSGR7ENS
	Japanese, English, Chinese, Korean	AFPSPR7A

Program editing during Run		Available (Capacity modified simultaneously: 128 steps) But comments cannot be modified during the process.		Available (Capacity modified simultaneously: 512 steps) But comments can be modified during the process.					
Downloading during Run		Available							
High-speed counter (Note 3, 4)	Body input	1-phase, 4-channel (20 kHz max.) and 2-phase, 2-channel (20 kHz max.)		1-phase, 4-channel (50 kHz max.) and 2-phase, 2-channel (20 kHz max.)					
Pulse output/PWM output (Note 3, 4)	Body output	Pulse: 1-channel (20 kHz max.) PWM: 1-channel (1.6 kHz max.)	Pulse: 2-channel (20 kHz max.) PWM: 2-channel (1.6 kHz max.)	Pulse: 2-channel (50 kHz) PWM: 2-channel (3.0 kHz max.)					
Pulse catch input / Interrupt program		8 points (High-speed counting and interrupt input included)							
Periodical interrupt		0.5 ms unit: 0.5 ms to 1.5 sec., 10 ms unit: 10 ms to 30 sec.							
Analog input		—		2-channel (For inputting any of the following items in each channel) Potentiometer input Min. resistance value of potentiometer: 5 kΩ 10-bit resolution (K0 to K1000) Accuracy ± 1.0% F.S.+ accuracy of external resistors Thermistor input For inputting the resistance value of the thermistor (Min. resistance value of external thermistors + external resistance value > 2 kΩ) 10-bit resolution (K0 to K1023) Accuracy ± 1.0% F.S.+ accuracy of external thermistors Voltage input Absolute max. input voltage: 10 V 10-bit resolution (K0 to K1023) Accuracy ± 2.5% F.S. (F.S. = 10 V)					
		Calendar/clock		—		Available			
		Flash ROM backup (Note 5)	Backup made according to commands of F12 and P13	Data memory (2,500 words)		Data memory (8,192 words)			
			Automatic backup when power OFF	Counter: 6 points (C250 to C255) Process value of the counter: 6 points (EV250 to EV255) Internal relays: 5 points (WR58 to WR62) Data memory: 300 words (DT2200 to DT2499)		Counter: 16 points (C1008 to C1023) Process value of the counter: 16 points (EV1008 to EV1023) Internal relays: 8 points (WR248 to WR255) Data memory: 302 words (DT7890 to DT8191)			
Backup battery		—		Available (Backup lasting for the whole process)					
RS485 communication port		—		Available	—	Available			

- Notes: 1) The actual usable points depend on the combination of the hardware.
 2) The points of the timer can be added as required.
 3) The rated voltage is 24 V DC at +25 °C +77 °F. The frequency may fall according to the changes of the voltage, temperature and operating conditions.
 4) The maximum frequency may vary with the difference of the operating method.
 5) The allowable writing operation is within 10,000 times. Areas to be held and not held can be specified using the system registers.

SPECIFICATIONS

General specifications

Items	Specifications	
CE marking directive compliance	Low Voltage Directive, EMC Directive, RoHS Directive	
Operating temperature	0 to +55 °C +32 to +131 °F	
Storage temperature	-40 to +70 °C -40 to +158 °F	
Operating humidity	10 to 95% RH (at +25 °C +77 °F , no dew condensation allowed)	
Storage humidity	10 to 95% RH (at +25 °C +77 °F , no dew condensation allowed)	
Withstand voltage (Note 1,2)	Input terminals ⇔ Relay output terminals	
	All of the transistor output terminals ⇔ All of the relay output terminals	
	All of the input terminals ⇔ All of the power supply terminals and functional ground terminals	2,300 V AC, 1 minute
	All of the relay output terminals ⇔ All of the power supply terminals and functional ground terminals	
	All of the transistor output terminals ⇔ All of the power supply terminals and functional ground terminals	1,500 V AC, 1 minute
Insulation resistance (Note 1)	Power supply terminals ⇔ Ground terminals	
	Input terminals ⇔ Transistor output terminals	500 V AC, 1 minute
	Input terminals ⇔ Output terminals	100 MΩ min. (500 V DC insulation resistance meter)
	All of the transistor output terminals ⇔ All of the relay output terminals	
	All of the input terminals ⇔ All of the power supply terminals and functional ground terminals	
Vibration resistance	All of the output terminals ⇔ All of the power supply terminals and functional ground terminals	
	Power supply terminals ⇔ Ground terminals	5 to 8.4 Hz, 3.5 mm 0.138 in amplitude in one direction, 1 scan/1 minute
		8.4 to 150 Hz, fixed acceleration of 9.8 m/s ² , 1 scan/1 minute 10 minutes in X, Y, Z direction each
Shock resistance	147 m/s ² , 4 times in X, Y, Z directions each	
Noise immunity	1,500 V [p-p] pulse width 50 ns, 1 μs (Measured from noise simulation method AC power supply terminals)	
Operating environment	No corrosive gases or too much dust	
Overvoltage class	II	
Pollution level	2	
Net weight	L14R: 280 g approx., L30R: 450 g approx., L40R / L40MR: 530 g approx., L60R / L60MR: 730 g approx.	

Notes: 1) The programmable port, RS-485 communication port and the internal digital circuit part are non-insulation type.
2) The cut-off current is 5 mA (The default value when shipped from the factory).

Power supply specifications

AC power supply

Items	Specifications	
	L14R	L30R, L40R, L40MR, L60R, L60MR
Rated voltage	100-240 V AC	
Applied voltage range	85-264 V AC	
Inrush current	35 A max. (at 240 V AC and +25 °C +77 °F)	40 A max. (at 240 V AC and +25 °C +77 °F)
Momentary power off time	10 ms (when 100 V AC used)	
Frequency	50/60 Hz (47 to 63 Hz)	
Leakage current	0.75 mA max. between the input and protective ground terminals	
Service life of built-in power supply	20,000 h (at +55 °C +131 °F)	
Fuse	Built-in (replacement disabled)	
Insulation system	Transformer isolation	
Screw of terminal block	M3	

Universal power supply for input (output) (L30R / L40□ / L60□ only)

Items	Specifications
Rated output voltage	24 V DC
Applied voltage range	21.6 to 26.4 V DC
Rated output current	0.3 A
Overcurrent protection (Note)	Yes
Screw of terminal block	M3

Note: Output short protection is a temporary overcurrent protection. When the short is detected, all the power supplies of PLC will be turned OFF.
If the current load out of this specification is connected and in consecutive over-loaded status, failures may occur.
