

Series: DOMINO

Features:

PART NUMBER: W3796

- 3G/4G LTE antenna
- Fully SMT compatible
- RoHS compliant
- 40 x 7 x 3 mm
- Tape & Reel packing
- MSL-3
- Part numbers:
 - W3796
 - W3796NL
 - (for no Pulse Logo Version)

Applications:

- Devices requiring high performance compact internal 3G/4G antenna
- Suitable for 2xMiMo use when mounting two pcs W3769 onto radio board

Issue: 2045

OTHER SPECIFICATIONS

2.. W3796 Drop Test

The following sample/application is just for reference to show how to conduct the drop test when the PCB antennas W3796 is SMT on a PCB of a device.

Fig.1: Appearance photos of the samples before test.

Before assembly

assembled

Test Method: The whole assembly at 1 meter drop. A minimum of one drop per orientation - flat top, bottom, side and corner (a total of 4 drops). It's recommended to get one drop on flat top, bottom, all four flat sides and four top corners, a total of 10 drops. (Note: MIL STD and JASO D001-1994 cites to drop products on a 2 inch plywood backed by concrete floor)

P.S.:

When doing the structure design, please keep enough safe space between the W3796 and the housing, and also fix the PCB firmly in the housing to avoid any impact during the drop test.

Recommendation for reflow soldering process

Printing stencil thickness 0,15 - 0,25 mm is recommended for the solder paste. The maximum soldering temperature should not exceed 260°C. The temperature profile recommendations for reflow soldering process is presented in the Figures 1 and 2. The reflow profile presented in figure 1 describes minimum reflow temperatures. The reflow profile presented in figure 2 describes maximum reflow temperatures. located at the center of the coverage area.

	Method of heat transfer	Controlled hot air convection
1	Average temperature gradient in preheating	2.5 °C/s
2	Soak time	2-3 minutes
3	Max temperature gradient in reflow	3 °C/s
4	Time above 217 °C	Max 30 sec
5	Peak temperature in reflow	230 °C for 10 seconds
6	Temperature gradient in cooling	Max -5 °C/s
