Description

HAS dc-dc converters are low-cost, industry standard, half-brick converters. The HAS features 2:1 input voltage, excellent efficiency, and open-frame packaging technology. The HAS operates over a range of -40 °C to 100 °C and has a built-in input pi filter that helps to ensure low noise operation. Available in several input and output combinations, the HAS is designed for industrial, telecom, and networking applications.
