

### Overview

KEMET Z-PWZ Power Line High Impedance Ferrite Chip Beads are ideal for use in circuit designs that require high impedances and large currents to suppress radiated noise on power lines.

The chip size of this ferrite beads provide waveform correction of digital signals and high frequency noise suppression in various types of digital mobile equipments that require low power consumption.

### Applications

- PC, tablet, peripherals
- Differential transmission line on USB
- Optical storage, HDD
- RF circuits
- Digital still camera
- Network security
- Switching regulators

### Benefits

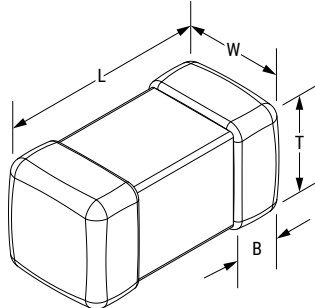

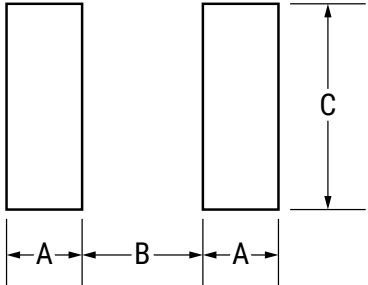

- High impedance
- Large withstand current
- High reliability and resistance to high energy
- Low stray capacitance due to wire wound structure
- Two materials available to choose from
- Impedance value from 32 – 2,000  $\Omega$
- Rated current range from 0.5 – 4 A
- Operating temperature range from -40°C to +125°C

### Part Number System

Z	0603	C	101	B	PWZ	T
Ferrite Bead	EIA Case Size (L" x W")	Specification	Impedance Value ( $\Omega$ ) at 100 MHz	Material	Series	Packaging
	0603 (1608 in mm) 0805 (2012 in mm) 0806 (2016 in mm) 1206 (3216 in mm) 1210 (3225 in mm) 1806 (4516 in mm) 1810 (4525 in mm) 1812 (4532 in mm)	C = Commercial	The first two digits represent the impedance value. The third digit indicates the number of zeros to be added.  Examples: 800 = 80 $\Omega$ 101 = 100 $\Omega$ 202 = 2000 $\Omega$	B = MHz range applications G = GHz range applications	PWZ = Power Line High Impedance Ferrite Chip Beads	T = Tape & Reel

## Dimensions – Millimeters (Inches)

Dimensions - Millimeters (Inches)						Land Pattern - Millimeters

## Performance Characteristics

Item	Performance Characteristics
Impedance Range at 100 MHz	30 – 2,000 $\Omega$
Impedance Tolerance at 100 MHz	$\pm 25\%$ and $\pm 30\%$
Impedance Range at 1 GHz	75 – 1,800 $\Omega$
Impedance Tolerance at 1 GHz	$\pm 40\%$
Rated Current Range	0.5 – 4 A maximum
Rated DC Resistance Range	0.02 – 0.45 $\Omega$ maximum
Operating Temperature Range	-40°C to +125°C (includes self temperature rise)

## Environmental Compliance

All KEMET Ferrite Beads are RoHS and REACH Compliant.

Table 1 – Ratings &amp; Part Number Reference

Part Number	Impedance ( $\Omega$ ) at 100 MHz	Impedance Tolerance	Impedance ( $\Omega$ ) at 1 GHz	Impedance Tolerance	Rated Current (A) Maximum	DC Resistance ( $\Omega$ ) Maximum

	Tolerance	±0.2	±0.1	±0.5	±0.8	±0.5		Maximum	±2.0

## Recommended Reflow Soldering Profile

## Handling Precautions

Ferrite chip beads should be stored in normal working environments. While these beads themselves are quite robust in other environments, exposure to high temperatures, high humidity, corrosive atmospheres, and long-term storage degrades solderability.

KEMET recommends that maximum storage temperature not exceed 40°C and maximum storage humidity not exceed 70% relative humidity. Atmospheres should be free of chlorine-bearing and sulfur-bearing compounds. Temperature fluctuations should be minimized to avoid condensation on the parts.

For optimized solderability, ferrite chip beads stock should be used promptly, preferably within six months of receipt.

### Disclaimer

All product specifications, statements, information and data (collectively, the "Information") in this datasheet are subject to change. The customer is responsible for checking and verifying the extent to which the Information contained in this publication is applicable to an order at the time the order is placed. All Information given herein is believed to be accurate and reliable, but it is presented without guarantee, warranty, or responsibility of any kind, expressed or implied.

Statements of suitability for certain applications are based on KEMET Electronics Corporation's ("KEMET") knowledge of typical operating conditions for such applications, but are not intended to constitute – and KEMET specifically disclaims – any warranty concerning suitability for a specific customer application or use. The Information is intended for use only by customers who have the requisite experience and capability to determine the correct products for their application. Any technical advice inferred from this Information or otherwise provided by KEMET with reference to the use of KEMET's products is given gratis, and KEMET assumes no obligation or liability for the advice given or results obtained.

Although KEMET designs and manufactures its products to the most stringent quality and safety standards, given the current state of the art, isolated component failures may still occur. Accordingly, customer applications which require a high degree of reliability or safety should employ suitable designs or other safeguards (such as installation of protective circuitry or redundancies) in order to ensure that the failure of an electrical component does not result in a risk of personal injury or property damage.

Although all product-related warnings, cautions and notes must be observed, the customer should not assume that all safety measures are indicated or that other measures may not be required.

When providing KEMET products and technologies contained herein to other countries, the customer must abide by the procedures and provisions stipulated in all applicable export laws and regulations, including without limitation the International Traffic in Arms Regulations (ITAR), the US Export Administration Regulations (EAR) and the Japan Foreign Exchange and Foreign Trade Act.
