

Slice Auto-Retractable Pen Cutter with Ceramic Blade

PRODUCT ID: 4307

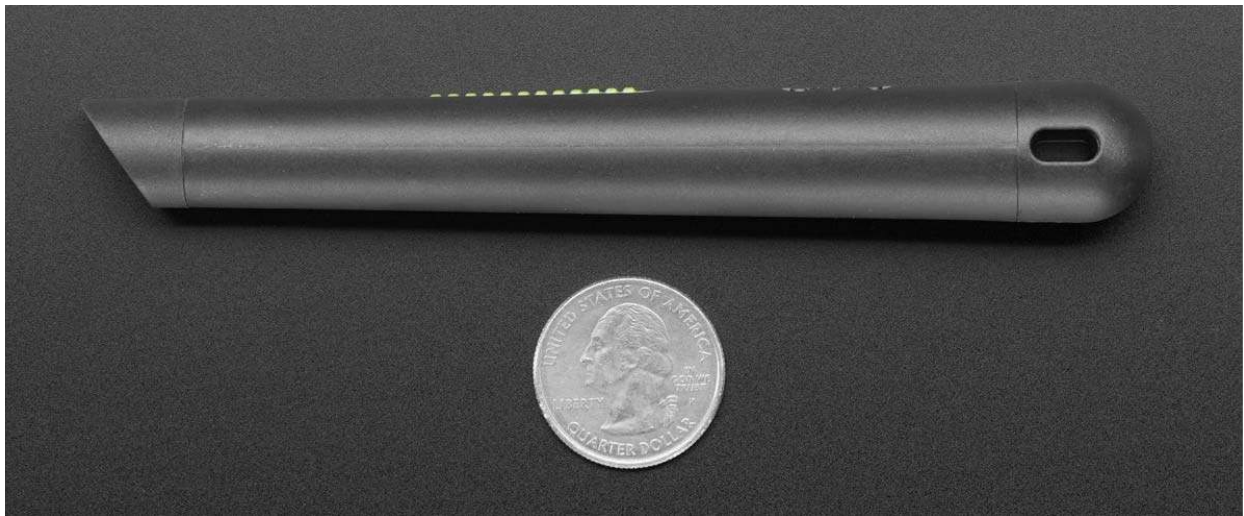

Cut through cardboard *like a boss* with the Slice Auto-Retractable Pen Cutter, a safer cutter with a ceramic blade. This handheld tool is way better than using scissors or a box cutter, and it's *a lot* harder to cut yourself by accident than metal blades (please don't *try* to cut yourself, you will eventually succeed!)

Ceramic blades are much safer than metal blades and are longer lasting than steel. This is the perfect pen cutter for cardboard-crafting-trashbot enthusiasts! The pen cutter's slim profile and handle shape make it ideal for hard-to-reach spots that need a lil' more maneuverability. It makes easy work out of cutting materials such as fiberglass, clamshell packaging, and adhesive vinyl. Ever get annoyed when the blade gets stuck to tape or adhesive? This ceramic blade takes that problem out of the equation.

Features

- Handle type: auto-retractable
- Handle features rubberized slider button
- Compatible blades: 10404, 10408
- Cut depth: 11mm
- Finger-friendly edge stays sharp 11x longer
- Non-sparking, non-conductive blade
