# ARMOR

## *Ruggedized Backshell System*

ARMOR D-Sub backshells are designed for rugged and robust applications including military, industrial, and aerospace. Featuring an all metal die cast housing, these backshells offer high reliability performance for the most challenging design applications.

### FEATURES & BENEFITS

- Available in 3 industry standard sizes  
(Standard: 9, 15, 25 | High Density: 15, 26, 44)
- Perimeter sealing lips for secure assembly
- Dual entry allows choice of entry options or use of 2 cable entries
- Die Cast metal shells provide excellent EMI/RFI shielding
- Plated with high quality nickel finish
- Available in a variety of cable entries
- Mechanical strain reliefs
- 4-40 mating hardware
