Schmartboard Development Board A for the Microchip 8 Bit PIC® Microcontroller

Schmartboard Development Board A for the 8 Bit PIC® Microcontroller

This Microchip PIC® Microcontroller Development board supports 116 different PIC® Microcontrollers. This board is fully populated except for the PIC. You hand solder the PIC using our "EZ" technology, configure the jumpers for your PIC part number and start programming. At a suggested retail of only \$15, no other PIC® development board can come close to giving you the flexibility and low cost as this product. This one board supports almost all of the 8 Bit PICs available in a 1.27mm pitch SOIC package type. (see list of supported devices)
