

128 MOTORIZED SOLDERING IRON TIP POLISHER

Product Description

The Aoyue 128 Tip Polisher is a must have accompaniment for modern soldering tools. With current lead-free policies and miniature surface mount components the need for precision soldering tips are essential in every electronics work place. Keep your tips clean and ready to use.

Key Features

- When used as a tip cleaning tool it effectively brushes away oxides and excess solder for perfect control of the amount of solder applied.
- Unlike wet sponges that drastically lower tip temperature when cleaning, the high speed brush system of the Aoyue 128 quickly whisks away the excess solder with minimal temperature variation on the tip.

Additional Information

- Runs on 110 or 220 volts.
