PRODUCT DESCRIPTION

The AWT6628A HELP4™ PA is a 4th generation HELP™ product for WCDMA devices operating in UMTS900 (Band 8). This PA incorporates ANADIGICS' HELP4™ technology to deliver exceptional efficiency at low power levels and low quiescent current without the need for external voltage regulators or converters. The device is manufactured using advanced InGaP-Plus™ HBT technology offering state-of-the-art reliability, temperature stability, and ruggedness. Three selectable bias modes that optimize efficiency for different output power levels and a shutdown mode with low leakage current increase handset talk and standby time. A “daisy chainable” directional coupler is integrated in the module, thus eliminating the need of an external coupler. The self-contained 3 mm x 3 mm x 1 mm surface mount package incorporates matching networks optimized for output power, efficiency, and linearity in a 50 Ω system.

Shutdown Mode

The power amplifier may be placed in a shutdown mode by applying logic low levels (see Operating Ranges table) to the V_{EN}, V_{MODE1} and V_{MODE2} voltages.

Bias Modes

The power amplifier may be placed in either Low, Medium or High Bias modes by applying the appropriate logic level (see Operating Ranges table)

to the V_{MODE} voltages. The Bias Control table below lists the recommended modes of operation for various applications.

Three operating modes are recommended to optimize current consumption. High Bias/High Power operating mode is for P_{OUT} levels ≥ 17 dBm. At ~ 17 dBm - 7 dBm, the PA should be “Mode Switched” to Medium Power Mode. For P_{OUT} levels $\leq \sim 7$ dBm, the PA can be switched to Low Power Mode for even lower quiescent current consumption.

Table 5: Bias Control

APPLICATION	P _{OUT} LEVELS	BIAS MODE	V _{EN}	V _{MODE1}	V _{MODE2}	V _{CC}	V _{BATT}
Low power (Low Bias Mode)	$\leq +7$ dBm	Low	+1.8 V	+1.8 V	+1.8 V	3.1 - 4.35 V	> 3.1 V
Med power (Medium Bias Mode)	> 6 dBm $\leq +17$ dBm	Low	+1.8 V	+1.8 V	0 V	3.1 - 4.35 V	> 3.1 V
High power (High Bias Mode)	$> +16$ dBm	High	+1.8 V	0 V	0 V	3.1 - 4.35 V	> 3.1 V
Shutdown	-	Shutdown	0 V	0 V	0 V	3.1 - 4.35 V	> 3.1 V
