

Easy Mount Cable Organizer Kit 50-3338-WH-KIT

50-3338-WH-KIT

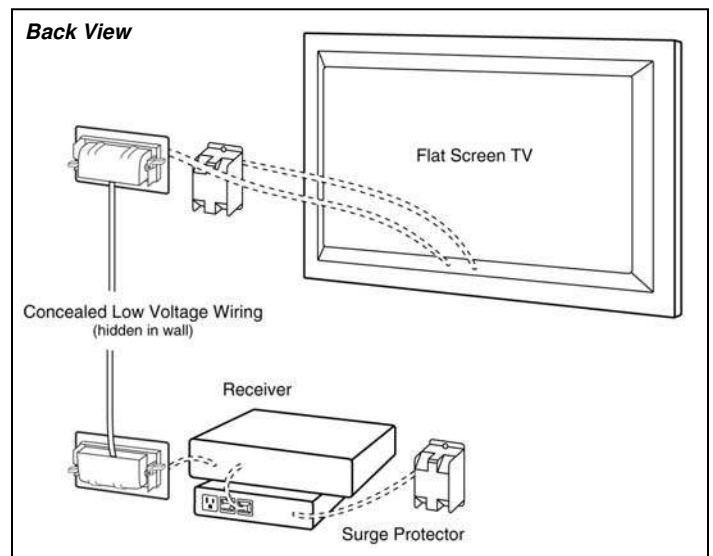

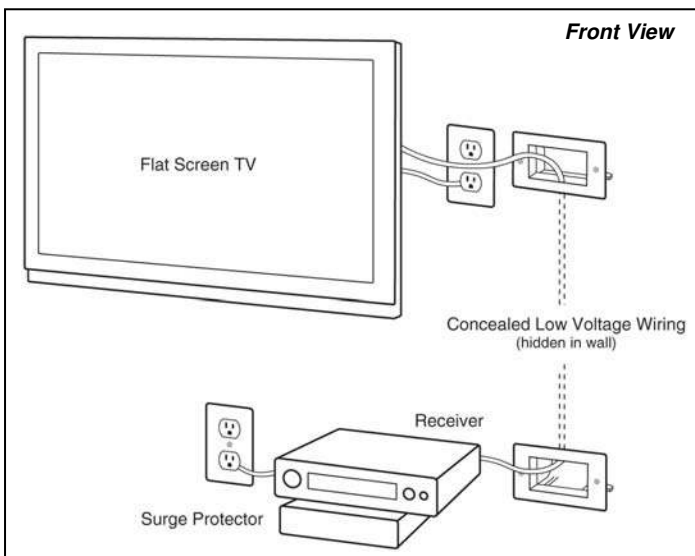

Use DataComm Electronics' new Easy Mount Cable Organizer Kit to install and hide unwanted audio/video (A/V) cables behind your flat panel TV, your amplifier or other audio/video devices. This kit brings a clean, professional image to your at-home installation.

The new Easy Mount Cable Organizer plates are designed to be installed without "Low Voltage Mounting Plates" or "Old Work Mud Rings". The mounting wings are molded into the Easy Mount wall plate (see Figure 1) and fasten tightly against the back of the drywall.

Determine the location of your flat panel TV, amplifier or audio/video device. Cut a hole in the wall and install the Easy Mount Cable Organizer Plate. Then simply pull your cables through the Easy Mount Plate. See diagrams below. The Easy Mount Cable Organizer Kit comes with simple instructions for a quick and easy installation.

National Electrical Code (NEC) does not allow the installation of the TV power cord or an extension cord behind the wall. These plates are designed for use with Low Voltage / Data Cables "Only".

U.S. Patent Number 7390964

RoHS Compliant
