

# RF Aerospace and Defense Solutions

Worldwide leader in RF power—the best  
choice for defense applications

Featuring New High Power GaN  
and LDMOS Devices

# Worldwide Industry Leader

NXP's RF power transistor products enable the majority of the world's cellular voice and data traffic every day, in the harshest environments on earth, making NXP the world's largest and most deployed supplier of RF power technology.

## RF Solutions for Aerospace and Defense

NXP offers diverse technologies such as industry-leading LDMOS, GaN and GaAs on SiC to provide the best technological solution for each customer application.

## Dedicated Aerospace and Defense Products Team

This team draws on NXP's wealth of RF technology, design and applications experience to offer optimum RF solutions for defense applications such as radar, communications and electronic warfare.

## NXP Advantages

- ▶ More than 20 years of RF industry leadership with the largest, most experienced RF engineering team in the world
- ▶ NXP owned and operated high-volume manufacturing
- ▶ U.S.-based company with U.S. LDMOS fab
- ▶ Dedicated, specialized RF packaging R&D team that has produced the industry's highest performance packaging solutions

### **Benefits of Choosing NXP RF Power for Your Defense Electronics Needs**

- ▶ Broad line of COTS products repurposed and enabled for optimum performance in aerospace and defense systems, including radar, communications and electronic warfare
- ▶ Dedicated team of experts in aerospace and defense systems, applications, marketing and program management who support aerospace and defense customer applications
- ▶ Broadest line of RF technologies and products, including LDMOS, GaN and GaAs
- ▶ Domestic source of LDMOS and GaN technology
- ▶ Security of supply with product longevity guarantee of 10 or 15 years
- ▶ ITAR-compliant applications support and secure technical data handling

### **NXP RF Power Technology Advantages**

- ▶ Highest RF ruggedness in the industry with > 65:1 sustained VSWR
- ▶ Highest gain and efficiency with LDMOS technology
- ▶ Widest bandwidth performance
- ▶ Broadest lines of packages, including high thermal efficiency over-molded plastic packages and low thermal resistance air cavity ceramic packages

### **GaN: A New Industry-Leading Product Line**

NXP's new best-in-class GaN products offer superior broadband performance, thermal efficiency, innovative packaging, and CW and long pulse performance that defense customers have been asking for.

Contact your dedicated NXP RF aerospace and defense team to request samples or early access to new products.

### **NXP, the Worldwide Leader in RF Power—the Best Choice for Defense Applications**

Questions? A new defense program challenge? A SWaP problem to solve? Contact NXP's dedicated RF aerospace and defense team at [RFMIL@nxp.com](mailto:RFMIL@nxp.com) for the best support and to enable your innovative solutions.

## RF Aerospace and Defense Power LDMOS Transistors: General Purpose, Radar and Communications

### General Purpose Driver ICs

RF Aerospace and Defense Power Portfolio

Industry-Leading Packaging

- ▶ Thermal performance leadership
- ▶ Package design
  - ▶ NXP's JEDEC-registered TO series is the only over-molded plastic package series specifically designed for high-power RF applications
    - Bolt down, clamp down and solder reflow mounting options
    - Low thermal resistance flange material
    - 225°C T<sub>j</sub> maximum operating temperature
    - Power dissipation capabilities >1 kW
    - In-package impedance matching
    - Low Au solderable finish for improved reliability
    - Plastic package with a larger contact area for optimal thermal performance
- ▶ Manufacturing
  - Automated high-volume assembly and test
  - Multiple manufacturing locations
- ▶ Materials
  - RoHS compliant

RF Aerospace and Defense Power Packages

### Why Choose NXP?

- ▶ Best-in-class RF performance
- ▶ Industry-leading package designs
- ▶ Reliable and repeatable RF performance
- ▶ Consistent high quality
- ▶ Proven long-term reliability
- ▶ High-volume manufacturing capability
- ▶ Assured long-term supply
- ▶ Comprehensive U.S. and Eurozone sales and design support

### Design Support

For information on design support for RF aerospace and defense products, visit [www.nxp.com/RFmilitary](http://www.nxp.com/RFmilitary).

- ▶ Application-specific reference designs
- ▶ Test and evaluation fixtures
- ▶ Fully validated RF high-power models for Keysight ADS and AWR Microwave Office®
- ▶ MTTF calculation programs
- ▶ 50 V RF LDMOS white paper
- ▶ Packaging and mounting application notes
- ▶ Thermal management application notes

### Sample/Buy

For ordering and availability, contact your local NXP sales office or NXP authorized distributor.
