

## Important notice

Dear Customer,

On 7 February 2017 the former NXP Standard Product business became a new company with the tradename **Nexperia**. Nexperia is an industry leading supplier of Discrete, Logic and PowerMOS semiconductors with its focus on the automotive, industrial, computing, consumer and wearable application markets

In data sheets and application notes which still contain NXP or Philips Semiconductors references, use the references to Nexperia, as shown below.

Instead of <http://www.nxp.com>, <http://www.philips.com/> or <http://www.semiconductors.philips.com/>, use <http://www.nexperia.com>

Instead of [sales.addresses@www.nxp.com](mailto:sales.addresses@www.nxp.com) or [sales.addresses@www.semiconductors.philips.com](mailto:sales.addresses@www.semiconductors.philips.com), use [salesaddresses@nexperia.com](mailto:salesaddresses@nexperia.com) (email)

Replace the copyright notice at the bottom of each page or elsewhere in the document, depending on the version, as shown below:

- © NXP N.V. (year). All rights reserved or © Koninklijke Philips Electronics N.V. (year). All rights reserved

Should be replaced with:

- © **Nexperia B.V. (year). All rights reserved.**

If you have any questions related to the data sheet, please contact our nearest sales office via e-mail or telephone (details via [salesaddresses@nexperia.com](mailto:salesaddresses@nexperia.com)). Thank you for your cooperation and understanding,

Kind regards,

Team Nexperia

Inverter/buffer drivers

Product data  
Supersedes data of 1992 Jul 24

2004 Mar 12

# Hex inverter/buffer drivers (open-collector)

# 74F07

## FEATURES

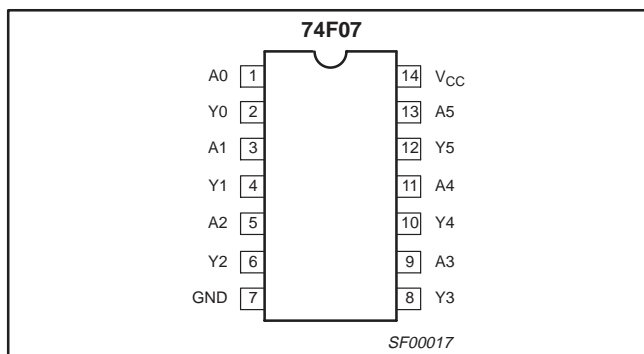

- Open Collector output drive 64mA
- High speed
- 12V output termination voltage

| TYPE  | TYPICAL PROPAGATION DELAY | TYPICAL SUPPLY CURRENT (TOTAL) |
|-------|---------------------------|--------------------------------|
| 74F07 | 4.5ns                     | 32mA                           |

## ORDERING INFORMATION

| DESCRIPTION                          | TYPE NUMBER | PKG DWG # |
|--------------------------------------|-------------|-----------|
| 14-pin plastic small outline package | N74F07D     | SOT108-1  |
| 14-pin plastic dual in-line package  | N74F07N     | SOT27-1   |

## PIN CONFIGURATIONS

## LOGIC SYMBOLS

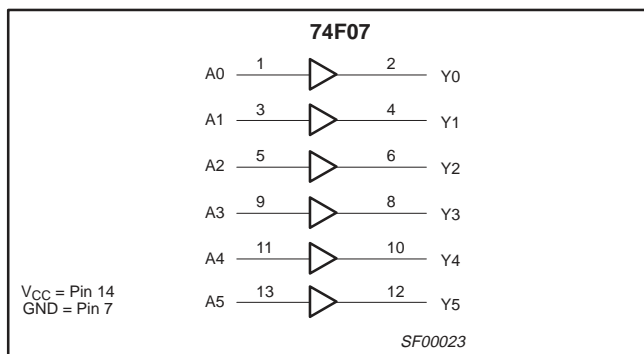

# Hex inverter/buffer drivers (open-collector)

74F07

## IEC/IEEE SYMBOLS

## LOGIC DIAGRAMS

## INPUT AND OUTPUT LOADING AND FAN OUT TABLE

| PINS | DESCRIPTION  | 74F (U.L.) HIGH/LOW | LOAD VALUE HIGH/LOW |
|------|--------------|---------------------|---------------------|
| An   | Data inputs  | 1.0/1.0             | 20µA/0.6mA          |
| Yn   | Data outputs | OC/106.7            | OC/64mA             |

**NOTES:**

- One (1.0) FAST unit load is defined as: 20µA in the High state and 0.6mA in the Low state.
- OC = Open Collector

## FUNCTION TABLE

| INPUTS | OUTPUTS |
|--------|---------|
| An     | Yn      |
| L      | L       |
| H      | H       |

**NOTES:**

- H = High voltage level
- L = Low voltage level

## Hex inverter/buffer drivers (open-collector)

74F07

**ABSOLUTE MAXIMUM RATINGS**

(Operation beyond the limit set forth in this table may impair the useful life of the device.  
Unless otherwise noted these limits are over the operating free air temperature range.)

| SYMBOL    | PARAMETER                                      | RATING       | UNIT |
|-----------|--|--------------|------|
| $V_{CC}$  | Supply voltage                                 | -0.5 to +7.0 | V    |
| $V_{IN}$  | Input voltage                                  | -0.5 to +7.0 | V    |
| $I_{IN}$  | Input current                                  | -30 to +5    | mA   |
| $V_{OUT}$ | Voltage applied to output in High output state | -0.5 to 12   | V    |
| $I_{OUT}$ | Current applied to output in Low output state  | 128          | mA   |
| $T_{amb}$ | Operating free air temperature range           | 0 to +70     | °C   |
| $T_{stg}$ | Storage temperature range                      | -65 to +150  | °C   |

**RECOMMENDED OPERATING CONDITIONS**

| SYMBOL    | PARAMETER                            | LIMITS |     |     | UNIT |
|-----------|--------------------------------------|--------|-----|-----|------|
|           |                                      | MIN    | NOM | MAX |      |
| $V_{CC}$  | Supply voltage                       | 4.5    | 5.0 | 5.5 | V    |
| $V_{IH}$  | High-level input voltage             | 2.0    |     |     | V    |
| $V_{IL}$  | Low-level input voltage              |        |     | 0.8 | V    |
| $I_{Ik}$  | Input clamp current                  |        |     | -18 | mA   |
| $V_{OH}$  | High-level output voltage            |        |     | 12  | V    |
| $I_{OL}$  | Low-level output current             |        |     | 64  | mA   |
| $T_{amb}$ | Operating free air temperature range | 0      |     | +70 | °C   |

## Hex inverter/buffer drivers (open-collector)

74F07

**DC ELECTRICAL CHARACTERISTICS**

(Over recommended operating free-air temperature range unless otherwise noted.)

| SYMBOL   | PARAMETER                              | TEST CONDITIONS <sup>1</sup>  | LIMITS                |                   |      | UNIT          |    |
|----------|--|---|-----------------------|-------------------|------|---------------|----|
|          |  |   | MIN                   | TYP <sup>2</sup>  | MAX  |               |    |
| $I_{OH}$ | High-level output current              | $V_{CC} = \text{MIN}, V_{IL} = \text{MAX},$<br>$V_{OH} = \text{MAX}, V_{IH} = \text{MIN}$ |                       |                   | 250  | $\mu\text{A}$ |    |
| $V_{OL}$ | Low-level output voltage               | $V_{CC} = \text{MIN},$<br>$V_{IL} = \text{MAX},$<br>$V_{IH} = \text{MIN}$                 | $I_{OL} = \text{MAX}$ | $\pm 10\% V_{CC}$ | 0.30 | 0.50          | V  |
|          |  |   |                       | $\pm 5\% V_{CC}$  | 0.30 | 0.50          | V  |
| $V_{IK}$ | Input clamp voltage                    | $V_{CC} = \text{MIN}, I_I = I_{IK}$   |                       | -0.73             | -1.2 | V             |    |
| $I_I$    | Input current at maximum input voltage | $V_{CC} = \text{MAX}, V_I = 7.0\text{V}$  |                       |                   | 100  | $\mu\text{A}$ |    |
| $I_{IH}$ | High-level input current               | $V_{CC} = \text{MAX}, V_I = 2.7\text{V}$  |                       |                   | 20   | $\mu\text{A}$ |    |
| $I_{IL}$ | Low-level input current                | $V_{CC} = \text{MAX}, V_I = 0.5\text{V}$  |                       |                   | -0.6 | mA            |    |
| $I_{CC}$ | Supply current (total)                 | $V_{CC} = \text{MAX}$   | $I_{CCH}$             |                   | 10   | 14            | mA |
|          |  |   | $I_{CCL}$             |                   | 32   | 45            | mA |

**NOTES:**

- For conditions shown as MIN or MAX, use the appropriate value specified under recommended operating conditions for the applicable type.
- All typical values are at  $V_{CC} = 5\text{V}, T_{\text{amb}} = 25^\circ\text{C}$ .
- Not more than one output should be shorted at a time. For testing  $I_{OS}$ , the use of high-speed test apparatus and/or sample-and-hold techniques are preferable in order to minimize internal heating and more accurately reflect operational values. Otherwise, prolonged shorting of a High output may raise the chip temperature well above normal and thereby cause invalid readings in other parameter tests. In any sequence of parameter tests,  $I_{OS}$  tests should be performed last.

**AC ELECTRICAL CHARACTERISTICS**

# Hex inverter/buffer drivers (open-collector)

74F07

## TYPICAL PROPAGATION DELAYS VERSUS LOAD FOR OPEN COLLECTOR OUTPUTS

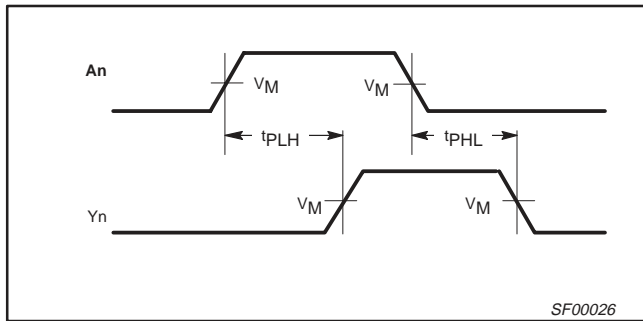

**NOTE:**

When using Open-Collector parts, the value of the pull-up resistor greatly affects the value of the t<sub>PLH</sub>. For example, changing the specified pull-up resistor value from 500Ω to 100Ω will improve the t<sub>PLH</sub> up to 50% with only a slight increase in the t<sub>PHL</sub>. However, if the value of the pull-up resistor is changed, the user must make certain that the total I<sub>OL</sub> current through the resistor and the total I<sub>IL</sub>'s of the receivers does not exceed the I<sub>OL</sub> maximum specification.

# Hex inverter/buffer drivers (open-collector)

74F07

## AC WAVEFORMS

**Waveform 1. Propagation delay for non-inverting outputs**

**NOTE:**

For all waveforms,  $V_M = 1.5V$ .

## TEST CIRCUIT AND WAVEFORMS

**Test Circuit for Open Collector Outputs**

**DEFINITIONS:**

- $R_L$  = Load resistor; see AC electrical characteristics for value.
- $C_L$  = Load capacitance includes jig and probe capacitance; see AC electrical characteristics for value.
- $R_T$  = Termination resistance should be equal to  $Z_{OUT}$  of pulse generators.

**Input Pulse Definition**

| family | INPUT PULSE REQUIREMENTS |       |           |       |           |           |
|--------|--------------------------|-------|-----------|-------|-----------|-----------|
|        | amplitude                | $V_M$ | rep. rate | $t_w$ | $t_{TLH}$ | $t_{THL}$ |
| 74F    | 3.0V                     | 1.5V  | 1MHz      | 500ns | 2.5ns     | 2.5ns     |

## Data sheet status

| Level | Data sheet status <sup>[1]</sup> | Product status <sup>[2] [3]</sup> | Definitions  |
|-------|----------------------------------|-----------------------------------|--|
| I     | Objective data                   | Development                       | This data sheet contains data from the objective specification for product development. Philips Semiconductors reserves the right to change the specification in any manner without notice.  |
| II    | Preliminary data                 | Qualification                     | This data sheet contains data from the preliminary specification. Supplementary data will be published at a later date. Philips Semiconductors reserves the right to change the specification without notice, in order to improve the design and supply the best possible product.             |
| III   | Product data                     | Production                        | This data sheet contains data from the product specification. Philips Semiconductors reserves the right to make changes at any time in order to improve the design, manufacturing and supply. Relevant changes will be communicated via a Customer Product/Process Change Notification (CPCN). |

[1] Please consult the most recently issued data sheet before initiating or completing a design.

[2] The product status of the device(s) described in this data sheet may have changed since this data sheet was published. The latest information is available on the Internet at URL <http://www.semiconductors.philips.com>.

[3] For data sheets describing multiple type numbers, the highest-level product status determines the data sheet status.

## Definitions

**Short-form specification** — The data in a short-form specification is extracted from a full data sheet with the same type number and title. For detailed information see the relevant data sheet or data handbook.

**Limiting values definition** — Limiting values given are in accordance with the Absolute Maximum Rating System (IEC 60134). Stress above one or more of the limiting values may cause permanent damage to the device. These are stress ratings only and operation of the device at these or at any other conditions above those given in the Characteristics sections of the specification is not implied. Exposure to limiting values for extended periods may affect device reliability.

**Application information** — Applications that are described herein for any of these products are for illustrative purposes only. Philips Semiconductors make no representation or warranty that such applications will be suitable for the specified use without further testing or modification.

## Disclaimers

**Life support** — These products are not designed for use in life support appliances, devices, or systems where malfunction of these products can reasonably be expected to result in personal injury. Philips Semiconductors customers using or selling these products for use in such applications do so at their own risk and agree to fully indemnify Philips Semiconductors for any damages resulting from such application.

**Right to make changes** — Philips Semiconductors reserves the right to make changes in the products—including circuits, standard cells, and/or software—described or contained herein in order to improve design and/or performance. When the product is in full production (status 'Production'), relevant changes will be communicated via a Customer Product/Process Change Notification (CPCN). Philips Semiconductors assumes no responsibility or liability for the use of any of these products, conveys no license or title under any patent, copyright, or mask work right to these products, and makes no representations or warranties that these products are free from patent, copyright, or mask work right infringement, unless otherwise specified.
