SITOP PSU3400/1ACDC/DC24V/2.5A

SITOP PSU3400 uni 24 V/2.5 A Stabilized power supply Input: 230 V AC (88...264 V) input: 24 V DC (18...264 V) output: 24 V DC/2.5 A

Input	
type of the power supply network	1-phase AC or DC
supply voltage at AC	
 minimum rated value 	120 V
 maximum rated value 	240 V
• initial value	88 V; Startup as of 18 V
• full-scale value	264 V
supply voltage	
• at DC	24 24 V
input voltage	
• at DC	18 264 V
design of input wide range input	Yes
overvoltage overload capability	-
operating condition of the mains buffering	at Vin rated
buffering time for rated value of the output current in the event of power failure minimum	5 ms
operating condition of the mains buffering	at Vin rated
line frequency	
1 rated value	50 Hz
2 rated value	60 Hz
line frequency	47 63 Hz
input current	
at rated input voltage 24 V	1.9 A
current limitation of inrush current at 25 °C maximum	15 A
12t value maximum	0.09 A ² ·s
fuse protection type	15 A (not accessible), breaking capacity 100 A
• in the feeder	Recommended miniature circuit breaker: 16 A characteristic B or C
Output	
voltage curve at output	Controlled, isolated DC voltage
output voltage at DC rated value	24 V
output voltage	
at output 1 at DC rated value	24 V
relative overall tolerance of the voltage	1 %
relative control precision of the output voltage	
 on slow fluctuation of input voltage 	0.1 %
 on slow fluctuation of ohm loading 	0.2 %
residual ripple	
• maximum	150 mV
• typical	30 mV
voltage peak	

• maximum	250 mV
• typical	70 mV
adjustable output voltage	24 28 V
product function output voltage adjustable	Yes
type of output voltage setting	via potentiometer
display version for normal operation	Green LED for 24 V OK
behavior of the output voltage when switching on	No overshoot of Vout (soft start)
response delay maximum	0.5 s
voltage increase time of the output voltage	
• typical	10 ms
maximum	20 ms
output current	
rated value	2.5 A
rated range	0 3.5 A; +60 to +70 °C: without derating
supplied active power typical	85 W
product feature	
 bridging of equipment 	Yes
number of parallel-switched equipment resources for increasing the power	2
Efficiency	
efficiency in percent	85 %
power loss [W]	
at rated output voltage for rated value of the output current typical	7 W
 during no-load operation maximum 	1.5 W
Closed-loop control	
relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical	0.3 %
relative control precision of the output voltage load step of resistive load 50/100/50 % typical	2 %
setting time	
setting time	
• load step 50 to 100% typical	1 ms
	1 ms 1 ms
• load step 50 to 100% typical	
load step 50 to 100% typicalload step 100 to 50% typical	
load step 50 to 100% typical load step 100 to 50% typical Protection and monitoring	1 ms
load step 50 to 100% typical load step 100 to 50% typical Protection and monitoring design of the overvoltage protection	1 ms Ua < 35 V
load step 50 to 100% typical load step 100 to 50% typical Protection and monitoring design of the overvoltage protection response value current limitation typical	1 ms Ua < 35 V 3.8 A
load step 50 to 100% typical load step 100 to 50% typical Protection and monitoring design of the overvoltage protection response value current limitation typical property of the output short-circuit proof	1 ms Ua < 35 V 3.8 A Yes
load step 50 to 100% typical load step 100 to 50% typical Protection and monitoring design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection	1 ms Ua < 35 V 3.8 A Yes Electronic shutdown, automatic restart
load step 50 to 100% typical load step 100 to 50% typical Protection and monitoring design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection display version for overload and short circuit	1 ms Ua < 35 V 3.8 A Yes Electronic shutdown, automatic restart
load step 50 to 100% typical load step 100 to 50% typical Protection and monitoring design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection display version for overload and short circuit Safety	1 ms Ua < 35 V 3.8 A Yes Electronic shutdown, automatic restart Yellow LED overload
load step 50 to 100% typical load step 100 to 50% typical Protection and monitoring design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection display version for overload and short circuit Safety galvanic isolation between input and output	1 ms Ua < 35 V 3.8 A Yes Electronic shutdown, automatic restart Yellow LED overload Yes
load step 50 to 100% typical load step 100 to 50% typical Protection and monitoring design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection display version for overload and short circuit Safety galvanic isolation between input and output galvanic isolation	1 ms Ua < 35 V 3.8 A Yes Electronic shutdown, automatic restart Yellow LED overload Yes Safety extra low output voltage Vout according to EN 60950-1
load step 50 to 100% typical load step 100 to 50% typical Protection and monitoring design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection display version for overload and short circuit Safety galvanic isolation between input and output galvanic resource protection class	1 ms Ua < 35 V 3.8 A Yes Electronic shutdown, automatic restart Yellow LED overload Yes Safety extra low output voltage Vout according to EN 60950-1 Class III
load step 50 to 100% typical load step 100 to 50% typical Protection and monitoring design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection display version for overload and short circuit Safety galvanic isolation between input and output galvanic isolation operating resource protection class protection class IP Approvals	1 ms Ua < 35 V 3.8 A Yes Electronic shutdown, automatic restart Yellow LED overload Yes Safety extra low output voltage Vout according to EN 60950-1 Class III
load step 50 to 100% typical load step 100 to 50% typical Protection and monitoring design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection display version for overload and short circuit Safety galvanic isolation between input and output galvanic isolation operating resource protection class protection class IP Approvals certificate of suitability	1 ms Ua < 35 V 3.8 A Yes Electronic shutdown, automatic restart Yellow LED overload Yes Safety extra low output voltage Vout according to EN 60950-1 Class III
load step 50 to 100% typical load step 100 to 50% typical Protection and monitoring design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection display version for overload and short circuit Safety galvanic isolation between input and output galvanic isolation operating resource protection class protection class IP Approvals certificate of suitability © CE marking	1 ms Ua < 35 V 3.8 A Yes Electronic shutdown, automatic restart Yellow LED overload Yes Safety extra low output voltage Vout according to EN 60950-1 Class III IP20 Yes
load step 50 to 100% typical load step 100 to 50% typical Protection and monitoring design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection display version for overload and short circuit Safety galvanic isolation between input and output galvanic isolation operating resource protection class protection class IP Approvals certificate of suitability CE marking UL approval	1 ms Ua < 35 V 3.8 A Yes Electronic shutdown, automatic restart Yellow LED overload Yes Safety extra low output voltage Vout according to EN 60950-1 Class III IP20 Yes Yes; cULus-Listed (UL 508, CSA C22.2 No. 107.1), File E197259
load step 50 to 100% typical load step 100 to 50% typical Protection and monitoring design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection display version for overload and short circuit Safety galvanic isolation between input and output galvanic isolation operating resource protection class protection class IP Approvals certificate of suitability	1 ms Ua < 35 V 3.8 A Yes Electronic shutdown, automatic restart Yellow LED overload Yes Safety extra low output voltage Vout according to EN 60950-1 Class III IP20 Yes
load step 50 to 100% typical load step 100 to 50% typical Protection and monitoring design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection display version for overload and short circuit Safety galvanic isolation between input and output galvanic isolation operating resource protection class protection class IP Approvals certificate of suitability	Ua < 35 V 3.8 A Yes Electronic shutdown, automatic restart Yellow LED overload Yes Safety extra low output voltage Vout according to EN 60950-1 Class III IP20 Yes Yes; cULus-Listed (UL 508, CSA C22.2 No. 107.1), File E197259 Yes; cULus-Listed (UL 508, CSA C22.2 No. 107.1), File E197259 No
