

Automation for a Changing World

## **Delta Basic Compact Drive ME300 Series**

# Compact and Intelligent

## The new standard for micro drives

The automation industry today is facing challenges such as increasing competition and rising costs. In addition to improving productivity and reducing direct labor, the driving force for automation is to achieve higher efficiency, optimal quality, and most importantly, flexibility and compatibility for a wide range of applications.

Delta's ME300 series is the new generation compact vector control drive that inherits Delta's superior drive technology with 60% volume reduction. Various essential functions are built-in as standard, including: user-defined parameter group, single and multi-pump function, built-in brake chopper and EMC filter (C2 Class). It reduces the need of additional expense and provides more installation space in the control cabinet. The ME300 also supports both induction and interior/surface permanent motors, providing more efficiency and flexibility. The STO function ensures smooth operation while protecting facilities from damage, and the new screw-less wiring design of terminal blocks offers a simplified wiring process for quick installation.

User-friendly operation, ultra-compact size, quick installation, and flexible, durable design provide the user with a highly efficient and stable system. The ME300 is your key to increased market competitiveness that leads the way to your success.

03

## Models Overview

- 
- Hardware Design
  - Side-by-side Installation
  - Standard Models

06

## Strong System Support

- 
- Pump Control
  - Multi-pump Control
  - Pulse Input
  - Built-in Modbus Communication
  - Built-in Braking Chopper
  - High Overload Capability
  - Common DC Bus

05

## Outstanding Drive Performance

- 
- Supports IM and PM Motors
  - High Starting Torque
  - Deceleration Energy Backup (DEB)
  - Enhanced Braking Capability

07

## Stable, Safe and Reliable

- 
- Safe Torque Off
  - PCB Coating
  - NEMA1 Kit (Optional)
  - Built-in EMC Filter

08

## Easy Set Up

- 
- Application Groups (Macro)
  - Screwless Wiring of Control Terminal

09

## Wide Range of Applications

- 
- Single / Multi-pumps
  - Conveyors
  - Fans
  - Woodworking Machines
  - Packaging Machines
  - Textile Machines

11

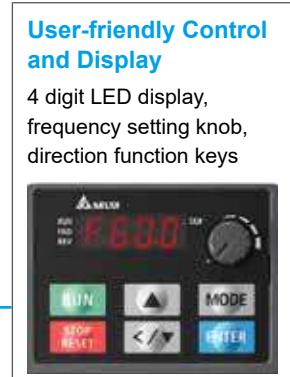

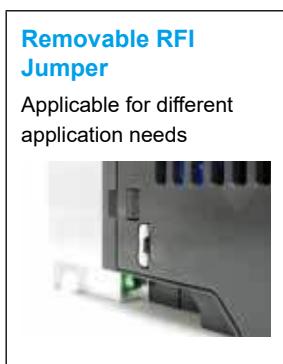

## Specifications

  - Ordering Information

# Models Overview

## Hardware Design

Compact design and user-friendly interface

\* Up to 60% size reduction compared with corresponding ratings of Delta's VFD-EL Series

## Side-by-Side Installation

Flexible and efficient installation supports side-by-side installation with operating temperature of -20°C ~ 40°C

**Substantial space savings!**

## Standard Models

### 115V single-phase

<b>Applicable Motor Output (kW)</b>	<b>0.1</b>	<b>0.2</b>	<b>0.4</b>	<b>0.75</b>

<b>Frame Size</b>		<b>B</b>		<b>C</b>		<b>D</b>	

# Outstanding Drive Performance

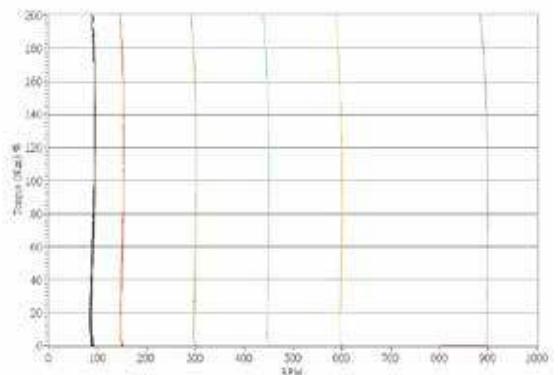

## Supports IM and PM Motors

Supports 2 independent induction motor control parameter sets

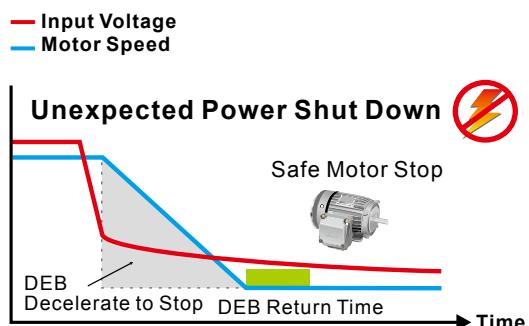

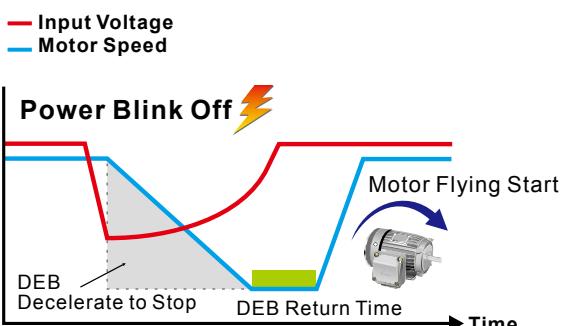

## High Starting Torque

Delivers 200% high starting torque with a low speed control of 3Hz. This feature provides outstanding machine stability and is suitable for dynamic loading applications

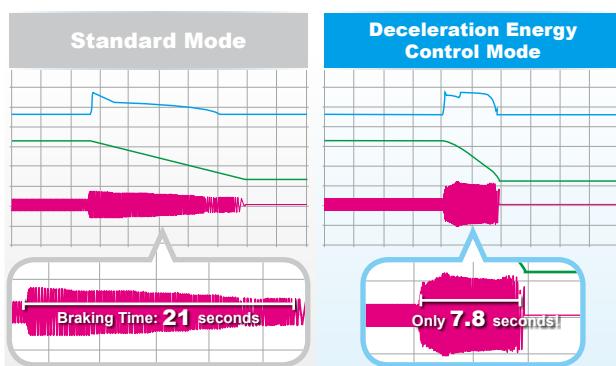

## Deceleration Energy Backup (DEB)

Controls the motor deceleration to a stop when an unexpected power shut-down occurs to prevent mechanical damage. When power resumes, the motor will accelerate to its previous speed

## Enhanced Braking Capability

The Deceleration Energy Control Mode shortens braking time by adjusting the motor speed and current, and replaces the need for braking resistors

\* Actual deceleration performance varies upon different system loads

# Strong System Support

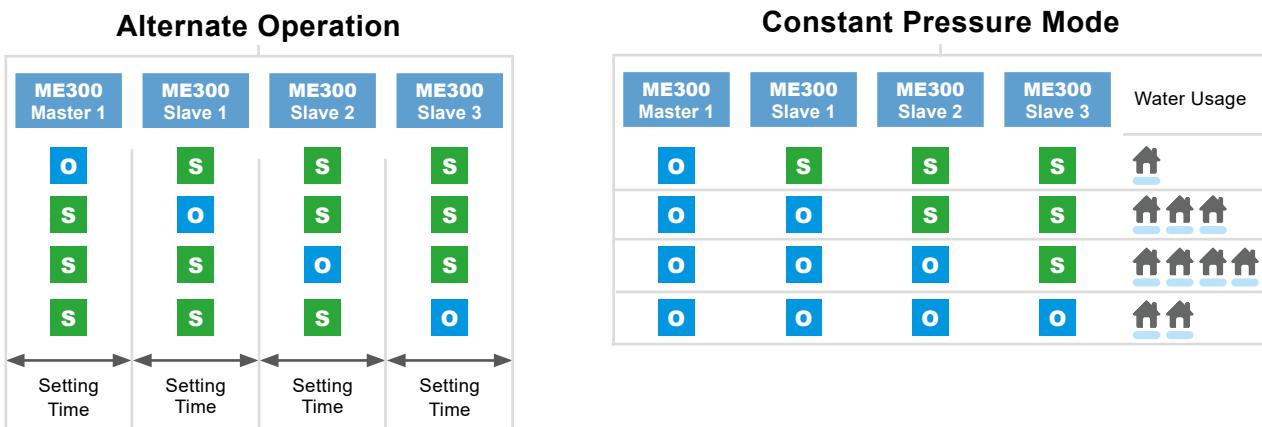

## Pump Control

- Sleep Mode & Leakage Detection: When the system is at constant pressure, the ME300 will enter / stay in sleep mode to prevent frequent starting and stopping (Proper parameter settings required)
- Dry-run Detection: When the water supply is off, the ME300 will decelerate to stop to protect pump from dry-run

## Multi-pump Control

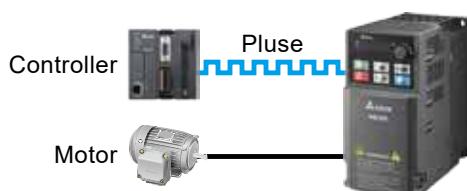

- Alternate Operation: Alternates pump operation in cycles. Cycle can be set by hours, days or weeks
- Constant Pressure Mode: Provides consistent energy-efficient water supply by adjusting operating pump quantities based on real-time demands

ME300 Status    O Operating    S Standby

## Pulse Input

Supports single pulse and PWM input (10 kHz) from controller as frequency command

## High Overload Capability

- Normal duty: rated current 120% for 60 seconds; 150% for 3 seconds
- Heavy duty: rated current 150% for 60 seconds; 200% for 3 seconds

## Built-in Modbus Communication

Built-in RS-485 (Modbus) communication

## Built-in Braking Chopper

Larger braking torque capability with an additional braking resistor

## Common DC Bus

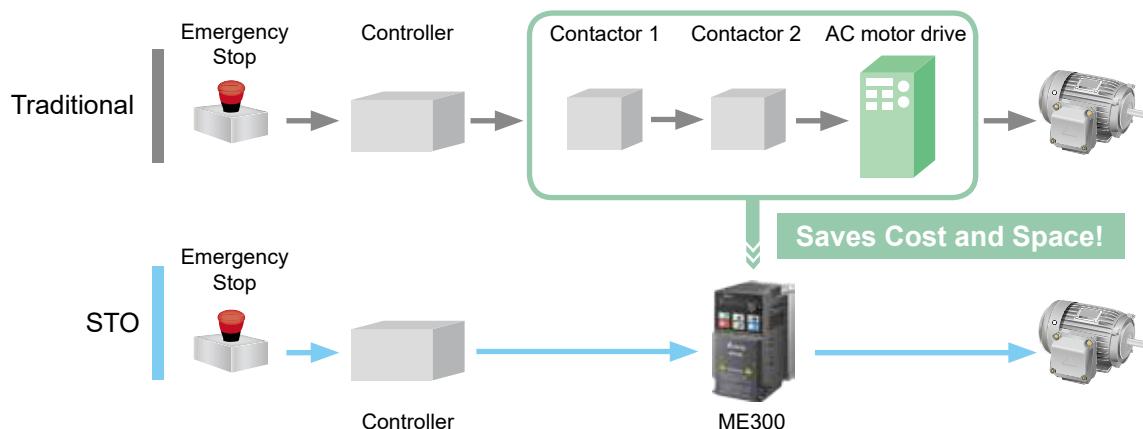

DC ± terminals for common DC bus wiring; the drives share the regeneration power during deceleration to save energy and the braking resistor

# Stable, Safe and Reliable

## Safe Torque Off

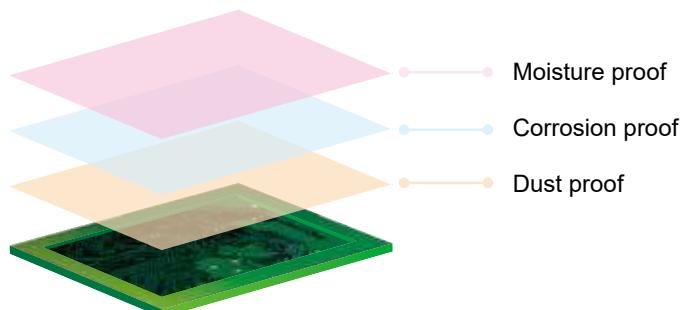

Compliant with:

- ISO 13849-1:2015 Category 3 PL d
- EN 61508 SIL2
- EN 60204-1 Category 0
- EN 62061 SIL CL 2

## PCB Coating

100% PCB coating (IEC 60721-3-3 class 3C2 standard) ensures drive operation stability and safety in critical environments

## NEMA 1 Kit (Optional)

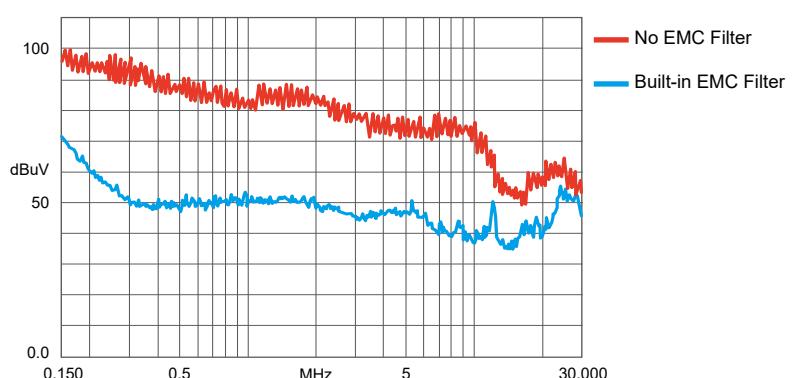

Provides NEMA 1 kit to prevent dust and other particles from entering the drive and avoids risk from electric shock. It is suitable for applications under critical conditions

## Built-in EMC Filter

Built-in Class A (C2)\* standard EMC filter saves additional procurement cost and wiring time, and provides more cabinet space for other devices to use

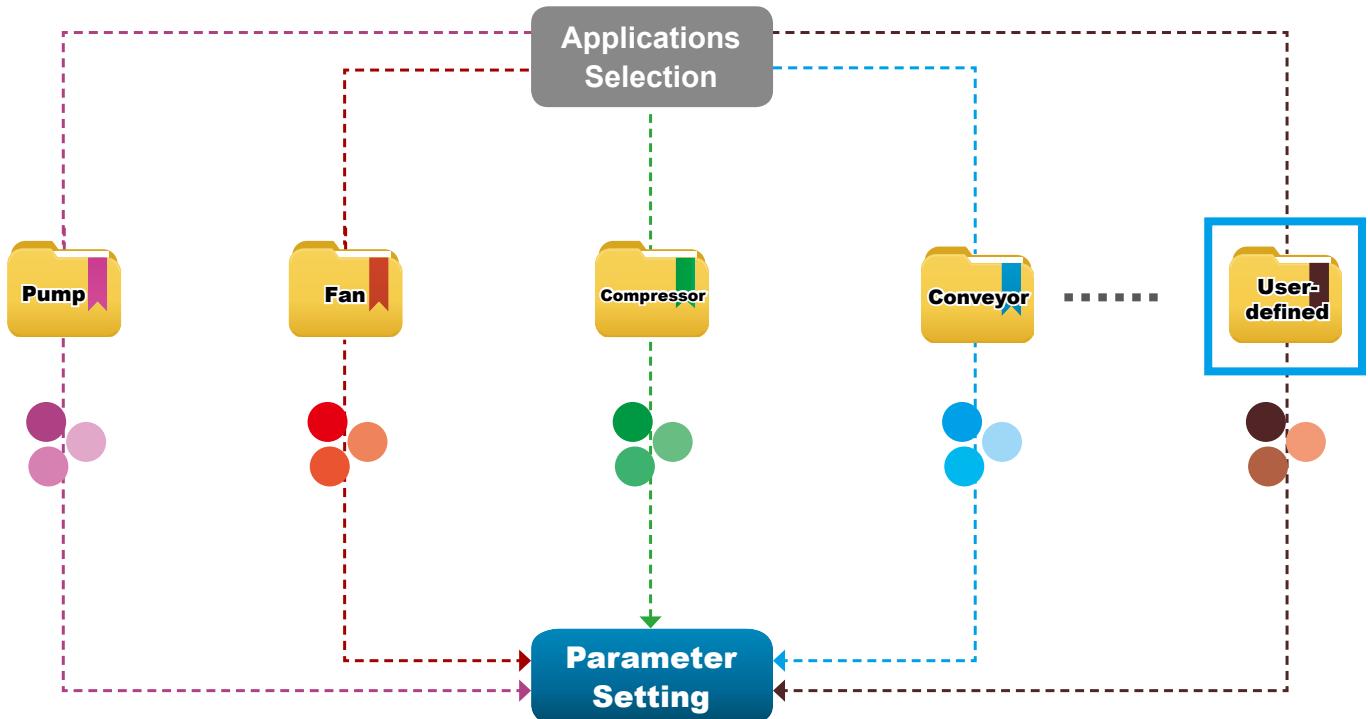

\*Class A (C3) for 400V models

# Easy Set Up

## Application Groups (Macro)

- Simplifies the parameter setting process by grouping the parameters for different applications to use
- Users can establish own parameter group for different customer or equipment
- User-defined parameter values can be retained when resetting to default

## Screwless Wiring of Control Terminal

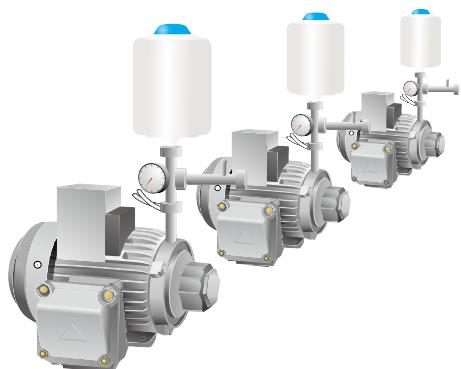

Spring clamp terminal blocks provide fast and easy wiring

# Wide Range of Applications

## Single / Multi-pumps

- Built-in PID feedback control, no additional PID controller required
- Supports multi-pumps (constant pressure) and alternate operation
- Equipped with liquid leakage detection function and sleep mode
- Displays actual and target value at the same time for easy operation
- Pump or self-defined parameter groups for easy setting
- Wide range voltage input for various types of pumps and areas

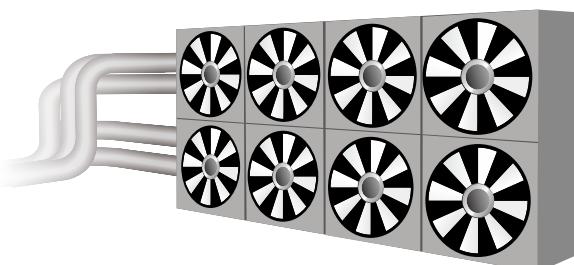

## Conveyors

- VR knob for easy adjustment
- High starting torque: up to 200% at 0.5 Hz
- Outstanding acceleration / deceleration performance improves production efficiency
- Built-in braking chopper saves space and purchasing costs
- 2 sets of motor parameters for more flexibility
- Compact design for space savings
- STO function enhances system safety

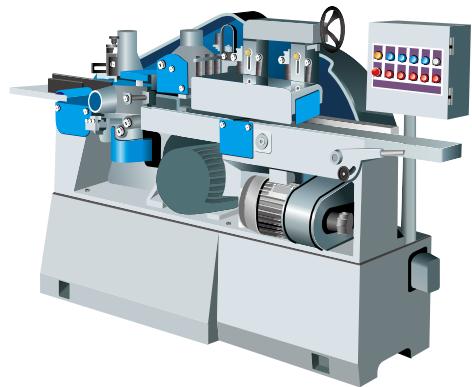

## Fans

- Supports both induction motor and permanent motor (IPM/SPM)
- VR knob for easy adjustment
- Speed search function allows motor start without stopping
- Optimized hardware layout and anti-pollution design resist dust and fiber
- Compact design for space savings

## Woodworking Machines

- Outstanding acceleration / deceleration performance improves production efficiency
- STO function enhances system safety
- Built-in EMC filter effectively reduces electromagnetic interference
- Compact in size and weight, easy to install and maintain

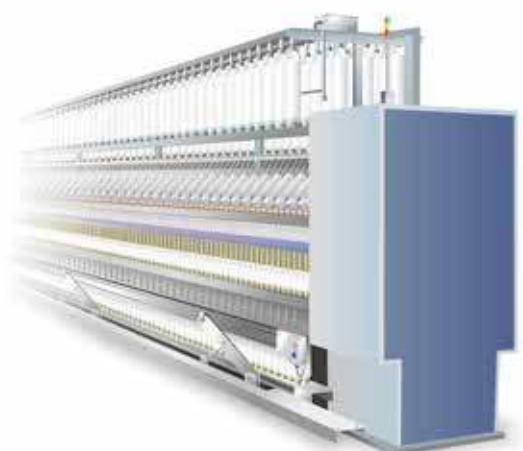

## Packaging Machines

- Compact design provides more cabinet space
- STO function enhances system safety
- Built-in braking chopper saves system construction cost
- Built-in RS-485 (Modbus)
- Supports high speed pulse and PWM input as frequency command to improve control precision

## Textile Machines

- Optional NEMA1 kit provides excellent protection in environment with dust, fiber and moisture
- Improved heatsink design prevents fiber clogging the air way; modular design of fan is easy to clean and provides longer lifetime
- Improved braking capability shortens the deceleration to stop time, suitable for sudden stop requirements
- Deceleration to stop function protects the equipment from damage when sudden power failure occurs
- STO function enhances system safety
- Supports both induction motors and permanent motors (IPM/SPM)

# Specifications

## General Specifications and Accessories

Control Functions	Control Methods	V/F, SVC
	Applicant Motors	Induction motor (IM), interior permanent magnet (IPM) motor, surface permanent magnet (SPM) motor
	Max. Output Frequency	0.00 ~ 599.00 Hz
	Starting Torque*	150%/3 Hz ( V/f, SVC control for IM, heavy duty ) 100%/(1/20 of motor rated frequency) ( SVC control for PM, heavy duty )
	Speed Control Range*	1 : 50 ( V/f, SVC control for IM, heavy duty ) 1 : 20 ( SVC control for PM, heavy duty )
	Overload Tolerance	Normal Duty (ND): 120% of rated output current for 60 seconds; 150% of rated output current for 3 seconds Heavy Duty (HD): 150% of rated output current for 60 seconds; 200% of rated output current for 3 seconds
	Frequency Setting Signal	0 ~ 10V / 4(0) 20mA, 1pulse input (10kHz)
	Main Control Functions	Multiple motor switches (2 independent motor parameter settings), fast run, deceleration energy back (DEB) function, fast deceleration function, selectable master and auxiliary frequency source, momentary power loss ride through, speed search, over-torque detection, 16-step speed (max.), accel. / decel. time switch, S-curve accel/decel, 3-wire sequence, JOG frequency, upper/lower limits for frequency reference, DC injection braking at start and stop, PID control, simple positioning function, Modbus integrated as standard
Protection Functions	Motor Protection	Overcurrent protection, overvoltage protection, overload protection, over-temperature protection, phase failure protection
	Stall Prevention	During acceleration, deceleration and running independently
Certifications		UL, CE, RoHS, RCM, TUV, REACH, KC

\*Control accuracy may vary depending on the environment, application conditions, different motors or encoder. For details, please contact our company or your local distributor.

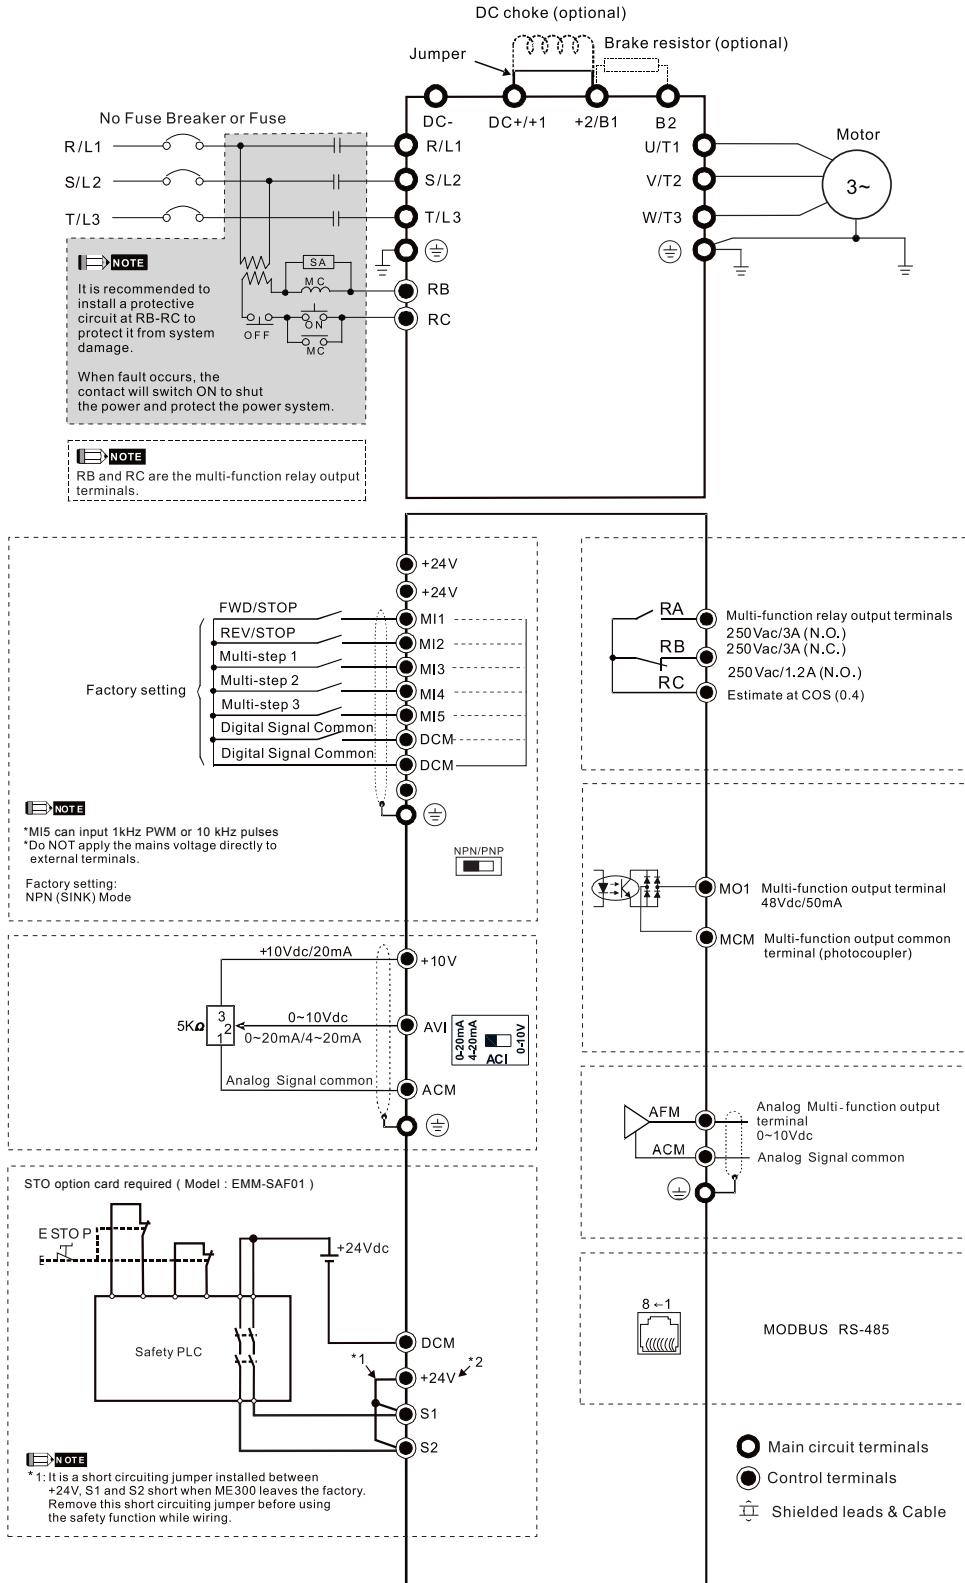

## Operating Environment

Operating Environment	Installation Location		IEC60364-1/IEC60664-1 Pollution degree 2, Indoor use only	
	Ambient Temperature	Operation	IP20/UL Open Type	
			-20 ~ 50 °C -20 ~ 60 °C (derating required)	
			NEMA 1/UL Type 1	
			-20 ~ 40 °C -20 ~ 50 °C (derating required)	
		Zero stacking installation		
	Storage		-40 ~ 85 °C	
	Transportation		-20 ~ 70 °C	
	Rated Humidity	Operation		Max. 90%
		Storage/Transportation		Max. 95%
	Air Pressure	Operation		86 ~ 106 kPa
		Storage/Transportation		70 ~ 106 kPa
	Pollution Level	Compliance to IEC60721-3-3, 3C2		
	Altitude	An altitude of 0 ~ 1000m for normal operation (derating is required for installation at an altitude above 1000m)		
	Vibration	Compliant to IEC 60068-2-6		
	Shock	Compliant to IEC/EN 60068-2-27		

\* Please refer to ME300 user manual for more details
