

ALUMINUM ELECTROLYTIC CAPACITORS

NT series Screw Terminal Type, 105°C Standard

- Load life of 5,000 hours (2,000 hours for 10~250V,500V) application of rated ripple current at +105°C.
- Extended voltage range from 10V up to 500V.
- Extended range up to $\phi 100 \times 250L$ 2size.
- Available for adapted to the RoHS directive (2002/95/EC).

NT

Specifications

Item	Performance Characteristics																																																																																																																					
Category Temperature Range	- 40 to +105°C (10 to 100V) , - 25 to +105°C (160 to 500V)																																																																																																																					
Rated Voltage Range	10 to 500V																																																																																																																					
Rated Capacitance Range	220 to 1500000 μ F																																																																																																																					
Capacitance Tolerance	$\pm 20\%$ at 120Hz, 20°C																																																																																																																					
Leakage Current	After 5 minutes' application of rated voltage, leakage current is not more than $3\sqrt{C/V}$ (μ A) or 5mA, whichever is smaller. (at 20°C) [C:Rated Capacitance (μ F) , V:Voltage(V)]																																																																																																																					
tan δ (MAX)	Measurement frequency:120Hz, Temperature:20°C

Endurance	After an application of DC voltage (in the range of rated DC voltage even after over-lapping the specified ripple current) for 5000 hours (2000 hours for 10~250V,500V) at 105°C, capacitors meet the characteristic requirements listed at right.																																																																																																																					
	<table border="1"> <tbody> <tr> <td>Capacitance change</td> <td>Within $\pm 20\%$ of initial value</td> </tr> <tr> <td>tan δ</td> <td>300% or less of initial specified value</td> </tr> <tr> <td>Leakage current</td> <td>Initial specified value or less</td> </tr> </tbody> </table>	Capacitance change	Within $\pm 20\%$ of initial value	tan δ	300% or less of initial specified value	Leakage current	Initial specified value or less																																																																																																															
	Capacitance change	Within $\pm 20\%$ of initial value																																																																																																																				
tan δ	300% or less of initial specified value																																																																																																																					
Leakage current	Initial specified value or less																																																																																																																					
Shelf Life	After storing the capacitors under no load at 105°C for 1000 hours, and after performing voltage treatment based on JIS C 5101-4 clause 4.1 at 20°C, they will meet the requirements listed at right.																																																																																																																					
	<table border="1"> <tbody> <tr> <td>Capacitance change</td> <td>Within $\pm 20\%$ of initial value</td> </tr> <tr> <td>tan δ</td> <td>300% or less of initial specified value</td> </tr> <tr> <td>Leakage current</td> <td>Initial specified value or less</td> </tr> </tbody> </table>	Capacitance change	Within $\pm 20\%$ of initial value	tan δ	300% or less of initial specified value	Leakage current	Initial specified value or less

Marking	Printed with white color letter on black sleeve.																																																																																																																					

Drawing

$\phi 35$ Screw terminal type

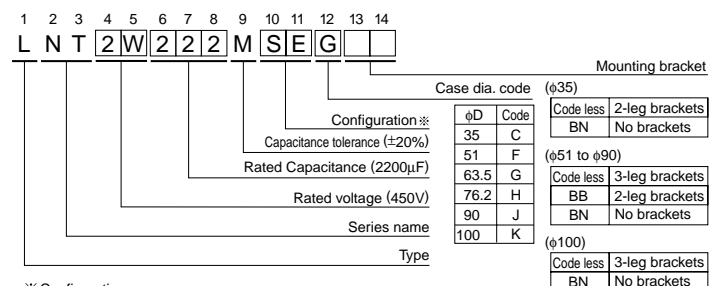

Type numbering system

Voltage 250V or less (Example : 250V 3300 μ F)

Voltage 350V or more (Example : 450V 2200 μ F)

※ Configuration

Cr (III) Plating (RoHS compliant)	Cr (VI) Plating
SE	SM

Resin bushing available upon request.

※ Please contact to us if PVC less products are required.

● Dimension table in next page.

CAT.8100W

Screw terminal type for $\phi 51$ and larger

Method to mount resin bushing ($\phi 76.2$) (Apply to $L=150$ or more)

Method to mount resin bushing ($\phi 90$) (Apply to $L=150$ or more)

※B
3-leg brackets for $\phi 90$ capacitors have different hole shapes from the ordinary ones as illustrated below.

● Dimension of terminal pitch (W) and length (ℓ) and Nominal dia. of bolt (mm)

ϕD	W	ℓ	α	Nominal. of bolt
51	22.0	6	3	M5
63.5	28.6	6	3	M5
76.2	31.8	6	3	M5
90	31.8	6	3	M5
100	41.5	10	4	M8

● Dimensions of mounting bracket (mm)
