

# **KVM Switch Accessories - NetCommander USB Server Interface Module**

MODEL NUMBER: B078-001-USB

### Description

The Tripp Lite NetCommander USB Server Interface Module connects to the HD15 port and USB port on a computer/server, and converts them to a single RJ45 connector. Ordinary Cat5e patch cables can then be used to connect the server to the switch ports on a Tripp Lite B072-Series NetCommander Cat5 KVM switch. Use of Cat5e cables frees up space in the installation that would ordinarily be filled by traditional, thicker KVM cables.

### **Features**

- Eliminates the need for thicker, heavier KVM cables
- Compact, lightweight design
- · Plug and Play; no software required
- No power supply required
- Allows a Server/CPU to be located up to 35ft away from the KVM switch

# **Specifications**
