

# Mini USB Microphone

PRODUCT ID: 3367

## . Description

Hey, listen up! It's the world's smallest USB microphone! OK maybe it's not in the Guinness Record Book, but it is *pretty darn small!* This plug-and-play **Mini USB Microphone** needs no driver, and its USB interface means you can use it with any computer, laptop, SBC, etc!

Works great with a Raspberry Pi computer, but you can also use it with any other computer you want to record audio on. Simply plug it right in and you're ready to start recording your podcast, song, spoken-word poetry, audiobook, or whatever your heart desires! If you need to be a little *closer* to the audio source, you may want to pair it with a USB extension cable or a USB swivel adapter.

## . Technical Details

Product Dimensions: 22.2mm x 18.3mm x 7.0mm / 0.9" x 0.7" x 0.3"

Product Weight: 2.2g / 0.1oz
