

## Riverdi Display 3.5"

PID: MIKROE-2161

Weight: 86 g

Condition: New product

A high-quality cost-effective **3.5" TFT display** with a metal mounting frame for easier integration. Easy to use with MikroElektronika development tools.

The **320x240px** screen is driven by an **FT800** graphic controller which is supported in Visual TFT, the GUI design tool for rapid development of user interfaces.

This model doesn't have a touchscreen layer which results in increased brightness – 540 cd/m<sup>2</sup>. The addition of anti-glare surface treatment makes further increases clarity.

The connector uses an **I2C/SPI** interface. To use it with various MikroElektronika hardware, a Riverdi click adapter board is available (interface between the connector on the display and a mikroBUS™ socket).

## SPECIFICATION

Display size	3.5"
Resolution	320x240px
Graphic controller	FT800
Brightness	540 cd/m2
Touch Screen	None
Interface	I2C or SPI
Integration	Mounting frame
Power Supply	3.3V
