# **185 WATTS**

## SINGLE/MULTI OUTPUT DC-DC

## FEATURES:

- 18-36VDC Input
- Compact 4.2" x 7.0" x 1.5" Size
  2 Year Warranty
  18-36VDC Input
  Compact 4.2" x 7.0" x 1.5" Size
  IEC 60601-1 3<sup>rd</sup> ed. Medical Cert.
  IEC 62368-1 2<sup>nd</sup> ed. Certification
  0-70°C Operating Temperature
- One to Four Outputs
- RoHS Compatible 4242VDC Reinforced Insulation 
   • Optional Chassis/Cover
- Power Good Signal Under/Overvoltage Lockout
- Size/Pin Compatible with REL-185 Series

## **ORDERING INFORMATION**

Consult factory for alternate output configurations. Consult factory for positive, negative or floating outputs. Please specify the following optional features when ordering:

CH - Chassis

- CO Cover
- BD Reverse Input Protection
- I/O Isolated Outputs
- TS Terminal Strip

ALL DIMENSIONS IN INCHES (mm)

### **APPLICATIONS INFORMATION**

- Each output can deliver its rated current but Total Output Power must not exceed 185W as determined by the cooling method.
- Generally, adequate cooling is provided when semiconductor case temperatures do not exceed 70°C rise and transformer temperature does not exceed 60°C rise at any specified ambient temperature.
- Sufficient area must be provided around power supply to allow natural movement of air to develop in convection-cooled applications.
- This product is intended for use as a professionally-installed component within information technology, industrial, and medical equipment and is not intended for stand-alone operation.
- 5. A minimum load of 10% is required on Output 1 to ensure proper regulation of remaining outputs.
- Peak-to-Peak Output Ripple and Noise is measured directly at the output terminals of the power supply, without the use of the probe ground lead or retractable tip (tip-and-barrel method), 20 MHz bandwidth.
- 7. This product was type-tested and safety-certified using the dielectric strength test voltages listed in Table 6 of IEC 60601-1:2005. In consideration of Clause 8.8.3, care must be taken to insure that the voltage applied to a reinforced insulation does not overstress different types and levels of insulation. Primary and secondary-to-ground capacitors may need to be disconnected prior to performing a dielectric strength test on the power supply or the end product. It is highly recommended that the DC test voltages listed in DVB.1, Annex DVB of UL 60601-1 1st Edition are not exceeded during a production-line dielectric strength test of the assembled end product. Please consult factory for further information.
- This power supply has been safety-approved and final-tested using a DC dielectric strength test. Please consult factory before performing an AC dielectric strength test.
- Remote-Sense terminals may be used to compensate for cable losses up to 250mV. The use of a twisted pair, decoupling capacitors and an appropriately-rated low-impedance capacitor connected across the load will increase noise immunity.
- Maximum screw penetration into bottom chassis mounting holes is 0.100 inches. Maximum screw penetration into side chassis mounting holes is 0.250 inches.
- 11. Power Good feature provides a logic-high signal from an open collector transistor when DC input reaches minimum operating voltage.
- 300LFM minimum of airflow must be maintained one inch above all points of top-side components or cover when forced-air cooling is required.
- Total Power must not exceed 135W with convection cooling on open-frame models except where noted.
- Total Power must not exceed 185W with 300LFM forced-air cooling on open-frame models.
- 15. Total Power must not exceed 110W with convection cooling and Chassis/Cover option.
- 16. Total Power must not exceed 185W with 300LFM forced-air cooling and Chassis/Cover
- option.
- 17. Rated 15A maximum with convection cooling.
- 18. Rated 27A maximum with convection cooling.
- 19. Total current from Outputs 3 & 4 must not exceed 3A with convection cooling.
- 20. Total current from Outputs 1 & 2 must not exceed 20A with convection cooling.

## CONNECTOR SPECIFICATIONS

P1	DC Input	#6 standard (3)position terminal block.
P2	DC Output	6-32 screw down terminal mates with #6 ring tongue
	(Single)	terminal. (10 in-lb max)
P2	DC Output	0.156 friction lock header mates with Molex 09-50-3161 or
	(Multiple)	equivalent crimp terminal housing with Molex 2478 or
		equivalent crimp terminal.
G	Ground	0.187 quick disconnect terminal.
P3	P.G./Sense	0.100 breakaway header mates with Molex 50-57-9008 or
	(Single)	equivalent crimp terminal housing with Molex type 71851 or
		equivalent crimp terminal.
P3	P.G./Sense	0.100 breakaway header mates with Molex 22-55-2081 or
	(Multiple)	equivalent crimp terminal housing with Molex type 71851 or
	,	equivalent crimp terminal.
