

MAGNET-57-32

Ruland Retaining Magnet Base, OD 57mm, Center to Center 32mm, Thread M6, Rubber

Description

Ruland MAGNET-57-32 is a retaining magnet base with a 57mm outer diameter, 32mm center to center dimension, M6 thread, 11.3mm height, and 175 N magnetic force. It is designed to mate with flanged bolt bases, two-way base connectors, and one-way connectors with the same center to center dimension. MAGNET-57-32 is made of neodymium, iron, and boron and it is covered with a rubber jacket for durability in industrial, medical, food processing, and packaging environments. It is used for portability in applications for mounting sensors, screens, reflectors, plexiglass machine guards, and other industrial components. This magnetic base has high magnetic force to keep components in place during operation while being easy for a user to remove by hand when it needs to be moved. MAGNET-57-32 will not mar the surface it is attached to helping to protect sheet metal, extruded aluminum framing, and other objects it may be attached to. It is manufactured by Otto Ganter, inventoried by Ruland, and RoHS3 compliant.

Product Specifications

Outside Diameter OD	57 mm	Inner Diameter ID	53 mm
Thread (TH)	M6	Thread Depth T	7 mm
Height (H1)	11.3 mm	Center To Center LC	32 mm
Magnetic Forces	175 N	Manufacturer	JW Winco/ Otto Ganter
Country of Origin	Germany	Weight (lbs)	0.190700
UPC	634529229279	Tariff Code	8505.11.9000
UNSPC	31381326		
Note 1	Performance ratings are for guidance only. The user must determine suitability for a particular application.
