

RSF100 SERIES

EXTERNAL MOUNT MINIATURE VERTICAL SWITCH

A compact vertically mounted design with a single switch point.

Mounting is in the top or bottom of a tank via a compression seal, so does not require access to the inside of the tank for fitting.

Standard versions are 25VA and high power versions are available with 100VA switching capacity.

The switch action may be reversed by removing the float, inverting it, then refitting to the stem.

Available in flying lead or M12 connector versions.

Cables are available for use with M12 connection versions.

Features

- External mount via compression seal
- Compact design with small diameter float
- Available in Nylon, Polypropylene, PPS or PVDF
- WRAS and NSF approved versions available
