

5MPA SERIES

Metallized Polypropylene

Metallized Polypropylene low loss dry film construction capacitors

UL Recognized Component. Superior to other AC capacitors because of low loss dry film construction.

FEATURES

- Dry film construction
- Capacitance to 300 μ F
- Continuous operating temperature to 85°C
- High current handling
- UL recognized
- RoHS compliant

STANDARD CONFIGURATION

- 4 Terminal Styles

Specification Summary

Capacitance Range

1.0 μ F to 300.0 μ F

Capacitance Tolerance

Standard capacitance tolerance is $\pm 5\%$. Tolerance of $\pm 3\%$ is also available.

Operating Temperature Range

-55°C to +85°C

Enclosure/Construction

Polypropylene film in a polyester wrap with epoxy endfill. Terminals are tin plated copper.

Voltage Rating

VAC: 300VAC to 900VAC

VDC: 450VDC to 1300VDC

Quality Control

Capacitors are tested 100% for:

- Capacitance
- Tolerance
- Dissipation Factor
- Dielectric withstanding voltage
- Insulation Resistance
- Equivalent Series Resistance (ESR)

Process and inspection data are maintained on file and available upon special request.

Environmental

Parameter	Method	Condition
Vibration	204	D
Shock	213	I
Humidity	106	-
Thermal Shock	107	A
Life	108	F
Reference MIL-STD-202		

Characteristics

Dielectric Strength

Capacitors withstand a DC potential of 1.5 x rated voltage for one (1) minute without damage or breakdown. Test voltage is applied and discharged through a minimum resistance of 1 OHM per volt minimum.

Dissipation Factor

Polypropylene has an intrinsic dissipation factor of less than 2.1×10^{-4} over the operating temperature range of -55°C to +105°C and frequencies to 1MHz.

BRACKET

Additional Information

Units are wrapped with flame retardant insulating tape and end-filled with a flame retardant potting compound. Current handling capabilities from normal line frequency currents to 83amps, RMS from 2kHz to resonant frequency. Capacitor values supporting style 5 are supplied with an exclusive "bridge & bolt" construction - both with multiple internal soldered contact points for high current distribution.

How to Order

TYPE Metallized Polypropylene	→	5MPA
AC VOLTAGE 1 = 300 VAC, 2 = 530 VAC, 3 = 900 VAC	→	2
CAPACITANCE IN PICOFARADS The first two digits are significant, the third represents the number of zeros (e.g 475=4,700,000pF)	→	475
TOLERANCE J = ±5% Also available: E = ±3%	→	J
OPTIONS (WHERE APPLICABLE) No Suffix - Standard thread without brackets 2 - Standard threads with mounting brackets 3 - Metric threads without brackets 5 - Metric threads with mounting brackets 6 - Style 3 flat terminal tab with mounting brackets Standard thread: 1/4-20 Metric thread: M6 x 1.0	→	2
For terminal style 4 and style 5, in either standard or metric threads, hardware for electrical terminals only are available upon request. The hardware kit will include flat washers, nuts and lock washers.		

Marking And Date Code

All capacitors are marked with company initials "EC", corporate logo or EC trademark—in addition to type 5MPA, capacitance, tolerance, rated DC working voltage and date code. The first two digits of the date code represent the year, the second two digits the week, i.e., 1252 is the 52nd week of 2012, 1202 is the second week of 2012.

Quality Assurance

Major emphasis is placed on quality assurance. EC is an ISO 9001 and AS9100 Certified Company. Raw material inspection and the use of SPC manufacturing procedures assure the highest quality standards. Procedures are fully described in the EC Quality Control Manual. Electronic Concepts will continue to advance the state-of-the-art by utilizing leading edge technology, compact capacitor designs and establishing reliability procedures.
