FEATURES

- **Single-Chip Mixer/Oscillator and PLL Synthesizer**
- **Three-Band Local Oscillator**
- **I²C Bus Protocol (Bidirectional Data Transmission)**
- **30-V Tuning Voltage Output**
- **Four NPN-Type Band-Switch Drivers**
- **Programmable Reference Divider Ratio (512, 640, or 1024)**
- **5-V Power Supply**
- **30-Pin TSSOP Package**

APPLICATIONS

- **TV**
- **VCR/DVD Recorder**
- **Set-Top Box**

DESCRIPTION

The SN761681 is a synthesized tuner IC designed for TV tuning systems. The circuit consists of a PLL synthesizer, three-band local oscillator and mixer, 30-V output tuning amplifier, four NPN band-switch drivers, and is available in a small-outline package. A 15-bit programmable counter and reference divider are controlled by I²C bus protocol. Tuning step frequency is selectable by this reference divider ratio for a crystal oscillator.
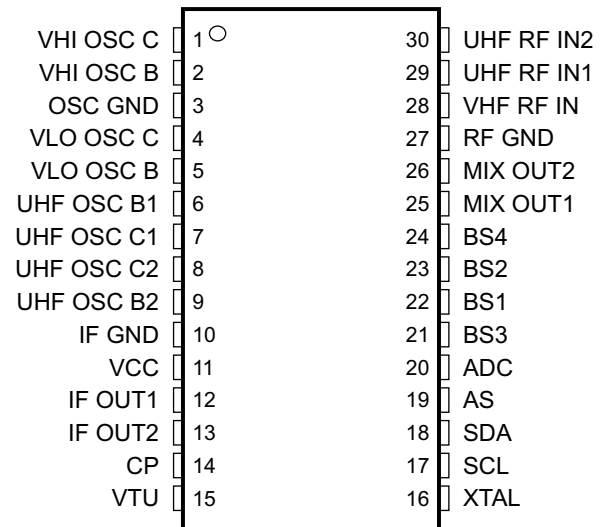

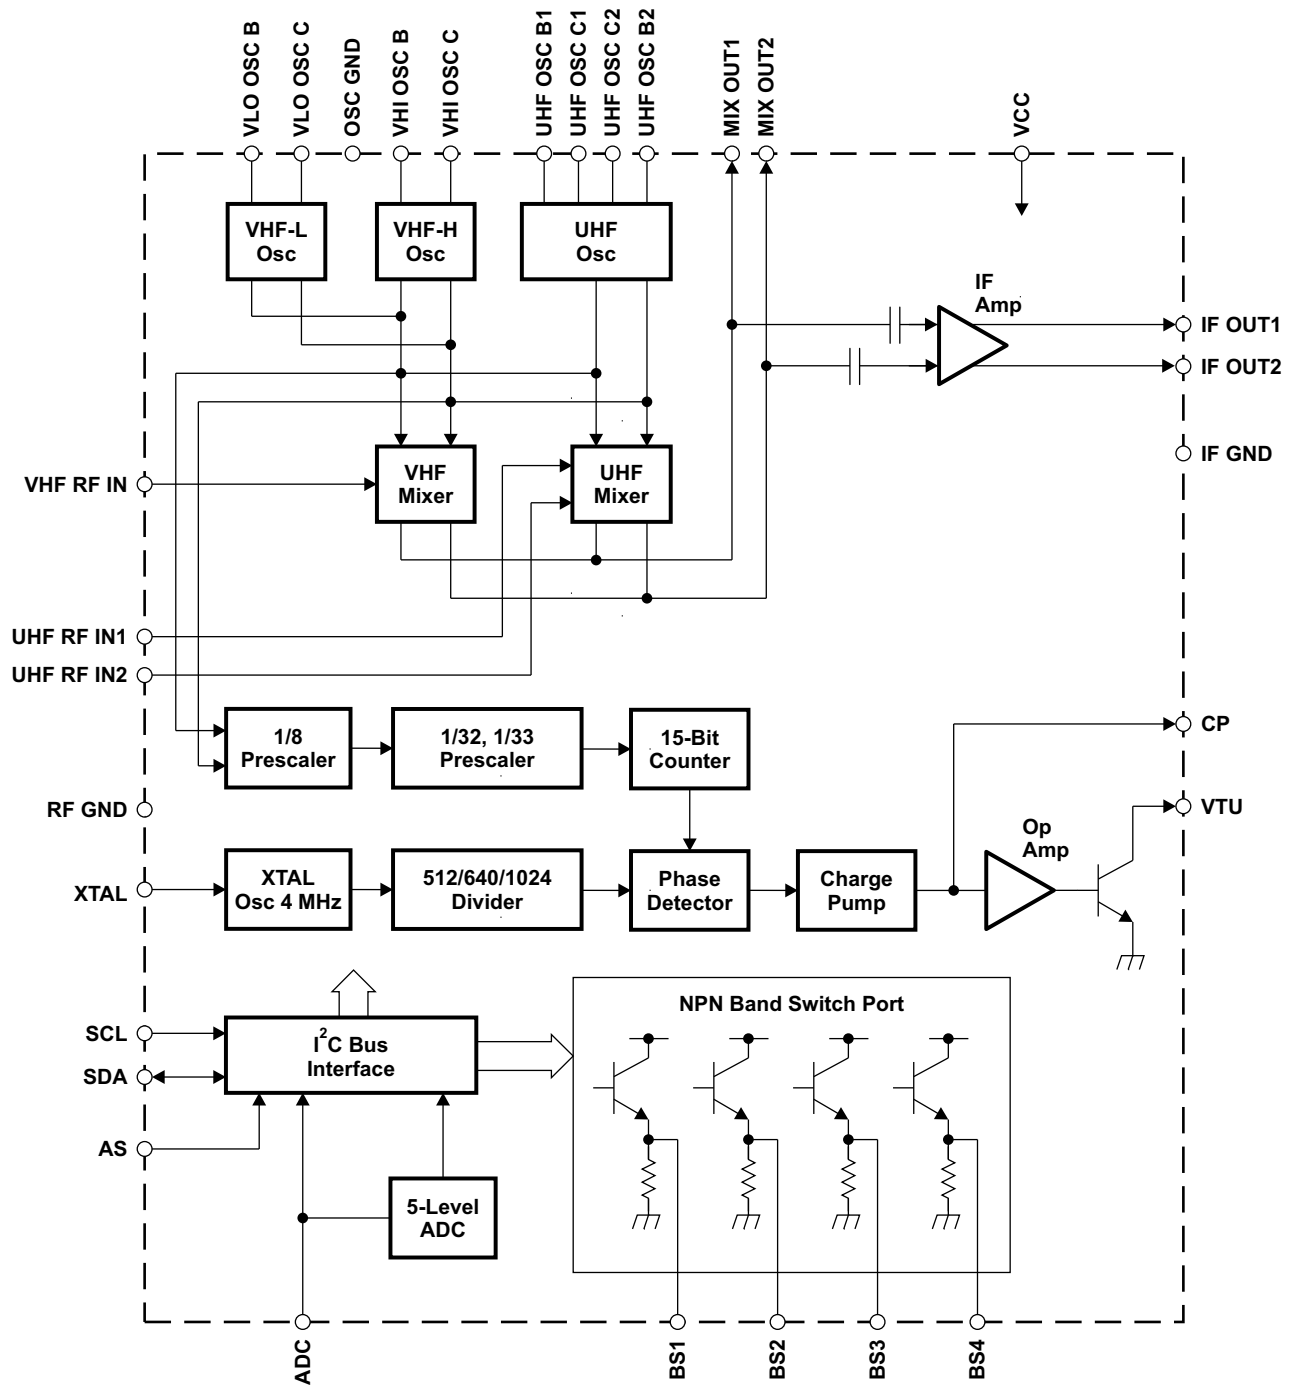

This integrated circuit can be damaged by ESD. Texas Instruments recommends that all integrated circuits be handled with appropriate precautions. Failure to observe proper handling and installation procedures can cause damage.

ABSOLUTE MAXIMUM RATINGS

over operating free-air temperature range (unless otherwise noted) [1]

Supply voltage, V_{CC} [2]	VCC (Pin 11)	−0.4 V to 6.5 V
Input voltage 1, V_{GND} [2]	RF GND, OSC GND (Pins 3, 27)	−0.4 V to 0.4 V
Input voltage 2, V_{VTU} [2]	VTU	−0.4 V to 35 V
Input voltage 3, V_{IN} [2]	Other pins (Pins 1, 2, 4–9, 12–14, 16–26, 28–30)	−0.4 V to 6.5 V
Continuous total dissipation, P_D [3]	$T_A \leq 25°C$	1071 mW
Operating free-air temperature, T_A		−20°C to 85°C
Storage temperature range, T_{stg}		−65°C to 150°C
Maximum junction temperature, T_J		150°C
Maximum short-circuit time, $t_{SC(max)}$	Each pin to V_{CC} or to GND	10 s

(1) Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.
(2) Voltage values are with respect to the IF GND of the circuit.
(3) Derating factor is 8.57 mW/°C for $T_A \geq 25°C$.

RECOMMENDED OPERATING CONDITIONS

over operating free-air temperature range (unless otherwise noted)

		MIN	NOM	MAX	UNIT
Supply voltage, V_{CC}		4.5	5	5.5	V
Tuning supply voltage, V_{TU}			30	33	V
Output current of band switch, I_{BS}	One port on			10	mA
Operating free-air temperature, T_A		−20		85	°C

ELECTRICAL CHARACTERISTICS, Total Device and Serial Interface

V_{CC} = 4.5 V to 5.5 V, T_A = −20°C to 85°C, unless otherwise noted

PARAMETER		TEST CONDITIONS	MIN	TYP	MAX	UNIT
$I_{CC}1$	Supply current 1			60		mA
$I_{CC}2$	Supply current 2	One band switch on (I_{BS} = 10 mA)		70		mA
V_{IH}	High-level input voltage (SCL, SDA)		2.8		V_{CC}	V
V_{IL}	Low-level input voltage (SCL, SDA)				1.4	V
I_{IH}	High-level input current (SCL, SDA)				10	µA
I_{IL}	Low-level input current (SCL, SDA)		−10			µA
V_{POR}	Power-on-reset supply voltage (threshold of supply voltage between reset and operation mode)		2.1	2.8	3.5	V
I²C INTERFACE						
V_{ASH}	Address-select high-input voltage (AS)	V_{CC} = 5 V	4.5		5	V
V_{ASM1}	Address-select mid1-input voltage (AS)	V_{CC} = 5 V	2		3	V
V_{ASM2}	Address-select mid2-input voltage (AS)	V_{CC} = 5 V	1		1.5	V
V_{ASL}	Address-select low-input voltage (AS)	V_{CC} = 5 V			0.5	V
I_{ASH}	Address-select high-input current (AS)				140	µA
I_{ASL}	Address-select low-input current (AS)		−50			µA
V_{ADC}	ADC input voltage	See Table 8	0		V_{CC}	V
I_{ADH}	ADC high-level input current	V_{ADC} = V_{CC}			10	µA
I_{ADL}	ADC low-level input current	V_{ADC} = 0 V	−50			µA
V_{OL}	Low-level output voltage (SDA)	V_{CC} = 5 V, I_{OL} = 3 mA			0.4	V
I_{SDAH}	High-level output leakage current (SDA)	V_{SDA} = 5.5 V			10	µA
f_{SCL}	Clock frequency (SCL)			100	400	kHz
I²C Timing (see timing chart, Figure 16)						
$t_{hd(DAT)}$	Data hold time		0			µs
$t_{(BUF)}$	Bus free time		1.3			µs
$t_{hd(STA)}$	Start hold time		0.6			µs
$t_{(Low)}$	SCL-low hold time		1.3			µs
$t_{(High)}$	SCL-high hold time		0.6			µs
$t_{su(STA)}$	Start setup time		0.6			µs
$t_{su(DAT)}$	Data setup time		0.1			µs
t_r	SCL, SDA rise time				0.3	µs
t_f	SCL, SDA fall time				0.3	µs
$t_{su(STO)}$	Stop setup time		0.6			µs

(1) The marketing status values are defined as follows:

ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

PREVIEW: Device has been announced but is not in production. Samples may or may not be available.

OBSOLETE: TI has discontinued the production of the device.

(2) Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check http://www.ti.com/productcontent for the latest availability information and additional product content details.

TBD: The Pb-Free/Green conversion plan has not been defined.

Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.
Pb-Free (RoHS Exempt): This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.

Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

(3) MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

Important Information and Disclaimer: The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

PACKAGE MATERIALS INFORMATION

TAPE AND REEL INFORMATION

REEL DIMENSIONS

TAPE DIMENSIONS

A0	Dimension designed to accommodate the component width
B0	Dimension designed to accommodate the component length
K0	Dimension designed to accommodate the component thickness
W	Overall width of the carrier tape
P1	Pitch between successive cavity centers

NOTES: A.   All linear dimensions are in millimeters. Dimensioning and tolerancing per ASME Y14.5M−1994.
             B.   This drawing is subject to change without notice.
             C.   Body dimensions do not include mold flash or protrusion.
             D.   Falls within JEDEC MO−153.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

TI products are not authorized for use in safety-critical applications (such as life support) where a failure of the TI product would reasonably be expected to cause severe personal injury or death, unless officers of the parties have executed an agreement specifically governing such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of TI products in such safety-critical applications, notwithstanding any applications-related information or support that may be provided by TI. Further, Buyers must fully indemnify TI and its representatives against any damages arising out of the use of TI products in such safety-critical applications.

TI products are neither designed nor intended for use in military/aerospace applications or environments unless the TI products are specifically designated by TI as military-grade or "enhanced plastic." Only products designated by TI as military-grade meet military specifications. Buyers acknowledge and agree that any such use of TI products which TI has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI products are neither designed nor intended for use in automotive applications or environments unless the specific TI products are designated by TI as compliant with ISO/TS 16949 requirements. Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, TI will not be responsible for any failure to meet such requirements.
