Description

The PE2CP023 is a 90 degree hybrid coupler that operates from 2 to 18 GHz and can handle up to 50 Watts (CW) with 15 dB isolation minimum and 1.6:1 VSWR maximum. The package interface uses SMA female connectors, and is RoHS compliant.

The PE2CP023 is part of Pasternack's family of 90 degree hybrid couplers that offer excellent performance featuring high isolation, low insertion loss and VSWR while maintaining great amplitude/phase balance over the entire operating frequency range. They are available in both narrow and broad bandwidths and can be used in a wide variety of applications including signal sampling, phased array radar, and any application that requires even power distribution with a 90 degree difference in phase.
