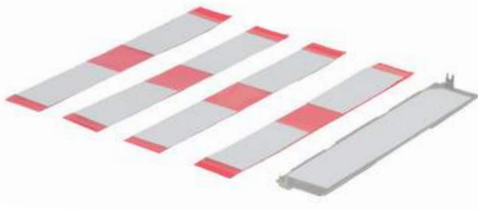
Tflex™ 200T V0 Series
Thermal Gap Filler



THIN THERMALLY CONDUCTIVE ELASTOMERIC INTERFACE MATERIAL

Tflex™ 200T V0 is a specially formulated thin gap filler thermal interface material designed for thin interfaces that require a combination good thermal performance with great reliability. The elastomeric property of Tflex™ 200T V0 provides good thermal performance in a thin interface where reliability and shock and vibration considerations are critical performance considerations in addition to low thermal resistance.

Tflex™ 200T V0's unique silicone and ceramic filler technology allows a combination of great reliability, good thermal performance, and easy handling.

FEATURES

- Thermal Conductivity 1.5 W/mK
- Compliant Elastomeric based thin interface material
- Available in 0.008-inch (0.2mm), 0.010-inch (0.25mm), 0.012-inch (0.30mm), 0.015-inch (0.38mm) , and 0.020-inch (0.51mm) thicknesses
- Slightly tacky for adhesion during assembly and transport
- Competitive price for high volume applications
- Available as individual custom parts, sheets, or custom parts converted on a roll

APPLICATIONS

- Memory Modules: DDR2, DDR3, SDRAM, SRAM, RAM, NVRAM
- LED solid state lighting
- Power electronics
