

Quick Reference Guide

KOAXXA SMA RF Interconnects

TE Connectivity introduces its next generation of RF products with KOAXXA RF interconnects. This product family premieres with the KOAXXA SMA product line that is designed to provide flexibility and value.

KEY FEATURES

- Fully compatible with IEC-169-15 standards
- Designed for 0-18 GHz performance
- Ability to mass customize products
- Global manufacturing footprints
- Large-scale manufacturing techniques
- Designed for fully automated assembly
- 500 cycle mating durability

Benefits

The new SMA connectors are redeveloped as an extendable product platform for large-scale manufacturing and assembly automation, delivering many advantages to the customer:

- Designed and manufactured to provide industry-leading build to order lead times globally
- Modular platform design allows for mass customization
- Automated assembly and electronic visual inspection to help ensure quality

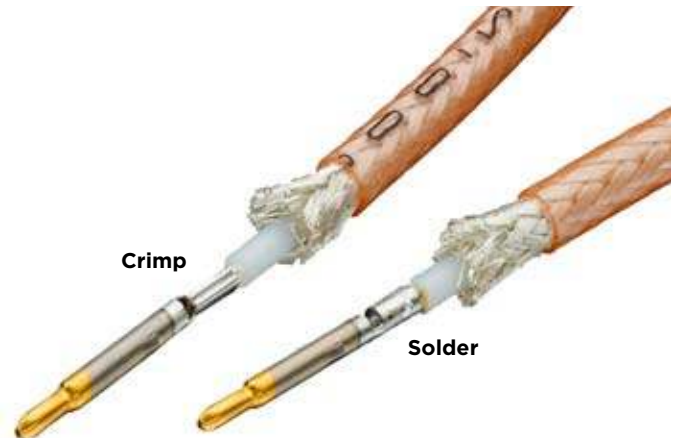

Innovative plating features provide a cost effective, attractive, easy to use product:

- Selective Tin plating only in solder regions allows for easy soldering
- Selective Gold plating puts gold only where it is needed
- Bright Nickel plating provides a robust attractive surface finish

Reduced utilization of precious and non-precious materials through selective plating, stamping and die casting helps decrease exposure to future material inflation.

Center contacts are stamped to provide the right performance and enable the use of selective plating, and can be soldered for best performance, or crimped using a hand applicator.

KOAXXA SMA Applications:

- Test and measurement equipment
- Transmission equipment
- Base station and sub system components
- Smart grid meters
- Antennas
- Broadband communication equipment
- Routers
- Industrial solutions
- Mobile radio handsets
- Commercialized applications in Mil/Aero

DESCRIPTION

The Voltage Standing Wave Ratio is a unit-less measure of the maximum voltage of a standing wave in the transmission line. Standing waves result from the mismatched complex impedances between the connector and the cable, causing reflections that sum with the input signal.

KOAXXA SMA Product Specifications

The KOAXXA SMA product family is qualified per TE Connectivity Product Specification 108-60094.

ELECTRICAL

- Low Level Contact Resistance** — 15 mOhm delta per EIA-364-23
- Insulation Resistance** — 5000 Mohms per EIA-364-21
- Withstanding Voltage** — 750 VAC (flex cable); 1000 VAC (SR cable)
- Voltage Standing Wave Ratio** — $1.05 + 0.007 * f(\text{GHz})$ up to 18 GHz (SR cable)

MECHANICAL

- Sinusoidal Vibration** — 20 G's, 10 to 2000 Hz per EIA-364-28, Cond IV
- Mechanical Shock** — 100 G's per EIA-364-27, Cond G
- Mating Torque** — 0.45 N-m [4 in-lb] per EIA-364-13, Method A
- Durability** — 500 cycles minimum per EIA-364-9

ENVIRONMENTAL

- Thermal Shock** — 5 cycles from -55 to +85°C per EIA-364-32C
- Humidity-Temperature Cycling** — 10 cycles from 25 to 65 c at 95% RH per EIA-364-31B, Cond III
- Temperature Life** — 85°C for 1000 hours per EIA-364-17B
- Mixed Flowing Gas** — 14 days mated exposure to Class IIA per EIA-364-65A
