WBSAGVDXG: Wireless LAN Module Evaluation Board

To Evaluate WLAN Module WYSAGVDXG
You Will Need WBSAGVDXG

WBSAGVDXG is the evaluation board for WLAN Module **WYSAGVDXG**. This board has everything you need to evaluate the performance of this module.

WBSAGVDXG Board includes:

No.	Item	Description	Qty
1	WBSAGVDXG	Evaluation Board for WLAN module WYSAGVDXG with SDIO interface	1
2	Red & Blue Cable	Power Supply Cable	1

1 WBSAGVDXG

2 Red & Blue Cable

Supplemental Product Information

WLAN Module Operating Environment

- PC with Linux Fedora18 with software development option and SDIO interface

Attention: PC with SDIO is required. Although SDIO and SD Memory Card have the same slot shape, they are not compatible. WLAN Module and Evaluation Board will not work if they are connected to SD memory card slot.

What will be provided if the Evaluation Board (WBSAGVDXG) is purchased

- Lab-tool User Guide: RF Control Tool Guide
- Lab-tool: RF Control Tool
- WLAN Device Driver Software for Linux PC, Fedora18

Attention: There is a possibility that export control could limit customer's access WLAN Device Driver and the API Specification depending on the customer's country or application.

Attention: WYSAGVDXG (not WBSAGVDXG) provided by web distributor is not bundled any above documents and software. To get them, you need to purchase WBSAGVDXG (Evaluation Board).

If there is no PC with SDIO, Evaluation Kit(WKSAGVDXG) is recommended.

- ESPRESSObin(ARM Cortex A53) is attached. It can be used instead of PC

Attention: There is a possibility that export control could limit customer's access WLAN Device Driver and the API Specification depending on the customer's country or application.
