

Premium Silicone Covered Female-Female Jumper Wires – 200mm x 40

PRODUCT ID: 4447

These premium female-female jumper wires are handy for making wire harnesses or jumpering between headers on PCBs. They're 200mm (~7.8") long and come loose as a pack of 40 (10 pieces of red, blue, yellow, and Adafruit black). They have 0.1" female header contacts on either end and fit cleanly next to each other on standard-pitch 0.1" (2.54mm) header.

These jumper wires are a little more expensive than most because they use silicone covered wires, they're a little more durable and they're more heat-resistant than standard PVC covered wires.

[We have tons of different Jumper Wires available, in all shapes and sizes!](#)

For best results, when plugging these into a male header, have the sides with the 'silver latch bit' sticking out since that side is a tiny bit wider than 0.1".

Please Note: The length of the jumper wires is sometimes a bit longer than what is listed.

TECHNICAL DETAILS

- Length: 200mm (~ 7.8")
- Each wire is 24AWG thickness
