

EPCOS Sample Kit 2015

# Ceramic Transient Voltage Suppressors

CTVS Multilayer Varistors and CeraDiodes for Industrial Use

# Protection against ESD and surge currents for industrial use

Industrial applications and automation equipment require both reliable ESD protection (e.g. on data line interfaces) as well as protection against severe surges or high-energy transients, such as caused by switching of large capacitive or inductive loads. EPCOS CTVS® (ceramic transient voltage suppressors) and CeraDiodes® are ceramic multilayer components for reliable protection against such electrical transients.

CeraDiodes® provide cost-efficient but reliable ESD protection up to 30 kV. The portfolio of EPCOS multilayer varistors provides additionally high surge protection capability and are qualified to protect industrial applications against high surge currents of up to 5 kA acc. to IEC 61000-4-5. CTVS® can replace semiconductor diodes in many applications.

## Features

### Cera Diodes® for ESD protection

- Bidirectional ESD protection up to 25 kV (ISO 10605)
- Bidirectional ESD protection min. 8 kV contact, 15 kV air (IEC 61000-4-2)
- High reliability, stable protection level, excellent long-term stability
- Multi-strike capability
- Low leakage current, low parasitic inductance
- No derating up to +85 °C/ +125 °C (depending on type)
- EMI/ RFI attenuation
- Short response time of < 0.5 ns

### Additional features for MLV types for surge protection

- High surge current protection up to 5.000 A
- Surge load capability up 4 kV for 8/20 µs acc. to IEC 61000-4-5
- Surge voltage capability up to 2 kV for 10/700 µs acc. to IEC 61000-4-5
- Continuous operation up to +125 °C without derating

## Applications

- Automation engineering
- Interfaces, data lines, push buttons, serial ports
- Industrial PCs and monitoring systems
- Power supplies
- PoE (power over ethernet)

**Important information:** Some parts of this publication contain statements about the suitability of our products for certain areas of application. These statements are based on our knowledge of typical requirements that are often placed on our products. We expressly point out that these statements cannot be regarded as binding statements about the suitability of our products for a particular customer application. It is incumbent on the customer to check and decide whether a product is suitable for use in a particular application. This publication is only a brief product survey which may be changed from time to time. Our products are described in detail in our data sheets. The *Important notes* ([www.epcos.com/ImportantNotes](http://www.epcos.com/ImportantNotes)) and the product-specific *Cautions and warnings* must be observed. All relevant information is available through our sales offices.
